FORESTS AND FORESTRY.

By Herbert A. Smith of the United States Forest Service.

By Herbert A. Smith of the
Our forests row cover 550,000,000 acres, or about
one-fourth of the United States. Forests publicly
owned contain one-fifth of all timber standing.
Forests privately owned contain at least four-fifths
of the standing timber. The timber privately
owned is not only four times that publicly owned,
but it is generally more valuable. Forestry is now
practiced on 70 per cent of the forests publicly
owned and on less than 1 per cent of the forests publicly
owned and on less than 1 per cent of the forests privately owned, or on only 18 per cent of the
total area of forests.

The original forests of the United States contained timber in quantity and variety far beyond
that upon any other area of similar size in the
world. They covered 850,000,000 acres, with a stand
of not less than 5,200,000,000,000 board feet of merchautable timber, according to present standards
of use. There were five great forests regions—the
northern, the southern, the central, the Rocky
mountain and the Pacific.

The present rate of cutting is three times the
nontual growth of the forests of the United States.
The great pineries of the lake states are nearing
exhaustion, and great inroads have been made upon
the supply of valuable timber throughout all parts
of the country. The heavy demands for timber
have been rapidly pushing the great centers of
lumber industry toward the south and west. In
consequence, the state of Washington has led for
reveral years in lumber production, followed in
order by Louislana, Texas, Mississippi, Wisconsin
and Arkansas. In 1909 the production of yellow
pine lumber amounted to sixteen and one-quarter
billion feet; the Douglas fir of the northwest held
recond place with four and three-fourths billion
feet, while white pine came third with four are
one-half billion feet. We take from our forests
yearly, including waste in logging and in manufacture, 20,000,000,000 do bond feet of lumber, 118,000,000
hewn ties, 1,500,000 do bond feet of lowed.

wood, 40,000,000 banrd feet of lumber, 118,000,000 hewn ties, 1,500,000 banrd feet of rumber, 118,000,000 sof heading, nearly 500,000,000 barrel hoops, 3,000,000 cords of native pulp wood, 165,000,000 cubic feet of runni mine timbers and 1,250,000 cords of wood for

distillation.

In 1909, 4,002,000 cords of wood were used in the manufacture of paper, of which 794,000 cords were imported from Canada. The demand for pulp wood imported from Canada. The demand for pulp wood is making a severe drain on the spruce forests which furnish the principal supply. The forest service of the United States department of agriculture is conducting investigations to determine what other woods, such as scrub pine, white fir, tupelo and the like, can be successfully used.

what other woods, such as scrub pine, white fir, tupelo and the like, can be successfully used.

A larger drain upon our forest resources is made by the demand for railroad ties, of which 123.754.600, equivalent to three and three-quarters billion board feet, were used in 1899. White oak, hither to the chief source of supply, is not plentiful enough to meet this demand indefinitely, and in many pirts of the country the supply of chestnut, cedar and cypress is dwindling; however, seasoning and treating methods are being found, largely through the work of the forest service, by which cheaper and more plentiful woods, such as lodge-nole pine in the northwest and loblolly pine in the south, are made fit for use as ties. Timber to the amount of two and one-half billion feet was used in 1907 for mine timbers. A great saving has been effected in the naval stores industry, also largely through the work of the forest service, by the introduction of the so-called "cup" systems of turpentining in place of the old destructive system of "boxing." The new systems insure a larger product of better quality, and prolong the life of the longleaf pine forests upon which the industry depends.

UNITED STATES FOREST SERVICE.

The forest service is one of the bureaus of the department of agriculture. It has charge of the administration and protection of the nutional forests, and also promotes the practice of forestry generally through investigations and the diffusion of information.

The work of the government in forestry was initiated by the appointment of Dr. Franklin Hough in 1876 as special agent in the department of agriculture. In 1881 a division of forestry was created in that department. In 1901 this division became the bureau of forestry, and in 1905, when the care of the national forests was given to this bureau, its name became the forest service.

Previously the care of the national forests had been in the hands of the department of the interior. A law authorizing the president to set apart forest reserves was passed in 1891, but no provision for their administration and use was made until 1897. Previous to 1905 the bureau of forestry merely gave expert advice, on request, to the de-

until 1897. Previous to 1905 the bureau of forestry merely gave expert advice, on request, to the department of the interior concerning the application of forestry to the forest reserves. The change of name from "forest reserves" to "national forests" was made in 1906, to correct the impression that the forests were, as "reserves." withdrawn from use. Since the forest service took charge of them the fundamental aim has been to open them to the widest use consistent with their proper protection. The reserves were set aside as follows: By President Harrison, 13,416,710 acres: by President McKinley. 7,050,089 acres; by President McKinley.

During the fiscal year ending June 30, 1910, President Taft added to the national forests 453,517 acres, and eliminated from them 2,037,645 acres, acres, and eliminated from them 2,037,645 acres, making their area at the close of the year 192,931,-197 acres. The eliminations threw out land which was found to be better suited for agricultural and other purposes than for forestry. An act of congress, passed in 1907, prohibits any additions by the president to the national forest area in Washington, Oregon, Idaho, Montana, Wyoming and Colorado. Colorado.

The following tables show the national forest expenditures and receipts for the fiscal year 1910, compared with those for the fiscal year 1909:

Expendi- Administration and Permanent improvetures protection. ments. for— Total. Per acre. 1910. \$3,752,316.91 \$0.01945 \$598,835.64 \$0.00310 \$1909. 2,948,153.08 0.01510 \$599,471.02 0.00309 Grazing.

Fiscal. year. 1919.....

1909..... Under the law 25 per cent of the gross receipts

Under the law 25 per cent of the gross receipts are paid to the states in which the national forests are located, to be expended for roads and schools. The amount to be paid to the states in this way from the receipts in 1910 is \$506.194.84. The grazing receipts for 1910 were paid by the holders of 20.692 permits to graze 1.497.570 cattle, barses and bogs, and of 4.995 permits to graze 7.618.952 sheep and oats. The receipts from timber sules were paid by 5.398 purchasers, who cut the equivalent of 379.616.000 board feet of timber. The grocality from growing was more neid by the holders. receipts from special uses were paid by the holders of 4,538 permits, including fifty-two for the use of land in connection with water-power development. land in connection with water-power development. In other words, these receipts represent profittable use of the forests by some 30,000 individuals or concerns. To the use for which payment was made must be added the heavy free use of the forests by the public. Figures for free use of timber are as follows:

Number of Value. \$176.166.51 105,205,359 169 081 12

In issuing permits for reservoirs, conduits, power houses and transmission lines for commercial power development, the forest service has steadfastly

insisted on conditions designed to prevent specula-tive or perpetual holdings and to secure the full development of available power and the payment of reasonable charges for the use of land. The total stand of timber on the national for-ests, exclusive of Alaska, is estimated at over five hundred billion board feet. The following table shows the total cut of tim-ber from the national forests in the fiscal year 1810:

State or	Cut under	Cut under	Total
territory.	sale (ft.).	free use (ft.)	cut (ft.).

The average price on the stump for the timber sold in 1910 was \$2.44 per thousand board feet.
The following table shows the amounts and kinds of stock grazed on the national forests in 1910 by states:

Kansas), Denver, Col., Smith Riley, district forester; district 3 (most of Arizona, Arkansas, Flordia, New Mexico and Oklahoma), Albaquerque, N. Mex., A. C. Ringhand, district forester; district 4 (Utah, southern Idaho, western Wyoming, eastern and central Nevada and a small portion of north-western Arizona), Ogden, Utah, E. A. Sherman, district forester; district 5 (California and south-western Nevada), San Francisco, Cal., F. E. Olmsted, district forester, and district 6 (Washington, Oregon and Alaska), Portland, Ore, C. S. Chapman, district forester, and district 6 (Washington, On July 1, 1910, the force employed by the forest service numbered 3,093. Of these 2,491 were employed upon the national forests and 602 were engaged in administrative, scientific and clerical

ployed upon the national forests and 602 were engaged in administrative, scientific and clerical work at the Washington and district headquarters. Of the employes on the national forests the force engaged principally in protective work numbered 1.853 men, as follows: Forest rangers, 243: assistant forest rangers, 1,050; forest guards, 558; game wardens, 2; hunters and trappers, 6. The protective force was therefore about one man for every 104,000 acres, or 163 square miles. (Prussla has one man for every 1,700 acres and Baden one for every 750.) every 750.)

BRANCH OF SILVICULTURE.

The branch of silviculture directs the management of the national forests as regards both the systems of cutting mature timber and the work of forest planting, supervises their protection, cooperates with states in developing forest policies adapted to their requirements, co-operates with private forest owners who desire to practice forestry on their lands, and carries on silvicultural investigations of the important tree species of the Intel States. Its most important tree species of the United States. Its most important work is in connection with the management of the national for-

The value of the public property administered by the forest service is estimated at over \$2,000.000.000. The great areas contained in the national forests The great areas contained in the national forests have now been brought to a condition where they are beginning to serve the purposes of the west. The conservation of timber and forage through wise use and the protection of stream flow are the means of sustaining many industries which have contributed materially to the prosperity of the

At the head of the forest service are Forester At the head of the forest service are Forester Henry S. Graves and Associate Forester A. F. Potter. The work is organized under the following branches: Operation, and also lands, James B. Adams, in charge; silviculture, W. T. Cox, in charge; grazing, A. F. Potter, in charge, and products, William L. Hall, in charge. The 149 national forests are distributed in six districts, with a district forester in charge of each, and headquarters as follows: District 1 (Montana, northeastern Washington, northern Michaelman, northern Minnesota and southwestern North Dakota), Missoula, Mont. W. B. Greeley, district forester; district 2 (Colorado, Wyoming, the remainder of South Dakota, Nebraska and western

ests, where the chief problem, after fire protection, is to replace the mature timber as it is sold and cut by young growth of valumble species. During the year ended June 30, 1910, 570,044,000 feet of timber was sold from the national forests at an average price of \$2.44 per thousand feet; in addition, 104,796,000 feet, valued at \$176,167, was disposed of to settlers who are entitled under the regulations to use wood for their requirements without charge. without charge.

without charge.

In planting within the national forests, the primary object is to produce commercial timber, although in a number of cases planting has been done chiefly with the view of reforesting denuded watersheds. In order to control and regulate the flow of streams directly supplying cities and towns. During the year ended June 30, 1910, 7-400 acres in national forests were sown or planted to trees, chiefly Douglas fir, western yellow pine, Austrian plne and Engelmann spruce. There are forty-five government nurseries which supply the national forests. These have a present stock of about 20,000 000 plants and are capable of supplying 18,000,000 as year. In the east, forest planting has been done mainly in co-operation with states and private owners. owners.

At the request of the states the forest service makes examinations of their forest conditions, makes silvicultural studies of practical importance, suggests remedial legislation for giving the states a wise forest policy, etc. The service. The service co-operates with private owners by sending its experts to examine timber tracts and protecting them. The cost of such was a considered an examination is borne by the owner. During 1910 examinations were made of timber tracts and reactions were made of timber tracts and regardance and protecting them. owner. During 1910 examinations wer timber tracts aggregating 323,000 acres.

BRANCH OF GRAZING.

The branch of grazing supervises the grazing of live stock upon the national forests, the principal lines of work being: The alloment of grazing privileges, the issuance of grazing permits, the division of the ranges between different classes of stock or their owners and the regulation of the stock grazed under permit upon the ranges, and the development of the forage-producing capacity of the national forests by the restoration of depleted areas through systematic control of the stock grazed upon them or by artificial means, through the eradication of noxious range-destroying rodents and through the institution of new methods of range control. By co-operation with federal and state authorities in the enforcement of quarantine regulations, the national forests have been and state authorities in the enforcement of quarantine regulations, the national forests have been practically freed from infectious or contagious diseases fatal to live stock, and by an active campaign against predaceous animals destructive to live stock the annual loss from this source within the national forests has been reduced by several hundred thousand dollars.

bundred thousand dollars.

The number of stock grazed during the last season (1910), under permit and by settlers without permit, was approximately 1.500,000 head of cattle, horses and swine and 7.500,000 head of sheep and goats. The annual productive value of this number of stock is more than \$20,000,000. The number of persons holding permits to graze live stock during the last year was in excess of 25,000.

BRANCH OF PRODUCTS.

The branch of products carries on studies, tests and demonstrations to further the more complete utilization of the products of the forest. A forest products laboratory is operated at the University of Wisconsin, where experiments are made to determine the properties of American woods, to ascertain cheap and effective treatments to prevent decay, to test the adaptability of untried woods for specific uses such as paper pulp, to develop uses for the material wasted in sawmill operations and to discover processes of obtaining valuable chemical by-products from the waste which cannot be otherwise utilized. An office of wood utilization is maintained at Chicago to promote the economic use of wood among the timber-consuming industries. Studies are made to find the kind, quantity and cost of timber consumed in different states and regions and also where the material The branch of products carries on studies, tests quantity and cost of timber consumed in different states and regions and also where the material comes from and what amount is lost through waste. The wood-consuming industries are aided in finding the most suitable raw material and in developing methods of utilizing their waste prod-uct. In the western states all products work cen-ters in the district offices at Denver, San Francisco and Pertland.

DENDROLOGICAL STUDIES.

DENDROLOGICAL STUDIES.

An important part of the dendrological studies which are carried on by the service is the making of an accurate forest map of the distribution of tree species in the United States, to show the extent, composition and economic possibilities of our forest resources. Others of these studies concern the cedar forests of Texas and important but little known trees indigenous to the United States, the growth of which may profitably extend to new localities for economic purposes. Prominent among the latter are the desert pines of California. An

investigation is being made of the present and probable future supply of western tanbark oak, as well as of other trees the barks of which are used to adulterate tanbark, and the tannin contents of the barks are being determined by the bureau of chemistry. Included also is a study of basket willows. Attention is given especially to the conditions under which high-grade basket rods may be produced. Approved basket willow cuttings are distributed free each spring to applicants interested in willow culture.

The dendrologist also gives technical information about trees, in response to inquiries, including the identification of the wood, seeds, foliage, etc., of native and exotic trees.

native and exotic trees.

native and exotic trees.

New York has purchased and set aside 1,600,000 acres in the Adirondack and Catskill mountains as forest preserves, under the control of the forest, fish and game commission of the state. These lands and private lands in the preserve counties are protected from fire by an adequate system of wardens. Unfortunately, the constitution of the state prohibits the cutting of timber from state lands. In 1909 the commission distributed at cost to private owners 1,005,325 forest tree seedlings and the waste and open land on the preserve is being gradually planted to trees under the supervision of trained foresters.

Pennsylvania has purchased more than 920,000

vision of trained foresters.

Pennsylvania has purchased more than \$20,000 acres of land for state forest reserves, and the forestry commission has the right to purchase additional forest lands at a price not to exceed \$5 an acre. The reserves are situated chiefly on the mountains of the central part of the state and located with special reference to protecting the water supply of cities and towns. The state forest reserves are not only protected from fire, but are managed according to forestry principles, the mature timber being cut and sold. A school for training forest rangers for the reserves is maintained at Mont Alto. There is a well-organized forest free protective system in the state. The state distributes forest trees for planting and gives advice in the management of forest lands to private owners.

in the management of forest lands to private owners.

Minnesota, Wisconsin and Michigan have well-crganized state forest departments. They have large state forest reserves, exceeding 200,000 acres for each state, which are protected from fire and on which the open land is being planted and the mature timber cut and sold. Each of these states protects the forest land of private owners as well as that of the state forest reserves from fire and distributes tree seedlings for planting to land owners at cost. Ohio, New Hampshire and Vermont also distribute planting material to private owners and give them advice in regard to methods of forest management. The following states have forestmanagement. The following states have forestmanagement. The following states have forestmanagement on organized warden system all or the greater portion of the forest lands of the state: Maine, New Hampshire, Vermont, Massachusetts, Connecticut, New Jersey, Maryland, Oregon and California, while Washington and Idaho provide for such protection through legal associations of land owners. Maine supports a very efficient forest fire service covering the unorganized fownships in the northern part of the state. In the remaining townships the selectmen are exofficion wardens. Most of these states also have small state forests, that of New Jersey being 14,000 acres. Other states which have forest officers charged with forest interests are Rhode Island. Insmall state forests, that of New Jersey being 14,000 acres. Other states which have forest officers charged with forest interests are Rhode Island, Indiana, Kansas, Montana, North Carolina and West Virginia. South Carolina, Alabama and Louisiana have recently passed or have under consideration advanced forestry legislation. The recently adopted law of Louisiana is especially noteworthy in that it provides for a forest fire protective organization by means of a tax of % of a cent on every 1,000 board feet of lumber sawed in the state.

CONSERVATION OF THE NATIONAL RESOURCES.

NATIONAL CONSERVATION ASSOCIATION. The National Conservation association, with head-uarters in the Colorado building, Washington, quarters in the Colorado building, Washington, D. C., is now the organized head of the conservation movement in the United States. The association came into existence because of an urgent need for an organization open to every man and woman who stood for conservation, which would give them immediate opportunity for united and effective work

work.
On July 29, 1509, the first step was taken. A group of the men who had led in the fight for conservation met and organized the National Conservation association. Dr. Charles W. Eliot. president emeritus of Harvard university, was made president of the association. Soon after Giltord Pinchot was removed from the government service by President Taft. Dr. Eliot presented his resignation and nominated Mr. Pinchot as his successor. Mr. Pinchot's election as president of the National

nation and nominated Mr. Pinchot as his successor. Mr. Pinchot's election as president of the National Conservation association followed, the honorary presidency being accepted by Dr. Eliot.

In a booklet explaining the objects of the association is the following:

"The National Conservation association is fighting for the prompt and orderly development of our natural resources, for the welfare of ourselves and our children, and for the rights of the plain people. The association is bound neither by political considerations nor official connections. It is free to speak the whole truth.

speak the whole truth.
"That conservation means the use of our natural "That conservation means the use of our natural resources for the benefit of us all and not merely for the profit of a few is already household knowledge. The task which the National Conservation association has set itself is to get this principle put into practical effect."

During the 61st congress, second session, the principles for which the association stood were enacted into law in a considerable number of cases and are represented in many bills still awaiting action.

Early in the second session Senator Knute Nelson introduced nine conservation bills drafted in

the interior department. For five of these bills substitutes, embodying conservation principles, were prepared by the association, covering all important phases of the conservation programme of the administration. These were introduced by Representative Gronna of North Dakota and are before congress for consideration. The substitute for the withdrawal bill suggested by the association was enacted into law with amendments. The three remaining conservation bills proposed by the administration, which were of relatively small importance, were passed in a form different from that in which they were introduced, and one of them in greatly improved form. The act for issuing \$20,000,000 of bonds to hasten the completion of reclamation projects was advocated by the administration. istration.

The association is maintained by annual dues from membership, which is divided into the fol-

association is as follows:
Gifford Pinchot, president, Washington, D. C.
Charles W. Eliot, honorary president, Cambridge, Mass

Walter L. Fisher, vice-president, Chicago, Ill. Thomas R. Shipp, secretary, Washington, D. C. Overton W. Price, treasurer, Washington, D. C. Philip P. Wells, counsel, Washington, D. C. JOINT COMMITTEE ON CONSERVATION.

An amendment to the sundry civil bill, proposed by Representative James A. Tawney of Minnesota, prohibited the national conservation commission from going on with its work under the government, although the commission itself, at the wish of President Taft, continued in existence. Accordingly the joint committee on conservation took up the work of co-operation among the state

conservation commissions and the conservation committees of large national organizations. In February, 1910, this committee was consolidated with the National Conservation association.

NATIONAL CONSERVATION CONGRESS.

The second national conservation congress was held in St. Paul. Minn. Sept. 5-8, 1910. Addresses were made by President Taft. Former President Roosevelt, Gifford Pinchot and many others. The keynote of Mr. Taft's speech was that deed should take the place of words. 'The time has come,' he said, 'for a halt in general rhapsodies over conservation, making the word mean every known good in the world. Such appeals are of doubtful utility and do not direct the public to the specific course that should be taken. Real conservation involves wise, nonwasteful use in the present generation, with every possible means of preservation for succeeding generations. * * I am fully convinced that the only course for me to pursue is to hold fast to the limitations of the constitution and to regard as sacred the powers of the states.' The second national conservation congress was

states."

Mr. Roosevelt maintained that the outcry against the supposed violation of the rights of the various states was raised by those who feared the power of the government would stop the grabbing of resources and who knew the states were impotent oact in the majority of cases.

Resolutions were adopted by the congress declaring that the natural resources should be developed, used and conserved in ways consistent both with

current welfare and with the perpetuity of the people. The reclamation service of the federal government and the continuation of the national forests by it were approved. Co-operation between state and federal agencies in the control of water resources and the prompt adoption of a com-prehensive plan for developing navigation through-out the rivers and lakes, proceeding in the order of their magnitude and commercial importance, were urged.

Henry W. Wallace of Des Molnes, Iowa, was chosen president and Dr. Austin Latchaw of Kansas City, Mo., treasurer. Thomas Shipp was reelected secretary.

AND AND WATER-POWER CONSERVATION. In a special message to congress Jan. 14, 1910, President Taft made the following recommenda-

That public lands be classified according to their

principal value or use.

That the control of water-power sites be invested in the government to insure competition and reasonable prices.

That bonds to the amount of \$30,000,000 be issued to complete irrigation projects already under way.

That acts be passed to validate action taken by the interior department regarding the disposition

of timter lands.

That steps be taken to improve the inland waterways, beginning with the completion of a nine-foct channel in the Ohio river between Pittsburg and Cairc.

THE PINCHOT-BALLINGER CONTROVERSY.

By direction of President Taft, Gifford Pinchot, chief forester of the United States, was summarily discharged from his office by Secretary Wilson of the agricultural department, Jan. 7, 1909. The immediate cause of the action was a letter written by Mr. Pinchot to Senator Jonathan P. Dolliver of Iowa and read by him in the senate Jan. 6. In this letter the forester, by inference, criticised the president for removing L. R. Glavis from the public land office for his conduct in regard to the Cunningham coal land cases in Alaska, admitting that two of the writer's subordinates, Overton W. Price, assistant forester, and Alexander Shaw, assistant law officer, had assisted Glavis in prearing the published charges against the secretary By direction of President Taft, Gifford Pinchot, Price, assistant forester, and Alexander Shaw, assistant law officer, had assisted (lawis in preparing the published charges against the secretary of the interior, Richard A. Baillinger. The letter further declared that the action of Price and Shaw was improper, but hat he considered the reprimand which he had administered was sufficient punishment in view of the peculiar value of their services to the government.

In a letter to Mr. Pinchot notifying him of his dismissal, President Taft declared: "Your letter was in effect an improper appeal to congress and the public to excuse in advance the guilt of your

dismissal. President Taft declared: "Your letter was in effect an improper appeal to congress an the public to excase in advance the guilt of your subordinates before I could act, and against my decision in the Glavis case before the whole evidence on which that was based could be considered. * * By your own conduct you have destroyed your usefulness as a helpful subordinate of the government, and it therefore now becomes my duty to direct the secretary of agriculture to remove you from your office as the forester."

The trouble between Mr. Pinchot and Mr. Balinger began shortly after the latter had been appointed secretary of the interior. While James R. Garfield held that office Mr. Pinchot recommended to the department the withdrawal as ranger sites of small tracts in the public domain outside of the forest reserves with the idea of preserving the national domain from monopolistic exploitation. This policy was approved by Mr. Garfield, but when Mr. Ballinger became secretary he refused to approve the withdrawal of certain hands in Washington and Oregon on the ground that such action would be adding to the forest reserves in those states, thus usurping a power exclusively vested in congress. In this position he was sustained by Attorney-General Wickersham. Mr. Ballinger also restored to entry thousands of acres which Secretary Garfield had withdrawn under what he considered the supervisory authority of the secretary of the interior. Mr. Ballinger denied that such authority existed. thority existed.

The Cunningham claims, near Katalla, Alaska, covered thirty-three coal entries, comprising 5,280 acres, said by experts to contain more than 63,000,000 long tons of coal besides valuable timber and water power. These claims had been under investigation in 1907 and Special Agent H. T. Jones had reported that in his opinion the entries had been fraudulently made in the interest of the Gugenheim mining syndicate. L. R. Glavis, chief of the field division of the land office in Seattle, who had investigated the claims, learned in January, 1908, that they had been clear listed for patent. He made a protest and the clear listing was suspended while he continued his investigation. Mr. Ballinger was at this time commissioner of the general land office and on March 3, 1908, he urged a committee of the house of representatives to pass a bill introduced by Delegate Cale of Alaska pecuniting the consolidation of the entries. This bill, amended at the suggestion of Seccetary Garfield so as to provide for the consolidation of claims entered by locators solely in their own interest and not as the agents of others, became a law Hallagon restrated as complisations of the restrated as complisations of the restrated as a complisation of others, became a law Hallagon restrated as complisations of the restrated as complisations and the restrated as a complisation of The Cunningham claims, near Katalla,

their own interest and not as the agents of others, became a law.

When Mr. Ballinger resigned as commissioner of the general land office he became attorney for the Cunninglam claimants in this case and filed a brief on their behalf, though it was asserted that in doing so he violated the federal statute prohibiting any officer or employe of the government from acting as attorney in the prosecution of any claim pending in the department with which he was connected within two years after such officer or employe left the government service. In March, 1909, when Mr. Ballinger entered the Taft cabinate, he gave up his connection with the Cunningham cases and turned them over to Assistant Sectedary Pierce for decision. In May, 1909, the latter decided in favor of the Cunninghams, but June 12 the decision was overruled by Attorney-General Wickshotz and the sections of the Cunningham the section of the Cunninghams. the decision was overruled by Attorney-General Wickersham. The Cunninghams then fell back upon the old law and the land office ordered Glavis to hurry his investigations. Glavis was later on replaced by his investigations. Glavis was later on replaced by Special Land Agent Sheridan, who indorsed the application for a postponement of the trial of the Cunnincham cases. The foresty office, at the request of Glavis, had begun an investigation of the whole matter, as the Cunningham group of claims was included in the Chugach national forest reserve. Law Officer Shaw and Assistant Forester Price went to the general land office July 22 and asked to see the record in the cases. Permission was refused at first, but was later granted. The dispute between Glavis and the forestry office on

the one hand and Secretary Ballinger on the other became acute and was finally hald before the pres-ident, then at his summer home at Beverly, Mass.

ident, then at his summer home at Beverly, Mass. Ballinger was sustained and, Sept. 13, Mr. Taft wrote a letter authorizing the discharge of Mr. Glavis from the government service.

Mr. Glavis after his dismissal, wrote a series of articles explaining his side of the controversy while Mr. Pinchot defended his part in the matter in a number of public speeches. Mr. Ballinger demanded a congressional investigation and Jan. 5, 1910, a Joint resolution was introduced for that purpose. It was passed in the house Jan. 7, but with a proviso that the members of the committee should not be appointed by Speaker Cannon, but should be elected. The amendment was carried by the combined vote of twenty-six "insurgent" republicans and 123 democrats, on the plea that it would prevent the appointment of a "whitewashing" committee. The joint resolution was adopted by the senate Jan. 10, with some changes requiring consideration by conference committees of each house. The joint resolution as modified in ing consideration by contribute committees of each house. The joint resolution as modified in conference was finally adopted by the senate Jan. 17 and by the house Jan 18. Under its terms the following committee of investigation was chosen, the senators being appointed by the vice-president and the representatives elected after being named in

the representatives elected after being named in party caucuses:
Senators—Knute Nelson, Rep., Minnesota, chairman; Frank P. Flint, Rep., California; George Sutherland, Rep., Utal; Elilu Koot, Rep., New York; Duncan U. Fletcher, Dem., Florida; William E. Purcell, Dem., North Dakota.
Representatives—Samuel McCall, Rep., Massachusetts; Martin E. Olmsted, Rep., Pennsylvania; Edwin Denby, Rep., Michigan; Edmond H. Madison, Rep., Kansas; James M. Graham, Dem., Illinois; Ollie M. James, Dem., Kentucky.
The inquiry began Jan. 26 and ended May 20. Testimony was given by Louis R. Glavis, Secretary Ballinger, Secretary James Wilson, Gifford Pinchot, F. M. Kerby and ot ters. The committee took the case under advisement and a meeting was later called for Sept. 5 in St. Paul, Minn. The

meeting was held there Sept. 7 and another Sept. 9, but the chairman, Senator Nelson, found that no quorum was present. The democratic members no quorum was present. The democratic members of the committee, however, adopted and published a report in which the charges made by Pinchot and Glavis against Secretary Ballinger were sustained in every particular. Mr. Ballinger was found to have betrayed his official trust in conspiring with land grabbers and to have been guilty of duplicity toward President Taft. The report concluded

of duplicity toward Freshuent Lail. The report concluded:

"That Richard A. Ballinger has not been true to the trust reposed in him as secretary of the interior, that he is not deserving of public confidence and that he should be requested by the proper authorities to resign his office."

This report was signed by Senators Fletcher and Purcell and Representatives James and Graham. Congressman Madison of Kanass made a separate report, but substantially the same in effect. He found that Mr. Ballinger was not a faithful trustee of the people's interests and recommended his dismissal from office.

Senators Nelson, Sutherland and Root and Representatives McCall, Olmsted and Deuby met in Chicago Sept. 13, and after a brief conference issued a statement to the effect that the pretended adoption of a report by a political minority and its publication as if it were the report of the committee exhibited a willingness to sacrifice the rights and injure the reputation of the officers investigated a crafter to obtain, a supposed political advantage in and injure the reputation of the officers investigated in order to obtain a supposed political advantage in the pending political campaign. "The report of the committee," the statement continued, "cannot be made until Dec, 5, when congress meets, and the meeting called for Sept. 5 was for the purpose of considering and discussing what the report to be made three months thereafter should be. There was, therefore, no haste or pressure for time. The action of the democratic minority in taking advantage of the delay of some members in reaching the meeting was an effort to substitute a prearranged scheme for the orderly deliberation and discussion which the duty of the committee requires," and injure the reputation of the officers investigated

REPORT OF NATIONAL WATERWAYS COMMISSION.

The national waterways commission created by congress in 1969 made its preliminary report Jan. 24, 1910, giving the results of its investigations and studies both in the United States and in Europe. Among the conclusions reached were the rope. Am

following:

The most important factor in the decrease of water-borne trailic in the United States alongside of and contemporaneously with the great increase in railway traffic is due to the relations existing between these two great agencies for transportation. The most essential requirement for the rehabilitation of water traffic is, in the opinion of the commission, the establishment of harmonious relations between railway and water lines. It is quite as important that there should be co-operation between them as that greater depth of channels should be secured. Where such co-operation can be secured, or sultable railroad cervice does not exist, the commission would recommend the improvement the commission would recommend the improvement of waterways which, on expert examination, are found to be of economic value as a means for transportation.

Canals adapted for seagoing ships are only profitable when they connect navigable waters located near each other, cuch as the Soult Ste. Marle canal; when they save a great salling distance, as in the case of the Suez and Panama canals, or when they councet large cities near the coast with the ocean, as in the case of the Manchester canal.

canal.

The commission regards the present law, providing for preliminary styps before the adoption of projects for improvement, as well adapted to secure the best results. This requires, after legislation by congress, that there shall be a preliminary examination and then a detailed survey by the engineer corps of the army and consideration by a board of review before a plan is adopted.

The commission finds that in the development of waterways on a large scale the decided tendency in other countries is toward a degree of particlcanal.

pation by communities and localities especially benefited and 's of the opinion that in order to obtain the best results this policy must ultimately be adopted in our own country. Terminal facilities should, at least, be provided by the communities immediately benefited. The commission would recommend that where an equitable division so possible uniform rules be observed for a proper division of the cost between the federal government and minor political divisions.

It is desirable that whenever navigation is improved careful attention be given to such associated objects as bank protection, flood and drought prevention, irrigation and drainage, but it should always be borne in mind that waterway improvements made by the federal government should be restricted to navigation.

restricted to navigation.

The commission recommends the continuance of

restricted to navigation.

The commission recommends the continuance of the progressive policy which has been adopted relating to harbors, but it would advise a division of harbors into classes by depth or by the importance of their ocean or coastwise traffic. The commission is unwilling to recommend the construction of wharves and docks by the government. The commission strongly recommends the greatest care in the conservation of water power for the use of the people. The control of the federal government over navigable streams has to do with navigation only, and in the exercise of this jurisdiction the plan commends itself to the commission of inserting in each grant or franchise under which the consent to construct a dam is given a condition that the grantee who constructs the dam must also, whenever necessary to subserve the interests of navigation, construct a lock suited to the locality and to the probable development of traffic, and also furnish power for the proper operation of the lock or locks. Whenever the government constructs dams for purposes of navigation or irrigation, and, as an incident thereto, water power is developed, such power should be utilized and an adequate charge be made therefor.

The commission found little that was new in European methods of improving rivers or in constructing locks and dams. In general it approves of the methods heretofore in use in the United States.

NATIONAL WATERWAYS COMMISSION. Created by act of congress March 3, 1909.

Senate—Tacodore E. Burton, Ohio, chairman; Jacob H. Gallinger, New Hampshire, vice-chairman; Samuel H. Piles, Washington; William Alden

Smith, Michigan; F. M. Simmons, North Carolina; James P. Clarke, Arkansas; William Lorimer, Illinois.

LAKES-TO-GULF DEEP-WATERWAY PROJECT.

ACTION BY ILLINOIS.

ACTION BY ILLINOIS.

Oct. 16, 1907, the legislature of Illinois passed a joint resolution providing for the submission to the electors of the stare of an amendment to the constitution permitting the general assembly to provide for the construction of a deep waterway from Lockport to Utlea and to authorize the issue of bonds to the amount of \$20,000,000 for this purpose. At the election of Nov. 3, 1908, the people approved the proposed amendment by a vote of 692,522 for to 195,177 against. At the regular session of the legislature in 1909 the waterway project was considered, but no agreement could be reached as to the question of going ahead immediately with the work or waiting for federal aid and no bill was passed. The matter was included in the list of subjects to be considered at the extra session of the legislature in the winter and spring of 1909-1910, but no action was taken.

ADVERSE REPORT BY ENGINEERS.

June 10, 1909, the special board appointed under authority of congress to investigate the feasibility of constructing a ship canal from the lakes to the Gulf of Mexico reported that a fourteen-foot channel could be built at a cost of \$159,000,000 and eighteen years of labor. It estimated that it would take \$128,000,000 to construct such a channel from St. Louis to the mouth of the Mississippi alone. The board reported against building such a channel, maintaining that pesent and prospective demands of commerce between Chicago and the gulf could be adequately met by a through channel ninc feet in depth.

At the fourth lakes-to-the-gulf deep-waterway convention, held in New Orleans, La., Oct. 30-Nov. 1, 1909. President Taft made a speech indorsing the improvement of the waterways of the country generally. He falled, however, to approve of the lakes-to-the-gulf project. In a special message to congress Jan. 14, 1910, he recommended that steps be taken to improve the inland waterways, beginning with the completion of a nine-foot channel in the Ohlo river, between Pittsburg and Cairo. June 10, 1909, the special board appointed under

LAKES-TO-THE-GULF DEEP-WATERWAY ASSOCIATION.

LENGTH IN FEET OF CERTAIN MILES.

From circular of hydrographic office, U. S. navy department.

In the United States the nautical mile or knot or length of 6.076.23 feet. The geographic mile, which see mile, used for the measurement of distances is the length of one minute of longitude of the in occan navigation, has a length of 6.080.27 feet; equator of the terrestrial spheroid, is 6.087.15 feet in England the nautical mile, corresponding to the long. The statute mile, used principally in measurable many and Austria the nautical or see mile has a

AERONAUTICAL PROGRESS IN 1910.

The year 1910 was one of wonderful achievements in the conquest of the air. Records for sustained flight, speed, distance made and altitude reached were constantly being broken both by aeroplanes and dirigible balloons. Aviation meets and exhibitions increased in number and in the quality of the performances. America became almost as enthusiastic as Europe on the subject and many new names were added to the list of skilled airmen. Unfortunately casualities from accidents were many, but they did not have the effect of retarding progress in aviation or of discouraging men from continuing to experiment with flying machines. These were being gradually improved, though they were still far from being perfect as to reliability and safety. Below will be found accounts of some of the more remarkable performances of the year, with the latest available records on both sides of the Atlantic, a list of casualities and a chronological record of aeronautical events in 1910. The year 1910 was one of wonderful achievements

LONG-DISTANCE FLIGHTS. LONDON TO MANCHESTER.

Mr. Grahame-White, in a Farman aeroplane, left London. England, at 5:12 Saturday morning. April 23, 1910, in an attempt to win a prize of 350,000 offered by the Daily Mail for a flight from London to Manchester, a distance of 186 miles. Traveling at an average speed of forty miles an hour he reached Rugby, the first stopping place, at 8:30 o'clock. Resuming his journey he met with rough weather and the motor of his machine developed a defect, which compelled him to descend at Lichfield, 117 miles from London and 69 miles from Manchester. He decided to give up the attempt at this point on account of the bad weather.

attempt at this point on account of the bad weather.

Wednesday, April 27, M. Louis Paulhan, the Frerch aviator, who had entered for the Daily Mail prize a few days before, started from London at 5:20 p. m. in a Farman biplane and flew to Lichfield without a stop. It was then 8:10 o'clock and too dark for him to proceed farther. He started again at 4 o'clock the next morning and descended within the limits of Manchester at 5:32 a. m., thus winning the prize.

When Grahame-White heard of M. Paulhan's start Wednesday evening he started in his own machine at 6:30 o'clock, an hour and ten minutes later than his rival. He continued until he reached Roade, sixty miles from London, where he descended. He started again at 2:50 in the morning and at 4 o'clock was only some fifteen miles behind Paulhen, who had resumed his flight at that hour. Grahame-White proceeded until he reached Polesworth, 107 miles from London, when he had to descend. There, learning that the Frenchman had reached Manchester, he gave up the race. Pfulhan's average speed while in the air was 44.3 miles an hour and both he and Grahame-White flew at an average elevation of 200 feet. The wind was at right angles to the course and the weather was cold. was cold.

CROSSES CHANNEL TWICE.

Capt. Charles Stewart Rolls of the British army, driving a Wright aeroplane, crossed the English channel twice on the evening of June 2, 1910, without alighting. He made the round trip between Dover and Calais in 90 minutes, fiying most of the time at an elevation of about 1,000 feet. The distance between the two places is twenty-one miles, making the total overwater flight forty-two miles. two miles

ACROSS THE IRISH SEA.

ACROSS THE IRISH SEA.

Robert Loraine, an actor-aviator, crossed the Irish sea in an aeroplane Sept. 11, 1910, between Holyhead. Wales, and Howth hill, on the north side of Dublin bay, Ireland. The trip was marred by the breakdown of his motor at the finish of his trip. He had reached Howth hill, but found that he was too low to scale it and he had swung around to obtain a higher elevation when a wire broke and his machine fell into the sea sixty yards from land. Loraine, who wore a life belt, swam to the shore near the Bailey lighthouse. The distance covered by the aeroplane was about sixty miles. sixty miles,

FROM PARIS TO LONDON.

One of the most daring aviation feats of the year was the dight of John B. Molsant of Chicago from Paris to London, a distance of 301 miles. year was the dight of John B. Moisant of Chicago from Paris to London, a distance of 301 miles, with a mechanic as a passenger. He left Issy, a suburb of Paris, at 5:45 p. m. Aug. 16 in a Bileriot machine and arrived at Amiens, eighty-four niles distant, at 7:30 p. m. He stopped there over night and started at 5:10 the next morning (Aug. 17) for Calais, arriving at 7:15 a.m., the distance covered being 118 miles, At 10:48 a. m. he 10se again and though a rather strong wind on the other side of the channel, a tugloat following part of the way across. He landed at Deal, England, twenty-nine miles from Calais, at 11:15 a. m. and remained there until 4:56 a. m., Aug. 18, when he started for London, seventy miles away. An accident to the motor compelled him to descend at Rainham, four miles from Chatham and about wenty miles from London. In descending a propeller blade was broken and Moisant and his companion were compelled to wait until a duplicate blade could be secured. Aug. 20 and 22 he made attempts to cover the remaining distance to London, but gales of wind were encountered, and after several narrow escapes the aeronaut finally was forced to land so suddenly that his machine was placed out of commission for the time being. After thorough repairs had been made he resumed his flight Sept. 6 and landed at the Crystal palace in the evening. the evening.

FIRST FLIGHT ACROSS THE ALPS.

George Chavez, a Peruvian, crossed the Alps by seroplane for the first time Sept. 23, 1910. The daring feat resulted disastrously, as the aviator fell with his machine near Domodossola and sustained injuries from which he died Sept. 27. He was within thirty feet of the surface when one of the wings of his monoplane collapsed and the machine dropped with Chavez beneath. Both his legs were broken, his left thigh was fractured and he also sustained internal injuries. The start of the trip was made at Brig, on the Swiss side, and the route was over the Simplon pass at an altitude of nearly 7,000 feet. The objective point was Milan, Italy, the Italian Aviation society having offered a prize of \$20,000 to the aviator who should be the first to make the journey. The difficult and apparently the most dangerous part of the trip was over when the accident occurred and in view of this fact the society awarded \$10,000 to M. Chavez two days before he died.

FEENCH CROSS-COUNTEY RACE,

FRENCH CROSS-COUNTRY RACE,

FRENCH CROSS-COUNTRY RACE,

M. Le Blanc won a notable cross-country aeroplane race, which began at Issy, Paris, Aug. 7,
1910. and ended at the same place Aug. 17. The
distence of the circuit was approximately 485
miles and the prize was a purse of \$20,000 offered
by a Paris newspaper. Le Blanc, using a Bleriot
monoplane, covered the circuit in 11 hours 55 minutes and 55 seconds, actual flying time. M. Aubruwas second in 13:27:14. Several military aviators
acted as escorts. The route was from Issy to
Amiens, to Issy.

Chicago To Spenkoryha M.

CHICAGO TO SPRINGFIELD, ILL.

Walter R. Brookins won a prize of \$10,000 offered by The Chicago Record-Herald when he made a flight in a Wright biplane from Washington park. Chicago, to Springfield, Ill., Sept. 29, 1910. The start was made at 9:15 a. m., in the presence of a huge crowd of spectators. The weather was clear and moderately warm with the wind blowing from the fifteen miles an hour from the south. Fly. and moderately warm with the wind blowing from ten to fifteen miles an hour from the south. Flying east until he reached the Illinois Central railroad at Jackson park, the aviator turned and proceeded in a southwesterly direction along the line all the way to Springfield. A special train, with persons interested in the flight, including Wilbur Wright, the inventor, followed or preceded the acroplane. Brookins averaged something like thirty-three miles an hour, and as the train had to stop at many stations he had no difficulty in keeping abreast and at times ahead of it. He came down twice for cil—once at Gilman, after he had trav-

Digitized by GOOGLE

eled 74.76 miles without a halt, and then at Mount Pulaski, when he had completed another stretch of 87.85 miles. He arrived at Springfield at 4:25 p. m. and made a fine landing in the fair grounds, where a great throng of people were awaiting him.

During the flight an altitude varying from 1,000 to 2,500 feet was maintained, the aviator seeking to avoid the uncertain air currents near the ground. At all the cities and towns passed thousands of spectators had assembled, the schools in many cases being dismissed to give the pupils an opportunity to see an aeroplane for the first time. No accident of any kind, except the loss of one of the small wheels under the machine, occurred from start to finish of the flight. It was the best performance of the kind seen up to that time in America. The following table shows the mileage made, the time between the various points and the actual flying time:

		r	upsa.ı	r iy g

SPRINGFIELD TO ST. LOUIS.

Arch Hoxsey, in the same biplane used by Brookins in his flight from Chicago to Springfield, left Springfield at 11:55 a. m., Oct. 8, and, following the Chicago & Alton railway, flew across the country to St. Louis, Mo., crossing the Mississippi river near the mouth of the Missouri. He had difficulty in locating the landing place chosen for him and spent a long time searching for it. He landed at 5:11 p. m. and was then directed where to go. Though he remained in the air three hours and twenty-two minutes, the distance, not counting the time spent in the search for the landing place, was covered in 2 hours and 20 minutes. He flew at an altitude of between 600 and 1,200 feet.

ALBANY TO NEW YORK.

ALBANY TO NEW YORK.

Glenn H. Curtiss won a prize of \$10.000 offered by the New York World when he made an aeroplane flight from talbany to New York, Sunday, May 29, 1910. He made the distance of 137 miles in 2 hours and 32 minutes actual flying time, averaging 54.06 miles an hour. He started at 7:03 o'clock in the morning from Van Rensselaer island in the Hudson river, near Albany, and rising to a height of between 500 and 700 feet, steered for the south after having made a slight deviation to the west so as to cross the Albany city limits. Following the course of the river and above it nearly all the time, he flew steadily and so swiftly that a special train engaged for the purpose had great difficulty in keeping him in sight. Catskill was passed at 8:05 and Poughkeepsle at 8:26. He flew over the high bridge at that point and then descended into a meadow three miles farther on. Here he obtained a fresh supply of gasoline and oil, and after an hour's delay he resumed his journey. West Point was reached at 10:32, Yonkers at 10:32 and Inwood, Manhattan island, at 10:35. Inwood was the official landing place within the limits of Manhattan island, and he had thus won the prize. He remained there 1 hour and 7 minutes and then flew to Governor's island. The

only time on the whole journey when he came near a mishap was at Storm King, where his machine was struck by a sudden gust of wind, causing it to tilt and drop a short distance until he regained control. The aviator was at times more than 1,000 feet above the surface of the river.

NEW YORK TO PHILADELPHIA AND BACK.
Charles K. Hamilton, in a Curtiss aeroplane, left
Governor's island, New York, at 7:35 a. m., June
13, 1910, and alighted in aviation field at North
Penn Junction, Philadelphia, at 9:28 a. m., having
covered a distance of eighty-eight miles in 1 hour
nul 51 minutes without a stop. Starting on the
return trip at 11:30 a. m., he had flown approximatcly seventy miles when the spark plugs of his
motor fouled and he was compelled to descend in
a swamp near South Amboy, N. J., at 12:55 p. m.
The propeller was broken in making the landing,
but a new one was secured from Governor's island
and, resuming the flight at 6:20 p. m., Mr. Hamilton landed at the starting point at 6:39 p. m. The
actual flying time for the round trip of 176 miles
was 207 minutes, the average speed on the return
part of the journey being 54.96 miles an hour. The
aviator by this performance won a prize of \$10,000
offered by the New York Times and the Philadelphia Public Ledger for an aeroplane flight from
New York to Philadelphia and back within twentyfour hours. NEW YORK TO PHILADELPHIA AND BACK. four hours.

FAILURE OF CHICAGO-NEW YORK BACE. FAILURE OF CHICAGO-NEW YORK BACE.

The Chicago Evening Post and the New York Times offered a prize of \$30,000 for an aeroplane flight from Chicago to New York. A number of Curtiss machines were entered and some creditable preliminary work was done at the Hawthorne racerack at Chicago Oct. 1-8. Only one man made a start, however, and the "race" proved a fizzle Eugene Ely left Hawthorne Sunday afternoon, Oct. 9, but his engine broke down and he was forced to descend at Beverly Hills, only nine miles away. He started again on Monday, but after a number of mishaps was obliged to give up the race at East Chicago, some twenty miles from Hawthorne.

AVIATION MEETS.

LOS ANGELES.

The first aviation meet of 1910 took place near Los Angeles, Cal., Jan. 10-20. The principal contenders were Louis Paulhan of France, using Farman biplanes, and Glenn H. Curtiss, American, who used aeroplanes of the Wright type. Paulhan won all the cross-country, passenger-carrying, altitude and endurance tests, while Curtiss won the prizes for speed, quick starts and good landings. The Frenchman won \$15,000 in prizes and the American about \$5,000. Following were the principal records under pal records made:

pal records made:

Height—Louis Paullian, 4.165 feet, first; Charles K. Hamilton, 530.5 feet, second; Glenn H. Curtiss, no official height taken, third.

Endurance and time—Paullian, 75.77 miles, 1:58:32, first; Hamilton, 19 44 miles, 39:00\%, second; Curtiss, 16.11 miles, 24:54\%, third.

Speed (ten laps)—Curtiss, 16.11 miles, 24:34\%, first; Paulhan, 16.11 miles, 24:55\%, second; Hamilton, 16.11 miles, 30:34\%, third.

Speed (three laps with passenger)—Paulhan, 4.83 miles, 8:16\%; no others contested.

Slowest lap—Hamilton, 16:1 miles, 3:62\%, Quickest start—Curtiss, 98 feet, 6\% seconds.

Starting and landing in square—Charles F. Willard, won; score perfect.

Cross-country flight—Paulhan, 47\% miles.

Cross-country flight-Paulhan, 471/2 miles.

HARVARD-BOSTON.

The Harvard Aeronautical society gave a successful aviation meet on its own field in the outskirts of Boston. Sept. 3-13, 1910. Prizes amounting to \$40,650 were given for professional events and about \$8,000 in cups for amateur competitions. Claude Grahame-White of England won \$22,000; Ralph Johnstone, \$5,000; Walter R. Brookins, 42,500; Glenn H. Curtiss, \$2,000; Charles F. Willard, \$500; Clifford B. Harmon, \$7,500; W. Starling Burgess, \$250. Best records made at meet; Speed-3 laps in 6:01, over 1%-mile course, by Grahame-White. hame-White.

Altitude—4.732 ft. in one flight by Brookins. Duration—3:05:40 in air during one flight by Johnstone (American record).

Digitized by GOOGLE

Distance—101 miles 389 ft. in one flight by Johnstone (American record).

Getaway—26 ft. 11 in. from start by Grahame-

White. Accuracy—Stopped 5 ft. 4 in. from center after landing within 100-ft. circle by Johnstone (world's

record). Slow lap-3 laps in 13:48 over 1%-mile course by

Brookins. Bomb dropping-180 points on 81 hits by Grahame-

White.
Boston light course—34:01½, over thirty-three and a fraction miles over water, by Grahame-White. BELMONT PARK.

(Length of course, 5 kilometers, or 3.11 miles.) One of the most successful aviation meets of the year was held at Belmont park, New York, Oct. 22-31. Some of the best aviators in the world took part and the events were well contested. Following were the chief prize-winners:

Moleant (American Blerlot) 215 800

am, 19 laps in 54:36%; Grahame-White, 14 laps in 34:164%.
Oct. 26—Hourly distance event: Latham, 17 laps in 36:22%. Special altitude event: Hoxsey, 6,183 feet; Johnstone, 5,763 feet. Cross country, 20 miles; Aubrun; time, 28:08.7.
Oct. 27—Altitude event: Johnstone, 8,471 feet. Oct. 28—Hourly distance: Latham, 12 laps: time, 40:34.1 Hourly altitude: Hoxsey, 6,705 feet.
Oct. 29—International speed race for Gordon Bennett trophy; distance 100 kilometers (62.14 miles): Grahame-White, with 100-horse-power Bleriot, first, 1:01:04.744. Moisant, in 50-horse-power Bleriot, second, 1:57:44.85; Ogilvie, third, 2:06:38.69. Fastest lap of course 6 kilometers, or 3.11 miles); Le Blanc; time, 2:44.32.
Oct. 30—Statue of Liberty flight, distance 36 miles, prize \$10,000: Won by John B. Moisant in 50-horse-power Bleriot, second, in 35:21.30.
Oct. 31—Aero club distance event (2 hours)—Won by Moisant, 56 laps; Latham, second, 35 laps. Special altitude event: Won by Ralph Johnstone, 9,714 feet (world's record). Grand speed contest (10 laps): Won by Grahame-White in 14:34%.

14:34%.

RECORDS FOR HEIGHT.

RECORDS FOR HEIGHT.

The records for altitude reached by aeroplane were repeatedly broken in 1910 until a height of nearly two miles above sea level was reached. Jan. 7, at Mourmelon, France, Hubert Latham rose to a height of 3.500 feet, using a monoplane. June 13, at Indianapolis, Ind., Walter R. Brookins, in a Wright biplane, attained an altitude of 4.384½ feet. July 9, at Atlantic City, N. J., the same aviator ascended 6.175 feet, part of the flight being over the occan. The greater part of the descent was made in a series of circular glides, the engine having stopped for lack of fuel. Aug. 29, at Havre, France. Leon Morane reached a height of 7.054 feet in a monoplane, and Sept. 3, at Deauville, France, he made a record of 8.471 feet. This was excelled Sept. 8, near Paris, by George Chavez, a Peruvian aviator, who went 8,792 feet up in the air in a monoplane.

a Peruvian aviator, who went 8,792 feet up in the air in a monoplane.

Oct. 1, at Mourmelon, France, M. Wynmalen, a comparatively unknown aviator, again broke the world's record for height by ascending to an altitude of 9,121 feet. He suffered severely from the cold and the carburetor of the engine was frozen, crippling the power of the machine. He rose in a spiral course until his engine stopped, when he was forced to descend.

Oct 31 at Belmont park New York, Ralph John-

Oct. 31, at Belmont park, New York, Ralph Johnstone, in a "baby" Wright roadster, 35 horse pow-

er, attained a height of 9,714 feet, thus exceeding Wynmalen's record by 593 feet. The aviator found it exceedingly cold at a height of nearly two miles, but the daring feat was accomplished with-

out any mishap.

Nov. 23. at Philadelphia, J. A. Drexel, in a Bleriot machine, rose to a height of 9,970 feet.

LONGEST SUSTAINED FLIGHTS.

July 10, M. Olieslagers, a Belgian aviator, made a distance of 393 kilometers, or 244.14 miles, in 5 hours 3 minutes 5 seconds at Rheims, France, us-ing a monoplane. This record was surpassed Oct. ing a monoplane. This record was surpassed Oct.
28 by Maurice Tabuteau, who remained in the air six hours and covered a distance of 298 miles at the aerodrome in Etampes, France. He was competing for the Michelin cup and used a Farman biplane.

FATAL ACCIDENTS IN 1910.

FATAL ACCIDENTS IN 191
Jan. 4—Leon Delagrange, France.
April 2—Hubert Le Blon, Spain.
May 13—Chauvette Michelin, France.
June 2—M. Zosily, Hungary.
June 17—Eugene Speyer, California.
June 18—Herr Robi, Germany.

Oct. 27—Lleut. Saglietti, Italy.
Nov. 17—Ralph Johnstone, Denver, Col.

CHRONOLOGICAL RECORD (1910).

an. 4-Leon Delagrange, noted French aeronaut, killed while making flight at Bordeaux, France. Jan. 7—Hubert Latham reaches a height of 3,500 feet in an Antoinette monoplane at Mourmelon, France.

Jan. 10-20-Aviation contests held at Los Angeles.

Jan. 11—Glern H. Curtiss, at Los Angeles, rises in 98 feet in 6% seconds; quickest start on record. Jan. 12—Louis Paulhan, at Los Angeles, attains an altitude of 4,165 feet in a Farman biplane. Jan. 13—Paulhan, at Los Angeles, makes first flight on record with two passengers; uses Far-

flight on record with two passengers; uses Farman biplane.

Jan. 18—Paulhan makes cross-country flight at Los Angeles of forty-seven and one-half miles in 1 hour 2 minutes 42% seconds.

Feb. 10—Langley medal of the Smithsonian institution presented to the Wright brothers in Washington, D. C.

March 4—Henry Farman, at Mourmelon, France, with two passengers, files fourteen miles in 16 minutes 35 seconds; uses new biplane, with monoplane total.

plane tail.

March 12—Lieut. L. B. Foulois, in a Wright aero-plane, at Fort Sam Houston, Tex., breaks the world's starting record by rising in 55 feet. April 2—Hubert Le Blon, a French aeroplanist, killed while making exhibition flight at San Se-

hastian. Spain.

April 8-Daniel Kinet with passenger remains in air 2 hours and 20 minute at Chalons-sur-Marne, France.

April 17—Henr! Farman carries a passenger in his aeroplane a distance of forty miles from Etampes to Orleans, France.

to Orleans, France.
April 17—Balloon Delitsch struck by lightning at
Bitterfeld, Germany, and four occupants killed.
April 20—Roger Sommer makes a flight of 5
minutes with four passengers on aeroplane at
Charleville, France.
April 22—Grahame-White falls in attempt to win
\$50.000 prize by flying in biplane from London to
Manchester, a distance of 186 miles.

Digitized by GOOGLE

April 27-28—Louir Paulhan flies in aeroplane from London to Manchester in 12 hours 10 minutes with one stop, winning \$50,000; made 117 miles before landing; total distance, 186 miles. May 13—Chauvetto Michelin killed at aviation meeting at Lyons, France, by running into derrick

mg at Lyons, France, by running into detrick with his monoplant. E. Honeywell left St. Louis, Mo., May 19 in balloon Centennial and landed at Shiloh, Mich., May 20, after passing over lilinois, part of Wisconsin and Lake Michigan; distance,

450 miles.

May 21—Jacques de Lesseps files across English channel in a Bleriot monoplane from Calais to Wanston Court farm near Dover; time, 25 minutes.

May 29—Glenn H. Cuctiss files from Albany to New York city in an aeroplane; distance, 137 miles; time, 7 hours 32 minutes; average speed, 54.06 miles an hour; stops made, 1.

June 2—Capt. Charles Stewart Rolls, in a Wright aeroplane, files from Dover, England, to Calais, France, and heek early without allichting. In 38

France, and back again without alighting, in 90 minutes.

June 2—Zosily, Hungarian aviator, killed at Budapest by falling with aeroplane from considerable height.

Jun: 9—Officers Marconnet and Feguant of French army aviation corps fly from Chalons-sur-Marne to Paris, 106.5 miles, in 2 hours 50 minutes, with-

to Paris, 10to. miles, in 2 none or minutes, when out a stop.

June 13—Charles K. Hamilton files from New York to Philadelphia and back, covering 176 miles in 201 minutes, actual flying time; makes two stops. June 13—In an aviation meet at Indianapolis, Ind., Walter Brookins, in a Wright aeroplane, attains a height of 4,384½ feet, thus breaking the world's

record.
June 17—Walter Brookins, in a Wright aeroplane, again breaks the altitude record by ascending 4.503 feet at Indianapolis, Ind.
June 17—Eugene Speyer killed at San Francisco, Cal., while experimenting with aeroplane glider.
June 18—Herr Robi killed at Stettin, Germany, by failing 250 feet with Farman biplane.
June 23—Capt. S. F. Cody severely injured while making an aeroplane flight at Aldershot, England; falls 100 feet.

land; falls 100 feet.

June 28—Zeppelin airship, Deutschland, with thirtythree passengers, wrecked in gule of wind near
Dusseldorf, Germany; no one injured.

July 3—Charles Wachter killed by falling with
menoplane 500 feet at Rhelms, France.

July 5—M. Le Blanc, in a Bieriot monoplane at
Rhelms, France, files 100 kilometers (62 miles) in
1:16:11. M. Morane, also in Bieriot machine, files
20 kilometers (12.40 miles) in 13:08.

July 7—M. Olleslagers, at Rhelms, France, remains in air 3 hours 45 seconds, covering distance
of 155 miles.

of 155 miles.

July 8—Baroness de la Roche seriously injured by falling with a Voison aeroplane from a height of 150 fect at Rheims, France.

July 9—Walter Brookins, in a Wright biplane, reaches a height of 6,175 fect above sea level at Atlantic City, N. J., breaking the world's

July 9-Leon Morane, in a Bleriot monoplane, files

July 9—Leon Morane, in a Bleriot monoplane, files 5 kilometers (3.10 miles) in 2:56 and 10 kilometers (6.20 miles) in 2:56 and 10 kilometers (6.20 miles) in 5:47, at Rhelms, France.

July 9—M. Labouchere files 340 kilometers (211.14 miles) in 4:37:46 at Rhelms, France.

July 9—M. Mamet, with two passengers, files 57.59 miles at Rhelms, France.

July 10—Olleslagers, in a monoplane, files 393 kilometers (244.14 miles) in 5:03:05 at Rhelms, France.

July 10—Leon Morane, at Rhelms, France, files 5 kilometers (3.10 miles) in 2:48 and 10 kilometers (6.20 miles) in 5:42; average speed in 5 kilometer (fight, 68.42 miles an hour.

July 10—Daniel Kinet fatally injured in fall of his aeroplane at Ghent, Belgium, through breaking of rudder; died July 15.

July 11—Glenn Curtiss files fifty miles in 1:14:59 at Atlantic City, N. J.

July 11—Gienn Curtuss mes mry mines in 1.71.05 at Atlantic City. N. J.
July 12—The Hon. Charles Stewart Rolls. wellknown English aviator and sportsman, killed by
fall while fiying with Wright aeroplane at Bournemouth, England.
July 12—Howard W. Gill severely injured by fall
of 100 feet with aeroplane at East St. Louis, Ill.

July 13—Oscar Erbsloch and four other men killed at Leichlingen, Prussia, by collapse of dirigible balloon, Erbsloch.
July 17—Robert Svendsen flies in an aeroplane across the sound between Copenhagen, Denmark, and Malmo, Sweden, a distance of fourteen miles, in 37 minutes.
July 20—While making a cross-country flight near Barcelons, Spain, Aviator Ehrmann's aeroplane is struck by lightning and falls to ground; Ehrmann escues indury.

Barcelona, Spain, Aviator Ehrmann's aeroplane is struck by lightning and falls to ground; Ehrmann escapes injury.

Aug. 1-Mme Franc seriously hurt at Sunderland, England, her Farman biplane colliding with a flagpole and dropping twenty-five feet.

Aug. 3-Nicholas Kheet, Beigian aviator, killed by a fall of 600 feet at Brussels.

Aug. 3-Dr. H. Walden seriously injured at Garden City, L. I., while testing a monoplane; falls from a height of fifty feet.

Aug. 11-J. Armstrong Drexel, American, attains a height of 6,750 feet in an aeroplane flight at Lanark, Scotland.

Aug. 12-M. Lesnyn, Belgian, falls with aeroplane from beight of 100 feet and is severely injured. Aug. 12-James Radley, an English aviator, files a mile at Lanark, Scotland, in 47% seconds, in a Bieriot monoplane.

Aug. 16-17-John B. Moisant of Chicago, with a passenger, files from Paris to Deal, England, in a Bieriot machine; Aug 18, reaches Rainham, where he is forced to descend by an accident; Aug. 20-Lieut, Vivaldi of the Italian army is killed by a fall in an aeroplane a few miles from Bome, Italy.

Aug. 20-Clifford B. Harmon wins a \$2,000 cup by flying from Garden City, L. I., across the sound to Greenwich, Conn., a distance of ten miles in

Aug. 20—Clifford B. Harmon wins a \$2,000 cup by flying from Garden City, L. I., across the sound to Greenwich. Conn., a distance of ten miles in 35 minutes; Farman biplane used.

Aug. 27—Van Mansdyk, Dutch aviator, killed by falling with aeroplane near Arnheim, Holland. Aug. 27—M. Le Gagneux, French aviator, has skull fractured when his aeroplane strikes post near

Havre, France.
ug. 29—Leon Morane, French aviator, reaches a
height of 7,054 feet in a monoplane at Havre,

Reight of 7,054 feet in a monoplane at Havre, Prance.

Aug. 31—Glenn H. Curtiss establishes new record for overwater flights by traveling in aeropiane over Lake Erie from Euclid beach, near Cleveland, O., to Cedar Point, O., a distance of approximately sixty miles.

Sept. 1—Glenn H. Gritiss returns over course from Cedar Point to Euclid beach, making total distance traveled over Lake Erie 120 miles.

Sept. 3—M. Blelovucci ends flight from Parls to Bordeaux, France, a distance of 356 miles, making four stops; actual flying time, 7 hours 5 minutes 54 seconds.

Sept. 3—Leon Morane reaches height of 8,471 feet in monoplane flight at Deauville. France.

Sept. 8—George Chavez reaches height of 8,792 feet in a monoplane at Parls, France.

Sept. 9—Charles K. Hamilton seriously injured by fall of his biplane at Sacramento, Cal.

Sept. 1—Robert Loraine, actor-aviator, files across Irish channel from Holyhead to within sixty yards of Bailey lighthouse on Irish coast, when motor gives out and the machine falls into the sea; Loraine swims ashore; distance of flight, sixty miles.

Sept. 12—Ralph Johnstone, in a Wright biplane, at the Boston-Harvard aero meeting, remains in air 3 hours 4 minutes 44% seconds, cevering a distance of 97 miles 4,666 feet; both new American records; also made world's record for accuracy in landing.

Sept. 12—Claude Grahame-White flies from Bostonin landing

Sept. 12—Claude Grahame-White flies from Boston-Harvard aero field to Boston light and return twice, a distance of thirty-three miles, in 34

twice, a distance of thirty-three miles, in 34 mirutes 1½ seconds.

Sept. 14-Dirigible balloon Zeppelin VI. burned in Baden-Baden, Germany, through explosion of

m Dauen-Baden, Germany, through explosion of gasolire tank.
Sept. 23—George Chavez flies across the Alps in monoplane from Switzerland to Italy, following the Simplon pass; Chavez injured in alighting at Domodessola.

Sept. 25-Edmond Poillot, French aviator, killed at Chartres, France, by falling sixty feet with

aeroplane.
Digitized by GOOGIC

Sept. 27-George Chavez dies from injuries received

Sept. 27-George charts are the all the first and all the first are the Alps.

Sept. 27-28-Walter Brookins makes flights over the business section of Chicago.

Sept. 29—Aviator Flochman dies from injuries re-ceived in fall with aeroplane at Mulhausen, Germany.

Sept. 30—Walter Brookins files in Wright biplane from Chicago to Springfield, Ill., a distance of 187 miles, with only two stops, in 7 hours 9 minutes.

Oct. 1—Wynmalen files to a height of 9,121 feet at Mourmelon, France.
Oct. 1—Aviator Haas killed while competing in a distance race between Treves and Metz, Germany.

Oct. 1—Aviators Dickson and Thomas seriously injured in collision of aeroplanes at Milan, Italy. Oct. 4-M. Tabuteau files from San Sebastfan, Spain, to Biarritz, France, crossing the Pyrenees on the way.

Oct. 7—Capt. Matsievitch killed by falling with aeroplane from height of 1,640 feet at St. Peters-

burg, Russia.

Oct. 8—Arch Hoxsey, in a Wright biplane, flics from Springdeld, Ill. to the Country club grounds near the city of St. Louis, Mo., covering the distance of 104 miles without a stop; time, 2 hours 20 minutes.

Oct 9—Eugene Ely starts to fly from Chicago to New York in a Curtise biplane, but is com-pelled to descend near Beverly Hills, nine miles from the starting point. Oct. 11—Ely gives up attempt to fly to New York

after a series of mishaps; reaches East Chicago, about twenty miles from starting point. Oct. 11—Theodore Roosevelt rides as passenger with Arch Hoxsey in Wright aeroplane at St.

with Arch Hoxsey in Wright aeroplane at St. Louis, Mo. Oct. 16-17—Henry Wynmalen and M. Le Gagneux, each with a passenger, make aeroplane trip from Paris to Brussels; Wynmalen starts on return trip at once and arrives at Paris at noon Oct. 17. Oct. 16—Successful aviation week closes at St. Louis, Mo. Oct. 18—French dirigible balloon Clement Bayard makes trip from Complegne, France, to London without a gtop in six hours; distance, 195 miles. Oct. 23—Capt. Madiot killed by fall at Douai, France; motor falled to stop. Oct. 25—Libut. Monte killed at Magdeburg, Prussia, by falling with biplane; machine turned turtle.

turtle.

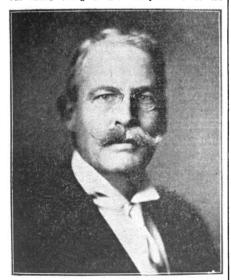

turite.

Oct. 25—August Euler files 3 hours 6 minutes 11 seconds in military aeroplane at Darmstadt, establishing new endurance record for Germany. Oct. 26—M. Blanchard killed by a fail of 100 feet at Issy-les-Molineux, near Paris, France, Ct. 27—Lieut. Saglietti killed near Rome, Italy. while maneuvering with a military biplane. Oct. 28—Maurice Tabuteau files 298 miles in six hours at Etampes, France, without a stop; breaks world's record for continuous filght. Oct. 28—Claude Grahame-White of England wins the Gordon Bennett international trophy at Belmont park, New York.

Oct. 31—Raiph Johnstone, in a Wright machine, attains an altituie of 9,714 feet at Belmont park, New York.

BALLOONING.

WELLMAN'S ATTEMPT TO CROSS ATLANTIC. Walter Wellman attempted to cross the Atlantic in the dirigible balloon America in October, 1910, but failed owing to the faulty action of the

WALTER WELLMAN. (Moffett photo, Chicago.)

equilibrator, or drag rope, with which the craft was provided, and too strong adverse winds. The start was made from Atlantic City, N. J., Saturday, Oct. 15, at 8 o'clock a. m., and at about the same hour on Tuesday, Oct. 18, the voyage came

to an end at a point 375 miles east of Norfolk, Va., and 250 miles northwest of Bermuda. The balloon was then in danger of collapse and the aeronauts abandoned it when the Royal Mail line steamer Trent hove in sight and picked them up. Mr. Wellman's own story of the flight follows:

Mr. Wellman's own story of the flight follows:

"After passing Nantucket on Sunday morning we made, as estimated, 140 miles east-northeast, drifting with a fresh breeze without the motor. In the afternoon the wind was westerly, and at 9 p. m. our approximate position was latitude 42, longitude 67. Here the wind shifted to the northwest and blew thirty miles an hour. The America was drifting twenty-five miles an hour. The America was drifting twenty-five miles an hour. The quillibrator pulled hard, riding over the seas, jerking and shocking the ship and setting up a rolling motion which threatened total destruction. It was a dreadful night, but the entire crew were calm and cheerful. We were greatly exhausted. One after the other went to sleep-expecting to wake up in the ocean, but content to only keep above the water. The equilibrator was dragging the America down and threatening to sweep away the lifeboat, our only hope of saving ourselves. All hands agreed to stick by the ship. We threw over gasoline to lighten the ship.

At 8 a. m. on Monday orders were given to

At 8 a. m. on Monday orders were given to start the motor to try to make Europe or the Azores. The wind held favorable, but soon veered to the northeast. The Azores being impossible with the reduced gasoline, it was decided to try to make Bermuda. We drifted to the southwest at about fifteen miles an hour, reserving the motor and gasoline for a final effort, being resolved to hold the ship as long as possible.
"Monday night we lettisgued more gasoline and

to hold the ship as long as possible.

"Monday night we jettisoned more gasoline and part of the machine-jettisoned more gasoline and part of the machine-jettisoned was damaged to keep afloat. During the cold night we realized that it was impossible to keep up much longer. All Monday we kept afloat, and none of us thought of giving up before the last hours unless we met a vessel. The great danger was of the equilibrator's mashing or foundering the lifeboat, which was launched with difficulty in the high wind early Tuesday morning. We saw the Trent when it was two hours away. It was our only course to launch the lifeboat in the morning instead of waiting for night, when no help was near. This maneuver was executed cleverly. Capt. Vanniman brought the America down close to the sea and Simons directed the releasing of the boat.

Digitized by GOOGIC

"The equilibrator struck a glancing blow, half capsizing the boat. The America, the lifeboat's weight being removed, rose high and soon disappeared in the distance. The loss of the airship was witnessed with small regret, because it would never be used again. The heavy equilibrator, retarding and dragging down the ship and interfering with the steering, was the fatal mistake of this campaign. It was a trial worth making. We covered 1.000 miles over rough seas." covered 1,000 miles over rough seas.

It was the longest sustained flight, both as to time and distance, ever made by a dirigible, the longest flight ever made over the ocean and one of the most remarkable ever made by any balloon. The only trips that exceeded it in distance were the ones made from France to Russia by Count de la Vaulx in 1900, when 1,133 miles were covered, and by Messrs. Hawley and Post in 1910, when 1,335 miles were made.

1,335 mlles were made.

The America was originally built for polar work, but had been remodeled and improved. It was a cigar-shaped craft, 228 feet long over all, with a diameter of lifty-two feet. Its lifting capacity when it left Atlantic City was 23,650 pounds. It carried three gasoline engines, two of from eighty to ninety horse power for propulsion and a donkey engine of from ten to twelve horse power. The upward and downward control was managed by mechanism connected with the propellers. Below the car hung the lifeboat made of canvas with a veneer of mahogany and provided with two water-tight compartments. tight compartments.

The car was 156 feet long, the floor serving as a tank for gasoline. Strung beneath the car was a 230-feet-long equilibrator, taking the place of the usual drag rope. It consisted of a long steel cable, to which were attached thirty small steel tanks, each carrying seventy-five pounds of gasoline, and forty wooden blocks. The total amount of gasoline carried was 9.000 pounds.

The commander and crew of the America were as follows: Walter Wellman, commander; Melvin Vanniman, chief engineer; F. Murry Simons, navigator; J. E. Irwin, wireless operator, and Albert Louis Loui and John Aubert, assistant engineers.

CONTEST FOR BENNETT CUP.

The fifth international balloon race for the James Gordon Bennett cup and cash prizes was started from St. Louis, Mo., between 4:30 and 5:55 p. m. Monday, Oct. 17, 1910. Ten balloons, each manned by a pilot and aid, took part in the contest, which proved to be the most remarkable on record. The winning craft, the America II., was not heard from until Wednesday, Oct. 28. It had crossed Illinois, Lake Michigan, the state of Michigan, Lake Huron and the province of Ontario, and had landed in the wilderness at a place about fifty-eight miles north of Chicoutimi, in the province of Quebec, Canada. Alan R. Hawley and Augustus Post, the pilot and aid, had intended to continue on to Labrador, but at 3:45 o'clock on the afternoon of Wednesday, Oct. 19, a storm compelled them to land on the side of a mountain near Lake Piscocama. They spent the night in the basket of the balloon and the next morning started on foot for civilization, heading south. Carrying food and blankets, they made their way by compass through the woods until on the fourth day they came to the but of a trapper. Here they rested for a day and meeting four French-Canadian hunters were carried by thom by canoe to St. The fifth international balloon race for the rested for a day and meeting four French-Canadian hunters were carried by them by canoe to St. Ambroise, Saguenay, and thence by wagon to Chicoutimi, where they arrived on the afternoon of the 26th after a solid week spent in the wilderness. The anxiety caused by their prolonged absence was great and arrangements had been made

to search the whole of Canada from Lake Superior to search the whole of Canada from Lake Superior Labrador when telegrams announcing their safety were received. The distance covered by their balloon was 1,171 miles, which broke the record of the Bennett race. The crews, landing places and distances made by the balloons taking part in the race were as follows:

and distances made by the balloons taking part in the race were as follows:

America II. (America): Alan R. Hawley, pilot; Augustus Post, aid; landed at Lake Piscocama, Quebec; distance, 1.171 miles.

Dusselotof II. (Germany): Hans Gericke, ;illot; S. F. Perkins, aid; landed at Kiskisink, Quesc; distance, 1.131 miles.

Germania (Germany): Hugo von Abercroh, pilot; August Blanckertz, aid; landed at Coococache, Quebec; distance, 1,079 miles.

Helvetia (Switzerland); Theodore Schaick, pilot; Paul Armbruster, aid; landed at Ville Marle, Quebec; distance, 828 miles.

Harburg III. (Germany); Lieut. Vogt, pilot; W. E. Assmann, aid; landed in Lake Nipissing, Ontario; distance, 756 miles.

Azurea (Switzerland); Emil Messner, pilot; Leon Giraudan, aid; landed near Biscotasing, Ontario; distance, 756 miles.

Isle de France (France); Alfred le Blanc, pilot; Waithier de Mumn, aid; landed at Pogamasing, Ontario; distance, 722 miles.

St. Louis IV. (America); H. F. Honeywell, pilot; J. W. Tolland, aid; landed at Hillman, Mich.; distance, 552 miles.

Condor (France); Jacques Faure, pilot; E. G. Schmolck, aid; landed at Two Rivers, Wis.; distance, 433 miles.

Million Club (America); S. Louis von Phul, pilot; J. M. O'Reilly, aid; landed near Racine, Wis.;

Million Club (America); S. Louis von Phul, pilot; J. M. O'Reilly, aid; landed near Racine, Wis.; distance, 317 miles.

AIRSHIP PASSENGER SERVICE.

Regular airship passenger service was temporarily established Wednesday, June 22, 1910, when Count Zeppelin's dirigible balloon, the Deutschland, carrying twenty passengers, made a scheduled trip from Friedrichshafen to Dusseldorf, Germany. The distance of 300 miles was made in nine hours, the average speed being approximately thirty-three miles an hour. The best speed for one hour was forty-three and a half miles. The passengers occupied a mahogany-walled cabin between the gondolas and were provided with lunch from a buffet. They included directors of the company owning the airship and a number of guests. Count Zeppelin himself steered the craft most of the way.

June 28, the Deutschland, carrying thirty-three passengers, was wrecked in a gale of wind near Dusseldorf, but no one was injured. The service was discontinued.

was discontinued.

AMERICAN CHAMPIONSHIP.

AMERICAN CHAMPIONSHIP.

Thirteen balloons started from the speedway at Indianapolis, Ind., Sept. 17, 1910, in a free-for a I American championship race, the three with the largest mileage to participate in the international race at St. Louis. A. R. Hawley of New York, who covered 453 miles in the America, was first, who covered 453 miles in the America, was first, Louis, was second, and J. S. Wade of Cleveland, who made 371 miles in the Buckeye, was third. The race was under the auspices of the Aero Club of America of America.

PANAMA CANAL LIBEL SUITS.

In the United States District court in New York city Jan. 26, 1910, Judge Charles M. Hough quashed the indictment against the Press Publishing company, publisher of the New York World, charging Joseph Pulitzer and others with criminal libel against Theodore Roosevelt, William H. Taft. Ellhu Root, Douglas Robinson, Charles P. Taft, W. N. Cromwell and J. P. Morgan in connection with the Panama canal purchase. The indictment was

brought March 4, 1909. Judge Hough ruled that the statute upon which it rested was not suffi-cient in authority, or, in effect, that the court had no jurisdiction in the matter.

no jurisdiction in the matter.

Similar proceedings against Delavan Smith and
Charles R. Williams of the Indianapolis News were
dismissed by Judge A. B. Anderson of the United
States District court Oct. 12, 1909.

*Exclusive of areas in great lakes. These are as follows: Illinois, 1.674 square niles in Lake Michigan; Indiana, 220 in Lake Michigan; Michigan, 16.653 in Lake Superior, 12.922 in Lake Michigan, 9.925 in Lake Huron and 460 in Lakes St. Clair and Erie; Minesota, 2.514 in Lake Superior; New York, 3.140 in Lakes Ontario and Erie; Ohio, 3.443 in Lake Erie; Pennsylvania, 891 in Lake Erie; Wisconsin, 2.378 in Lake Superior and 7.500 in Lake Michigan, †Does not include the water surface of the oceans nor the Gulf of Mexico lying within the jurisdiction of the United States. within the jurisdiction of the United States.

Note—The areas of the United States and insular possessions have been computed generally by planimeter measurements from the latest maps. Slight differences in the figures published hitherto by the geological survey, general land office and the bureau of the census, due principally to variations in the maps used, were adjusted at recent conference of representatives of these because and an agreement was reached in recent. reaus and an agreement was reached in regard to the areas. The figures agreed upon are those given in the foregoing table.

AREA BY FEDERAL CENSUS YEARS.

Excluding Alaska and islands, the gross area at each census from 1790 to 1900 compares as follows:

1910 1900	. 3,026,789 . 3,026,789	Census year. 1870 1860	3,026,789 3,026,789	1840 1830	. 1,793,299 . 1,793,299	1810	. 1,734,633 . 843,246
1890	3,026,789	1850	2,995,772	1820	. 1,793,29\$	1790	. 827,844

ANNUAL PAY OF EUROPEAN SOVEREIGNS AND PRESIDENTS.

Austria-Hungary-\$4,250,000. Belgium-\$710.000; large income from various sources Bulgaria—\$390.000. Denmark—\$270.000. France-\$120.000; expenses, \$120.000. Germany: Prussia—\$3,772,631. Bavaria—\$1.296,604.

Saxony-\$852,000. Wurttemberg—\$485.975. Great Britain—\$2,350.000; annuities to members of royal family, \$530,000.

Greece-\$260.000. Italy-\$3,010,000. Netherlands-\$260,000; large income from royal domains Mains.
Norway—\$189.000.
Portugal—\$255.000.
Roumania—\$240.000.
Russia—\$8.497.000 (estimated).
Servia—\$240.000.
Spain—\$1.400.000. exclusive of allowances to royal

family. Turkey-\$4,500,000.

The total number of survivors of the civil war on the roll at the close of the fiscal year 1910 was 562,615, a decrease of 31,345 during the year. The number of survivors of the civil war whose names were dropped from the roll on account of death during the year was 35,312.

PENSIONERS FROM REVOLUTION AND WAR OF 1812.

Mrs. Phobe M. Palmeter, aged 88 years, of Brookfield, N. Y., pensioned by a special act of congress as the daughter of Jonathan Wooley, who served in a New Hampshire company, is the only pensioner on account of the revolutionary war remaining on the roll.

maining on the roll.

The last widow pensioner of that war was Esther S. Damon of Plymouth Union, Vt., who died Nov. II, 1906, aged 92 years. The last survivor of the war of the revolution was Danlel F. Bakeman, who died at Freedom, Cattaraugus county, New York. April 5, 1863, aged 109 years 6 months and

The last surviving pensioned soldier of the war of 1812 was Hiram Cronk of Ava, N. Y., who died May 13, 1905, aged 105 years and 16 days.

MANCHURIAN NEUTRALIZATION PROPOSAL

MANCHURIAN NEUTRALIZATION PROPOSAL.

Late in December, 1999, the American secretary of state, Philander C. Knox, sent a note to the governments of China, Japan, Russia, Great Britain, France and Germany, proposing that the railroads of Manchuria be turned over to China and placed under the control of an international syndicate, which should develop them for commercial instead of political purposes, thus assuring the neutrality of the province. In the communication, which was made public Jan. 5, 1910, Mr. Knox explained that his proposal had in view the maintenance of the "open-door" policy in Manchuria. The suggestion, which became generally known as the "Manchurian neutrality proposition." was rejected by Japan Jan. 21, and subsequently by Russia, on the ground that the plan would be of no advantage to the powers immediately concerned. Japan further declared that it adhered strictly to its pledges of an open door and equal opportunities in Manchuria.

CHINESE BALLWAY LOAN AND AMERICA.

CHINESE RAILWAY LOAN AND AMERICA.

CHINESE RAILWAY LOAN AND AMERICA.
Secretary Knox's neutralization proposition had its origin in the agreement which Edwin H. Conger, the American minister in Pekin, made with the Chinese government in 1994, that American should have the privilege of subscribing to the loan for the building of the Szechuen railway. In March, 1993, the Chinese government contracted for a loan of \$27,500,000 for this project from bankers in England, France and Germany. The American government then made urgent representations to the Pekin government on the subject and succeeded in having the terms of the loan rearranged, but final action was not taken until after Secretary Knox's neutralization proposition had been made and rejected. May 24, 1910, the Szechuen railway loan agreement wes signed in Paris. France, by the representatives of financial groups in the United States, France, Great Britain and Germany. The amount of the loan was fixed at \$30,000.00 and it was announced that the basis of the agreement was absolute equality between the four groups, both as to the loan itself and as to the tender of supplies.

Oct. 27, 1910, arrangements were concluded for an additional loan of \$50,000,000 by a syndicate of New York financiers to the Chinese government.

CLIMATOLOGY OF THE UNITED STATES.

The following table of average rainfall, highest and lowest temperatures, based upon observations of thirty-eight or fewer years at selected stations in the several states and territories of the United States, was compiled from the records of the weather bureau for The Chicago Daily News Almarac by the United States weather bureau, Washington, D. C.:

INCOME-TAX AMENDMENT TO THE CONSTITUTION.

July 5, 1909, congress passed the following joint resolution:

Resolved, by the senate and house of representa-tives of the United States in congress assembled (two-thirds of each house concurring therein), That (two-thirds of each house concurring therein). That the following article is proposed as an amendment to the constitution of the United States, which, when ratified by the legislatures of three-fourths of the several states, shall be valid to all intents and purposes as a part of the constitution:

"Article XVI. The congress shall have power to lay and collect taxes on incomes, from whitever sources derived, without apportionment among the

several states and without regard to any census or enumeration."
Up to the close of 1910 the amendment had been

ratified by the following states:

Alabama. Georgia. Illinois. Maryland.

Mississippi. Oklahoma. South Carolina.

The Kentucky legislature failed to act on the amendment, while the lawmakers of Louisiana, Massachusetts, New York and Rhode Island refused to adopt it.

REPORT OF LIBERIAN COMMISSION.

The American commission which visited Liberia in May and June, 1909, made a report to President Taft, who transmitted it to congress March 25, 1910. Messrs. R. P. Falkner, George Sale and Emmett J. Scott, the commissioners, made the following recommendations:

(1) That the United States extend its aid to

Liberia in the prompt settlement of its boundary

disputes.
(2) That the United States enable Liberia to refund its debt by assuming, as a guaranty for the payment of obligations under such an arrangement, the control and collection of Liberian customs.

- (3) That the United States lend its assistance to the reform of the internal finances.
- (4) That this nation aid in organizing and drilling a competent constabulary or frontier police.

 (5) That the United States establish and maintain a research station there.
- (6) That the United States reopen the question

of establishing a coaling station in Liberia.

Historians do not all agree as to some of the

dates in the above table. The dates given are from the statistical abstract of the United States published by the government and are well supported in all disputed cases.

FASTEST VOYAGES ACROSS THE ATLANTIC.

Queenstown to New York, 4 days and 15 hours, by the Lusitania, Aug. 15-20, 1908; Raunt's Rock to Ambrose channel lightship (short course), 4 days 10 hours 48 minutes, Mauretania, Sept. 11-15, 1910; long course (2.891 miles), 4 days 17 hours 6 minutes, Mauretania, Feb. 13-18, 1909.

New York to Queenstown, 4 days 13 hours 41 minutes, by the Mauretania, Sept. 15-20, 1909.

Hamburg to New York, 5 days 11 hours 54 min-ates, by the Deutschland, Sept. 2-8, 1903.

Cherbourg to New York, 5 days 11 hours 9 min-ates, by the Kronprinzessin Cecilie, Aug. 19-25, 1908. New York to Cherbourg, 5 days 16 hours, by the Kaiser Wilhelm der Grosse, Jan. 4-10, 1900.

Southampton to New York, 5 days 20 hours, by the Kaiser Wilhelm der Grosse, March 30-April 5,

Havre to New York, 6 days 1 hour 12 minutes, by La Provence, Sept. 6-13, 1907.

New York to Southampton, 5 days 17 hours 8 inutes, by the Kaiser Wilhelm der Grosse, Nov. minutes,

minutes, by the Kaiser Wilhelm der Grosse, Nov. 23-29, 1897.
New York to Havre, 6 days 2 hours 48 minutes, by La Provence, May 31-June 6, 1906.
New York to Plymouth (short course, 2,962 miles), 5 days 7 hours 28 minutes, by the Deutschland, Sept. 5-10, 1900; (long course, 3.080 miles), 5 days 9 hours 55 minutes, Kaiser Wilhelm II., Aug. 18-

9 hours 55 minutes, Kaiser, Village 24, 1908.
Plymouth to New York, 5 days 15 hours 46 minutes, by the Deutschland, July 7-12, 1900.
Moville, Ireland, to Cape Race, N. F., 4 days 10 hours, by the Virginian (turbine), June 9-13, 1905.
The best day's run by any steamer was 671 miles, made by the Mauretania, February, 1909.
Distances: New York to Southampton, 3,100 miles; to Plymouth, 2,962 miles; to Queenstown, 2,800 miles; to Cherbourg, 3,047 miles; to Havre, 3,170 miles; to Hamburg, 3,820 miles.

Woodward, S. W., Washington, to Y. M. C. A., \$28,000

\$35,000.

CHICAGO'S CONTRIBUTIONS TO THE Y. M. C. A.

In March, 1910, the officers and friends of the Young Men's Christian association in Chicago started a campaign to raise \$350,000 in ten days. It began March 30 and ended April 12, when a total of \$354,038.74 had been raised. The contributors, who represented every walk in life from persons of great wealth to newsboys, numbered 6,864. It was the culminating effort of a two-years' campaign to secure an anniversary fund of \$1,000,000. The sum actually secured was \$1,185,212.74. It is being devoted to the general work of the association in Chicago, constructing new and caring for old bulldings, paying off debts and extending the activities of the various Y. M. C. A. departments located in each division of the cliy. In March, 1910, the officers and friends of the

DISTURBANCES IN CHINA.

Changsha, capital of the province of Hunan, China, was the scene of serious riots beginning April 13, 1910. Originally the outbreak was caused by a famine due to a corner in rice, but an active antiforeign propaganda led to attacks on missionaries and their property. Several missions, which were located near the rice shops, were burned by mobs and all the foreigners in the city were compelled to take refuge on vessels in the harbor.

All of the foreign-owned buildings in the city, including the consulates, met the same fate. Several Chinese officials were killed while trying to subdue the rioters. The disturbance extended to other places in the province, but the greatest damage was done in the capital. The arrival of a number of gunboats in the harbor finally put a stop to the rioting toward the end of April.

SYMPATHETIC STRIKES UNLAWFUL.

In a decision handed down by the United States Circuit Court of Appeals in Richmond, Va., March 12, 1910, the injunction issued by Judge Alston G. Dayton of West Virginia in the suit of the Hitchman Coal and Coke company against the United Mine Workers of America was sustained and made permanent. The company alleged that on April 1, 1906, a strike was inaugurated by its employes in

response to a call issued by the United Mine Workers of America, who designed to compel coal operators in other sections to accede to their demands. The strike was therefore a sympathetic one, the firm in question having compiled with all the terms and conditions laid down by the miners. The Appellate court's decision was, in effect, that such strikes are unlawful.

MEN OF THE YEAR.

POOR'S MANUAL STATISTICS.

According to Poor's Manual of Railroads for 1910, the capital stock of all the railroads in the United States at the end of 1909 was \$3,020,680,983, compared with \$7,641,913,086 in 1908, an increase of \$388,767,877, or 5.09 per cent. The bonded debt at the end of 1909 was \$9,118,103,813. The increase in this item was \$329,585,768, or 3.75 per cent, in the twelve months. The profit and loss surplus of all the roads is \$919,823,188.

The number of passengers carried in 1909 was \$24,423,075, an increase of 33,188,072. The gross earnings for 1909 were \$2,513,212,763, as against

\$2,497,019,810 in 1908. The increase was \$106,192,953, or 4.41 per cent. The net earnings for 1909 were \$852,153,280, against \$717,802,167 for the preceding year. The increase was \$124,351,113, or 18.73 per cent

cent.
The total mileage of steam railroads on Dec. 31, 1909, was 238,356 miles, as against 232,046 miles on Dec. 31, 1908, showing an increase of 6,310 miles. The revenue a ton mile was 0.757 cent, as against 0.767 cent in 1908. The revenue a passenger mile was 1.934 cents, as against 1.964 cents in 1908.

RAILROAD ACCIDENTS.

For years ended June 30. Reported by interstate-commerce commission.

CHICAGO INTERURBAN TROLLEY LINES.

326

140

140

Following are the principal electric interurban lines with terminals in or near Chicago, with the names of the principal points reached by them: Chicago & Milwaukee—Terminal in Evanston; makes connection with Northwestern elevated and surface lines to Chicago; runs north to Waukegan, Kenosha, Racine and Milwaukee; branch from Lake Bluff to Libertyville and Rockefeller. Elec-

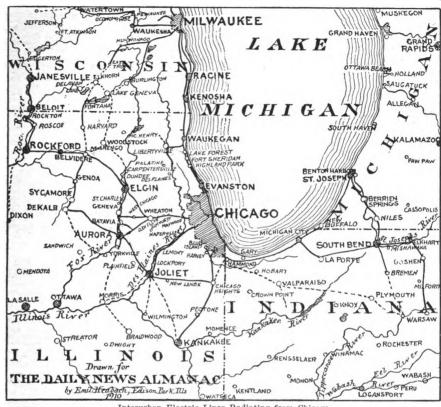

tric lines run from Milwaukee to Burlington, to East Troy, to Waukesha, Pewaukee, Oconomowoc and Watertown and to Sheboygan and Elkhart lake

22,862,500

23,362,500

Chicago & Joliet—Terminal at 48th street and Archer avenue; runs southwest to Lockport and Joliet; connects at Joliet with lines for Aurora and Chicago Heights.

300gle

Interurban Electric Lines Radiating from Chicago.

DEATH OF COUNT LEO TOLSTOY.

Count Leo Tolstoy, the famous Russian author and philosopher, died at Astapova, Russia, Nov. 20, 1910. The count, who was \$2 years old, left his home at Yasnaya Poliana early in Novomber accompanied only by Dr. Makovetsky, for the purpose of ending his days in solitude, to which he more and more inclined during his latter years. His pilgrimage led him to the religious establishment at Shamardine, in the province of Kaluga, where he remained as the guest of his sister Marie, who is a nun in the cloister.

Learning that his retreat had been discovered, he insisted upon proceeding on his journey to the Caucasus, where he hoped to spend his last days close to the Tolstoian colony on the shores of the Black sea. On the railroad journey the count was overcome with exhaustion and the cold, and Dr. Makovetsky was compelled to have him transferred to the flag station at Astapova, where he was made as comfortable as possible in the rude wooden building.

For five days he had remained suffering first

T LEO TOLSTOY.

from bronchitis and later from inflammation of the lungs. Specialists were called from Moscow and other places, but notwithstanding their utmost efforts the heart of the great Russian responded but feebly to the restoratives and stimulants administered. The attacks of heart failure increased alarmingly and many hours before the end the physicians had given up all hope.

Count Tolstoy was born at Yasnaya Poliana Aug. 28, 1828. He was educated in Kazan university, served in the Crimean war and then entered upon a literary and philanthropical career. Among his best known works are: The Cossacks, Sevastopol Sketches, War and Peace, Anna Karenna, My Confession, What I Believe, The Power of Darkness, Which Is Art, Resurrection, The Slavery of Our Times, and On Life. He renounced property in copyright, land and money in 1895-1896, and was excommunicated by the Russian synod in 1901. Since his religious crisis in 1878-1879 he insisted upon living the same kind of a life as the humblest of the peasants on his estate. of the peasants on his estate.

DISTRIBUTION OF WORLD'S SHIPPING.

Only vessels of more than 100 tons included.

PROCEEDINGS AGAINST PACKING CORPORATIONS.

IN CHICAGO.

IN CHICAGO.

Jan. 25, 1910, Judge Kenesaw M. Landis of the United States District court in Chicago impaneled a grand jury to investigate the so-called "beef combine" among the meat packers. Witnesses were summoned and the inquiry continued until March 21, when an indictment was returned charging the National Packing company and ten of its subsidiary corporations with conspiracy in violation of the Sherman antitrust law. On the same date a bill in equity was filed by District Attorney Edwin W. Sims in the United States Circuit court, Chicago, against the National Packing company and subsidiary concerns and against its directors. It charged the packers with criminal conspiracy in fixing the prices of live stock and dressed meat and demanded the dissolution of the National Packing company and its alied concerns. National Packing company and its allied concerns. It also asked that the individual defendants and their agents be prohibited from exercising any control over the corporations involved except such as might be necessary to wind up their affairs. The companies against which indictments were voted

Edward Tilden, president of the National Packing company.

Edward F. Swift, vice-president of Swift & Co. Charles H. Swift, director National Packing company, Swift & Co., Libby, McNeill & Libby.

Arthur Meeker, general manager and director Arthur Meeker, general manager and director National Packing company.

Thomas E. Wilson, vice-president Morris & Co., director National Packing company.

L. H. Heyman, director National Packing company and so Morris & Co.

Thomas J. Connors, general superintendent Armour & Co., director National Packing company and Swift & Co., director National Packing company and Swift & Co., director National Packing company and Packing company.

L. A. Carton, treasurer Swift & Co., director National Packing company, & Co.

Armour & Co. Swift & Co. Morris & Co.

MOFILS & CO.
Continental Packing company.
Upon a demurrer by counsel for the National
Packing company and subsidiary concerns Judge
Kenesaw M. Landis decided, June 23. that the indictment was invalid because it did not charge
that during the last three years the defendants
had been engaged in interestic company. that during the last three years the defendants had been engaged in interstate commerce. He therefore sustained the demurrer, but at the same time ordered a special grand jury for July 14 to make a Lew investigation. This was concluded Sept. 12, when the following ten packers were indicted as individuals: J. Ogden Armour, Louis F. Swift. Edward Morris. Edward Tilden, Arthur Meeker, Edward F. Swift, Charles H. Swift, Louis H. Heyman, Thomas J. Connors, Francis A. Fowler. Three indictments were returned against each defendant, recting the following violations of the Sherman antitrust law:

1. Combination in restraint of trade by the ten

defendants, who are alleged to have used the National Packing company as the medium of their operations, the Swift, Armour and Morris Interests holding stock therein-70,000 and 60,000 and 20,000

inclines, the Swiit, Armour and Morris interests a loiding stock therein—70,000 and 60,000 and 20,000 shares, respectively.

2. Conspiracy in restraint of trade, practically the same facts being set out as in the first indictient, except that "conspiracy" instead of a "combination" is alleged.

3. Monopoly of the trade in fresh meats by these unlawful means: Elimination of competition in the purchase of cattle and the sale of fresh meats; conducting the business of the National Packing company in harmony in all respects with the business of the Swift, Armour and Morris concerns; removing the New York Butchers' Dressed Meat company from the field of competition by purchasing stock in that corporation until the control of it had been obtained. trol of it had been obtained

INDICTMENTS IN NEW JERSEY,

INDICTMENTS IN NEW JERSEY.

Six corporations and twenty-one individuals engaged in the cold-storage business in Jersey City, Hoboken and Bayonne were indicted for conspiracy by the Hudson county (New Jersey) grand jury, Feb. 25, 1910, the indictments being returned in the state Supreme court in Jersey City. The corporations involved were: The National Packing company, Armour & Co., Swift & Co., Morris & Co., Hammond Packing company and G. H. Hammond & Co. The individuals indicted, nearly all directors or former directors of the National Packing company, were: A. W. Armour, Kansas City, Mo.; J. Ogden Armour, Chicago, Ili.; Thomas J. Connors, Chicago, Ili.; Edward J., New York, N. Y.; L. A. Carton, Chicago, Ili.; Thomas J. Connors, Chicago, Ili.; Cherse, V. Y.; F. A. Fowler, Chicago, Ili.; A. A. Fuller, New York, N. Y.; L. Henty P. Darlington, Chicago, Ili.; George H. Edwards, New York, N. Y.; L. Henty P. Darlington, N. Y.; L. H. Heyman, Chicago, Ili.; A. A. Fuller, New York, N. Y.; D. E. Hartwell, New York, N. Y.; L. H. Heyman, Chicago, Ili.; Edward Morris, Chicago, Ili.; Edward F. Swift, Chicago, Ili.; Edward Tilden, Chicago, Ili.; Edward Tilden, Chicago, Ili.; Edward Thomas E. Wilson, Chicago, Ili.; Louis F. Swift, Chicago, Ili.; Edward Tilden, Chicago, Ili., and Thomas E. Wilson, Chicago, Ili. The corporations were all Chicago concerns. Chicago concerns

Chicago concerns,
The indictment charged that the defendants met
in Jersey City, March 1, 1908, and conspired to
corner and limit the necessary and reasonable supply of meats and poultry for the consumption of
the people of Hudson county so as to produce an
artificial scarcity and to increase the market prices
of the feeders.

of the foodstuffs.

WRECK OF PERE MARQUETTE CAR FERRY.

The Pere Marquette car ferry steamer No. 18, bound from Ludington, Mich., to Milwaukee, Wis., sank in Lake Michigan between 6 and 8 o'clock Friday morning, Sept. 9, 1910 when about thirty miles off Sheboygan, Wis. Two passengers and thirty-one of the officers and crew were drowned; thirty-three persons were rescued by car ferry No. 17, which had been summoned to the scene by a wireless call for help. The exact cause of the disaster could not be ascertained. The weather at the time it occurred was good and only a moderate sea was running. sea was running.

#### VOTE ON ANNEXATION PROPOSITIONS.

Proposed Annexation of Morgan Park. Vote in Chicago: For, 126,745; against, 92,282. Vote in Morgan Park: For 319; against, 412. Proposition defeated.

Proposed Annexation of Oak Park. Vote in Chicago: For, 128,972; against, 92,282. Vote in Oak Park: For, 734; against, 2,298. Proposition defeated.

Proposed Annexation of Edison Park. Vote in Chicago: For, 129,852; against, 95,608. Vote in Edison Park—For, 52; against, 71. Proposition defeated.

# SPRING PRIMARIES IN CHICAGO (1911).

Jan. 30—First day to file petitions for aldermanic and mayoralty nominations.

Feb. 10—First day to file petitions for judicial

Feb. 10-F nominations.

Feb. 13—Last day to file petitions for mayoralty and aldermanic primaries.

Feb. 28—Primaries for the nomination of aldermen, mayor, city clerk and city treasurer.

April 4—Election day for all city offices.

April 11—Primaries for judicial nominations.

#### LORIMER ELECTION INVESTIGATION.

The election of William Lorimer, republican, of Chicago, to the United States senate by a combination of republicans and democrats in the Illinois legislature May 26, 1909, resulted in 1910 in investigations by the grand juries of Cook and Sangamon counties and an inquiry by the committee on privileges and elections of the United States senate. Public attention was first called to the matter by a confession made by Representative Charles A. White of O'Fallon, Ill., and published in the Chicago Tribune, April 30, to the effect that he and others had been paid cash for voting for Mr. Lorimer for senator. May 6 Representative Lee O'Nell Browne of Ottawa, leader of the democratic minority in the house, was indicted on the charge of bribery, it being alleged that he had paid \$850 to Representative Charles A. White in Chicago, June 16, 1909, on a contract and for his vote for William Lorimer as United States senator. On the same date the grand jury indicted Representative Robert E. Wilson of Chicago, democrat, and Representative Michael S. Link of Mitchell, democrat, on the charge of perjury in connection with their testimony as to the alleged division of a legislative "jack pot" at the Southern hotel in St. Louis, July 15, 1909.

May 7 statements were made by Representatives Michael S. Link and H. C. J. Beckemeyer which were held to be corroborative of Representative White's legislative-bribery story. By so doing Mr. Link purged himself of the charge of perjury. May 27 State Senator D. W. Holstlaw, democrat, representing the 22d senatorial district, was in-

Mr. Link purged himself of the charge of perjury. May 27 State Senator D. W. Holstlaw, democrat, representing the 42d senatorial district, was indicted by the grand jury of Sangamon county on two counts, charging him with perjury in testimony given by him in the Springfield investigation of legislative bribery. The following day he made certain admissions to the grand jury, one of them being that State Senator John Broderick, democrat, of Chicago, had paid him \$2,500 after he had cast his vote for Lorimer for senator. As a result of his testimony the following men were indicted: State Senator John Broderick of Chicago, charged with bribery. with bribery.

State Senator Stanton C. Pemberton of Oak-land, charged with conspiracy to commit bribery. State Senator D. W. Holstlaw of Iuka, charged with conspiracy to commit bribery.

Representative Joseph S. Clark of Vandalia, charged with conspiracy to commit bribery. The indictment against Senator Holstlaw was nolle prossed. In a signed note to the public he made this statement:

"I voted for William Lorimer for United States senator and received therefor \$2,500, I also re-ceived \$700, which was given to me without ex-

planation with the statement that it was coming to me. I was promised \$1,500 for my connection with the letting of the furniture contract."

The furniture contract referred to was one for supplying the statehouse with new desks to replace others that were declared to be perfectly good. Senator Hoistlaw resigned as senator June 3. Lee O'Neil Browne was placed on trial before Judge McSurely in the Superior court of Cook country June 7, and the case went to the jury June 24. After being out 115 hours and 20 minutes the jury reported that it was unable to agree and was discharged. It was said that eight stood for conviction and four for acquittal. Mr. Browne was again placed on trial the second time Aug. 1 and was acquitted by the jury Sept. 9.

In response to a request by Mr. Lorimer, the United States senate adopted the following resolution June 20:

tion June 20:

"Resolved, That the committee on privileges and elections of the senate, or any subcommittee thereof, be authorized and directed to investigate cerain charges against William Lorimer, a senator from the state of Illinois, and to report to the senate whether, in the election of said William Lorimer as a senator of the United States from said state of Illinois, there were used or employed corrunt methods or practices: that said committee said state of Illinois, there were used or employed corrupt methods or practices; that said committee or subcommittee be authorized to sit during the sessions of the senate and during any recess of the senate or of congress, to hold its sessions at such place or places as it shall deem most convenient for the purposes of the investigation, to employ a steungrapher, to send for persons and appers and to administer oaths, and that the expenses of the inquiry shall be paid from the contingent fund of the senate upon vouchers to be approved by the chairman of the committee."

June 21 the following subcommittee was expense.

proved by the chairman of the committee."

June 21 the following subcommittee was appointed to make a thorough investigation of the Illinois senatorial bribery scandal: Republican senatorial bribery scandal: Republican senatorial bribery scandal: Republican senatorial bribery scandal: Republican senatorial bribery scandal: Republican senatorial bribery scandal: Republican senatorial brighter properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of the properties of

## DEATH OF MRS. MARY BAKER EDDY.

DEATH OF MRS. MARY BAKER EDDY.

Mrs. Mary Baker Eddy, discoverer and founder of Christian science and author of its textbook, "Science and Health, with Key to the Scriptures," passed away at 10:45 p. m., Saturday, Dec. 3, 1910, at her home on Beacon street, Chestnut Hill, Mass. Her Illness was of brief duration and was attributed to old age. She was born in Bow, N. H., July 16, 1821. Christian science was proclaimed by her in 1866 and the textbook of the new faith was published in 1875. The First Church of Christ, Scientist, was formed in Boston in 1879 and two years later Mrs. Eddy was ordained as its pastor.

## FOOTBALL ACCIDENTS AND FATALITIES.

From statistics compiled by the Chicago Record-Herald it appears that twenty-two young men were killed and 499 injured during the football season of 1910 in the United States. The record since 1901 stands:

	Deaths.inju	Deaths.injuries.				
1901	7	74	190614	160

#### THE PRESIDENT'S MESSAGE.

THE PRESIDEN

To the Senate and House of Representatives:
During the past year the foreign relations of the
United States have continued upon a basis of
friendship and good understanding.

The year has been notable as witnessing the pacific settlement of two important international controversies before the permanent court of The
Hague. The arbitration of the fisheries dispute between the United States and Great Britam, which
has been the source of nearly continuous diplomatte correspondence since the fisheries convention of
1818, has given an award which is satisfactory to
both parties. This arbitration is particularly noteworthy not only because of the eminently just results secured, but also because it is the first arbitration held under the general arbitration treaty
of April 4, 1908, between the United States and
Great Britain, and disposes of a controversy the
settlement of which has resisted every other resource of diplomacy, and which for nearly innetyears has been the cause of friction between two
countries whose common interest lies in maintaining the most friendly and cordial relations with
each other.

The United States was ably represented before
the tribunal. The complicated history of the questions arising made the issue depend more than
ordinarily in such cases upon the care and skill
with which our case was presented, and I should
be wanting in proper recognition of a great patriotic service if I did not refer to the lucid historical analysis of the facts and the signal ability
and force of argument—six days in length—presented to the court in support of our case by Mr.
Ellhu Root. As sucretary of state Mr. Root,
had being the controversy, and by diplomatic correspondence
had helped to frame the issues. At the solicitation
of the secretary of state and myself Mr. Root,
though burdened by his Jutles as senator from
New York, undertook the preparation of the case
as leading counsel, with the condition, imposed by
himself, that in view of his position as senator he
shoul

himself, that in view of his position as senator he should not receive any compensation.

The tribunal constituted at The Hague by the governments of the United States and Venezuela has completed its deliberations and has rendered an award in the case of the Orinoco Steamship company against Venezuela. The award may be regarded as satisfactory since it has, pursuant to the contentions of the United States, recognized a number of important principles making for a judicial attitude in the determining of international dismutes.

disputes.

FOR COURT OF NATIONS.

In view of grave doubts which had been raised as to the constitutionality of The Hague convention for the establishment of an international prize court, now before the senate for ratification because of that provision of the convention which provides that there may be an appeal to the proposed court from the decisions of national courts, this government proposed, in an identic circular note addressed to those powers who had taken part in the London maritime conference, that the powers signatory to the convention, if confronted with such difficulty, might based a reservation to the effect that appeals to the international prize court in respect to decisions of its national tribunals should take the form of a direct claim for compensation; that the proceedings thereupon to be taken should take the form of a direct claim for compensation; that the proceedings thereupon to be taken should be in the form of a trial de novo, and that judgment of the court should consist of commensation for the illegal capture, irrespective of the decision of the national court whose judgment had thus been internationally involved. As the result of an informal discussion it was decided to provide such procedure by means of a separate protocol, which should be ratified at the same time as the prize-court covention itself.

Accordingly, the government of the Notherlands, at the request of this government, proposed under date of May 24, 1910, to the powers signatory to the original convention, and that there is every to the original convention, and that there is every

reason to believe that the international prize court will soon be established.

will soon be established.

The identic circular note also proposed that the international prize court when established should be endowed with the functions of an arbitral court of justice under and pursuant to the recommendation adopted by the last Hague conference. The replies received from the various powers to this proposal inspire the hope that this also may be accomplished within the reasonably near future. It is believed that the establishment of these two tribunals will go a long way toward securing the arbitration of many questions which have heretofore threatened and at times destroyed the peace of nations.

of nations.

## LIMIT OF ARMAMENTS.

LIMIT OF ARMAMENTS.

Appreciating these enlightened tendencies of modern times, the congress at its last session passed a law providing for the appointment of a commission of five members "to be appointed by the president of the United States to consider the epediency of utilizing existing international agencies for the purpose of limiting the armaments of the nations of the world by international agreement, and of constituting the combined navies of the world an international force for the preservation of universal peace, and to consider and report upon any other means to diminish the expenditures of government for military purposes and to lessen the probabilities of war."

I have not as yet made appointments to this com-

upon any other means to diminish the expenditures of government for military purposes and to lessen the probabilities of war. The purpose and to lessen the probabilities of war. I have not as yet made appointments to this commission because I have invited and am awaiting the expressions of foreign governments as to their willingness to co-perate with us in the appointment of similar commissions or representatives who word meet with our commissioners and by John action seek to make their work effective. Several important treatles have been negotiated with Great Britain in the last twelve months. A preliminary diplomatic agreement has been reached regarding the arbitration of pecuniary claims which each government has against the other. This agreement, with the schedules of claims annexed, will, as soon as the schedules are arranged, be submitted to the senate for approval.

An agreement, with the schedules of claims annexed, and Great Britain with regard to the location of the international boundary line between the United States and Great Britain with regard to the location of the international boundary line between the United States and Canada in Passamaguoddy bay and the middle of Grand Manan channel was reached in a treaty concluded May 21, 1910, which has been ratified by both governments and proclaimed, thus making unnecessary the arbitration provided for in the previous treaty of April 11, 1908, between the United States and Great Britain, providing for the settlement of international differences between the United States and Great Britain and the appointment of commissioners to adjust certain other questions, has been ratified by both governments and proclaimed. The work of the international fisheries commission appointed in 1908, under the treaty of April 11, 1908, between Great Britain and the United States, has resulted in the formulation and recommendation of uniform regulations governing the isheries of the boundary waters of Ganada and the United States for the purpose of protecting and increasing fulfillment of the treaty stipulations.

## REVOLUTION IN PORTUGAL.

REVOLUTION IN PORTUGAL.

In October last the monarchy in Portugal was overthrown, a provisional republic was proclaimed and there was set up a de facto government of the United States for purposes of ordinary intercourse pending formal recognition by this and other powers of the governmental entity to be duly established by the national sovereignty. A disturbance among the native tribes of Liberia in a portion of the republic during the early part of this year resulted in the sending, under the disaffected district, and the Liberian author-

Digitized by GOOGIC

ities, assisted by the good offices of the American naval oificers, were able to restore order. The ne-gotiations which have been undertaken for the amelioration of the conditions found in Liberia by

gotiations which have been undertaken for the amelioration of the conditions found in Liberia by the American commission, whose report I transmitted to congress on March 25 last, are being brought to conclusion, and it is thought that within a short time practical measures of relief may be put into effect through the good offices of this government and the cordial co-operation of other government; interested in Liberia's welfare.

To return the visit of the special embassy sent to announce the accession of his majesty Mchemet V., emperor of the Ottomans, I sent to Constantinople a special ambassador who, in addition to this mission of ceremony, was charged with the duty of expressing to the Ottoman government the value attached by the government of the United States to increased and more important relations between the countries and the desire of the United States to contribute to the larger economic and commercial development due to the new regime in Turkey. The rapid development new beginning in that ancient empire and the marked progress and increased commercial importance of Bulgaria, Roumania and Servia make it particularly opportune that the possibilities of American commerced its will that the principality of Montenegro be raised to the rank of kingdom, the prince of Montenegro and Liberia sasumed the title of king of Montenegro. It gave me pleasure to accord to the new kingdom the recognition of the United States.

CHINA CENTER OF INTEREST.

CHINA CENTER OF INTEREST.

The center of interest in far eastern affairs dur-

new kingdom the recognition of the United States.

CHINA CENTER OF INTEREST.

The center of interest in far eastern affairs during the past year has again been China.

It is gratifying to note that the negotiations for a loan to the Chinese government for the construction of the trunk railway llues from Hankow southward to Canton and westward through the Yangtse valley, known as the Hukuang loan, were concluded by the representatives of the various financial groups in May last and the results approved by their respective zovernments. The agreement, alreedy initialed by the Chinese government, is now awaiting formal ratification. The basis of the settlement of the terms of this loan was one of exact equality between America, Great Britain, France and Germany in respect to financing the loan and supplying materials for the proposed railways and their future branches.

The application of the principle underlying the policy of the United States in regard to the Hukuang loan, viz., that of the internationalization of the foreign interest in such of the railways of China as may be financed by foreign countries, was suggested on a broader scale by the secretary of state in a proposal for internationalization and commercial neutralization of all the railways of Manchuria. While the principle which led to the proposal of this government was generally admitted by the powers to whom it was addressed, the governments of Russia and Japan apprehended practical difficulties in the execution of the larger plan which prevented their ready adherence. The question of constructing the Chinchow-Aigun railway by means of an international loan to China is, lowever, still the subject of friendly discussion by the interested parties.

The policy of this government in these matters has been directed by a desiry to make the use of American capital in the development of China an instrument in the promotion of China's welfare and material prosperity without prejudice to her lexitimate rights as an iniependent political power. This policy h

al exchange commission, to discuss with the Chi-

nese government the best methods of introducing the reform.

the reform.

In 1908 China sent a commissioner to the United States to consult with American financiers as to the possibility of securing a large loan with which to inaugurate the new currency system, but the death of their majesties, the empress dowager and the emperor of China, Interrupted the negotiations, which were not resumed until a few months ago, when this government was asked to communicate to the bankers concerned the request of China for a loan of \$50,000,000 for the purpose under review. A preliminary agreement between the American group and China has been made covering the loan.

of China for a loan of \$50,000,000 for the purpose under review. A preliminary agreement between the American group and China has been made covering the loan.

For the success of this loan and the contemplated reforms, which are of the greatest importance to the commercial interests of the United states and the civilized world at large, it is realized that an expert will be necessary, and this government has received assurances from China that such an adviser, who shall be an American, will be engaged.

It is a matter of interest to Americans to note the success which is attending the efforts of China to establish gradually a system of representative government. The provincial assemblies were opened in October, 1909, and in October of the present year a consultative body, the nucleus of the future national parlament, held its first session at Pekin.

The year has further been marked by two important international agreements relating to fareastern affairs. In the Russo-Japanese sgreement relating to Manchuria, signed July 4, 1910, this government was gratified to note an assurance of continued peaceful conditions in that region and the readirmation of the polices with respect to China, to which the United States, together with all other interested powers, are alike solemnly committed.

The treaty annexing Korea to the empire of Japan, promulgated Aux. 29, 1910, marks the final step in a process of control of the ancient empire by her powerful neighbor that has been in progress for several years past. In communicating the fact of annexation the Japanese government gave to the government of the United States assurances of the full protection of the rights of American citizens in Korea under the changed conditions.

Friendly visits of many distinguished persons from the far east have been made during the year. Chief among these were their imperial highnesses Prince Tokugawa, president of the house of person of Japan. The secretary of war has recently visite has had been progressed to the Philippines and a large del ican business men are at present traveling in China. This exchange of friendly visits has had the happy effect of even further strengthening our friendly international relations.

SISTER REPUBLICS CELEBRATE.

SISTER REPUBLICS CELEBRATE.

During the last year several of our southern sister republics celebrated the 100th anniversary of their independence. In honor of these events special embassies were sent from this country to Argentina, Chile and Mexico, where the gracious reception and splendid hospitality extended them manifest the cordial relations and friendship existing between those countries and the United States, relations which I am happy to believe have never before been upon so high a plane and so solid a basis as at present.

The congressional commission appointed under a concurrent resolution to attend the festivities celebrating the centennial anniversary of Mexican independence, together with a special ambassador, were received with the highest honors and with the greatest cordiality, and returned with the report of the bountrous hospitality and warm recoption of President Diaz and the Mexican people, which left no doubt of the desire of the immediately neighboring republic to continue the mutually beneficial and intimate relations which I feel sure the two governments will ever cherish. At the fourth pan-American conference, which met in Buenos Aires during July and August last, after seven weeks of harmonious deliberation three

conventions were signed providing for the regulation of trade marks, patents and copyrights, which, when ratified by the different governments, which, when ratified by the different governments, will go far toward furnishing to American authors, patentees and owners of trade marks the protection needed in localities where heretofore it has been aither lacking or inadequate. Further, a convention for the arbitration of pecuniary claims was signed and a number of important resolutions passed. The conventions till in due course be transmitted to the senate and the report of the delegation of the United States will be communicated to the congress for its information. The special cordiality between representative men from all parts of America which was shown at this conference cannot fail to react upon and draw still closer the relations between the countries which took part in it.

The international bureau of American republics is doing a broad and useful work for pan-American commerce and comity. Its duties were much enlarged by the international conference of American states at Buesos Aires and its name was shortened to the more practical and expressive term of Pan-American Union. Located now in its new building, which was specially dedicated April 26 of this year to the development of friendship trade and peace among the American nations, it has improved instrumentalities to serve the twenty-two republics of this hemisphere.

I am glad to say that the action of the United States in its desire to remove imminent danger of boundary dispate, with the co-operation of Brazil and the Argentine Republic as joint mediators, lent this government, has already resulted successfully in preventing war. The government of Chile, while not one of the mediators, lent this government, has already resulted successfully in preventing war. The government of frietnation of the government of firetnation between the sister republics of America for the maintanance of peace in this hemisphere has never been more clearly shown than in thi

ments.

source of no little annoyance to the two governments.

The republic of Honduras has for many years been burdened with a heavy bonded debt held in Europe, the interest on which long ago fell in arrears. Finally conditions were such that it became imperative to refund the debt and place the finances of the republic upon a sound basis. Last year a group of American bankers undertook to do this and to advance funds for railway and other improvements contributing directly to the country's properity and commerce—an arrangement which has long been desired by this government. Negotiations to this end have been under way for more than a year, and it is now confidently believed that a short time will suffice to conclude an arrangement which will be satisfactory to the foreign creditors, eminently advantageous to Honduras and highly creditable to the judgment and foresight of the Honduranean government. This is much to be desired, since, as recognized by the Washington conventions, a strong Honduras would tend immensely to the progress and prosperity of Central America, was the Ronublic of Micargana.

Centrel America.

During the past year the Republic of Nicaragua has been the scene of interaccine struggle. Gen. Zelaya, for seventeen years the absolute ruler of Nicaragua, was throughout his career the disturber of Central America and opposed every plan

for the promotion of ocace and friendly relations between the five republics. When the people of Nicarsqua were finally driven into rebellion by his lawless exactions he violated the laws of war by the unwarranted execution of two American citi-

the unwarranted execution of two American citizens who had regularly enlisted in the ranks of the revolutionists,

This and other offenses made it the duty of the American government to take measures with a view to ultimate reparation and for the safeguarding of its interests. This involved the breaking off of all diplomatic relations with the Zelaya government for the reasons laid down in a communication from the secretary of state, which also notified the contending factions in Nicaragua that this government would hold each to strict accountability for cutrages on the rights of American citizens. ity for outrages on the rights of American citizens. American forces were sent to both coasts of Nicaragua to be in readiness should occasion arise to protect Americans and their intervets and remained there until the war was over and peace had returned to that unfortunate country. These events, together with Zelaya's continued exactions, brought him so clearly to the bar of public oplicion that he was forced to resign and to take refuge about. refuge abroad.

ion that he was forced to resign and to take refuge aboust.

In the above-mentioned communication of the secretary of state to the charge d'affaires of the Selaya government the opinion was expressed that the revolution represented the wishes of the majority of the Nicaraguan people. This has now been proved beyond doubt by the fact that since the complete overthrow of the Madriz government and the occupation of the capital by the forces of the revolution all factions have united to maintain public order, and, as a result of discussion with an agent of this government, sent to Managua at the request of the provisional government, comprehensive plans are being made for the future welfare of Nicaragua, including the rehabilitation of public credit. The moderation and conciliatory spirit shown by the various factions give ground for the confident hope that Nicaragua will soon take its rightful place among the law-abiding and progressive countries of the world.

It gratifies me exceedingly to announce that the Argentine Republic some months ago placed with American naturfacturers a contract for the construction of two battleships and certain additional naval equipment. The extent of this work and its importance to the Argentine Republic make the placing of the bid an earnest of friendly feeling toward the United States.

TABLIFF ISSUES ADJUSTED.

#### TARIFF ISSUES ADJUSTED.

The new tariff law, in section 2, respecting the maximum and minimum tariffs of the United States, which provisions came into effect on April 1, 1910, imposed upon the president the responsibility of determining prior to that date whether or not any undue discrimination existed against the United States and its products in any country of the world with which we sustained commercial relations.

of the world with which we sustained commercial relations.

In the case of several countries instances of aparent undue discrimination against American commerce were found to exist. These discriminations were removed by negotiation. Prior to April 1, 1910, when the maximum tariff was to come into operation with respect to importations from all those countries in whose favor no proclamation applying the minimum tariff should be issued by the president, 134 such proclamations were issued. This series of proclamations embraced the entire commercial world, and hence the minimum tariff of the United States has been given universal application, thus testifying to the satisfactory character of our trade relations with foreign countries. Marked advantages to the commerce of the United States, were obtained through these tariff settlements. Foreign nations are fully cognizant of the fact that under section 2 of the tariff act the president is required, whenever he is satisfied that the treatment accorded by them to the proclamation, giving ninety days' notice, after which he maximum tariff will apply to their dullable products of the inited States, to their dullable products of the section of the tariff law has

thus far proved a guaranty of continued commercial pence, although there are, unfortunately, instances where foreign governments deal a bitrarily with American interests within their jurisdiction in a manner minimous and inequitable.

The policy of boader and closer trade relations with the dominion of Canada, which was initiated in the adjustment of the maximum and minimum provisions of the tariff act of August, 1909, has proved mutually beneficial. It justifies further efforts for the readjustment of the commercial relations of the two countries so that their commerce may follow the channels natural to contiguous countries and be commensurate with the steady expansion of trade and industry on both sides of the boundary line. The reciprocation on the part of the dominion government of the sentiment which was expressed by this government was followed in October by the suggestion that it would be glad to have the negotiations, which had been

ment which was expressed by this government was followed in October by the suggestion that it would be glad to have the negotiations, which had been temporarily suspended during the summer, resumed. In accordance with this suggestion the secretary of state, by my direction, dispatched two representatives of the department of state as special commissioners to Ottawa to confer with representatives of the dominion government. They were authorized to take such steps for formulating a reciprocal trade agreement as might be necessary and to receive and consider any proposition which the dominion government might care to submit. Pursuant to the instructions issued conferences were held by these commissioners with officials of the dominion government at Ottawa in the early part of November. The negotiations were conducted on both wides in a spirit of mutual accommodation. The discussion of the common commercial interests of the two countries had for its object a satisfactory basis for a trade arrangement which offers the prospect of a freer interchange for the products of the United States and of Canada. The conferences were adjourned to be resumed in Washington in January, when it is hoped that the aspiration of both governments for a mutually advantageous measure of reciprocity will be realized.

All these tariff negotiations so vital to our com-

realized.

All these tariff negotiations so vital to our commerce and industry and the duty of jealously guarding the equitable and just treatment of our products, capital and industry abroad, devolve upon the department of state.

The Argentine battleship contracts, like the subsequent important one for Argentine railway equipment, and those for Cuban government vessels, were secured for our manufacturers largely through the good offices of the department of state.

through the good offices of the department of state.

The efforts of that department or state. The efforts of that department to secure for citlrens of the United States equal opportunities in
the markets of the world and to expand American
commerce have been most successful. The volume
of business obtained in new fields of competition
and upon new lines is already very great and congress is urged to continue to support the department of state in its endeavors for further trade

expansion.
Our foreign trade merits the best support of the government and the most earnest endeavor of our manufacturers and merchants, who, if they do not already in all cases need a foreign market, are certain soon to become dependent on it. Therefore, now is the time to secure a strong position in this field.

this field. I cannot leave this subject without emphasizing the necessity of such legislation as will make possible and convenient the establishment of American banks and branches of American banks in foreign countries. Only by such means can our foreign trade be favorably financed, necessary credits be arranged and proper avail be made of commercial opportunities in foreign countries, and most especially in Latin America.

#### DEMANDS MERCHANT MARINE.

Another instrumentality in lispensable to the unhampered and natural development of American commerce is merchant marine. All maritime and commercial nations recognize the importance of this factor. The greatest commercial nations, our competitors, jealously foster their merchant marine. Peilaps howhere is the need for rapid and direct mil. passenger and freight communication quite so urgent as between the United States and

Latin America. We can secure in no other quarter of the world such immediate benefits in friendship and commerce as would flow from the establishment of direct lines of communications with the countries of Latin America adequate to meet the requirements of a rapidly increasing appreciation of the reciprocal dependence of the countries of the western hemisphere upon each other's products, sympathics and assistance.

I alluded to this most important subject in my last annual message; it has often been before you and I need not necepitulate the reasons for its recommendation. Unless prompt action be taken the completion of the Panama canal will find this the only great commercial nation unable to avail in international maritime business of this great contribution to the means of the world's commercial intercourse.

intercourse

contribution to the means of the world's commercial intercourse.

Call intercourse, we create a merchant marine, where can we find the seafaring population necessary as a natural naval reserve and where could we find, in case of war, the transports and subsidiary vessels without which a naval fleet is arms without a body? For many reasons I cannot too strongly urge upon the congress the passage of a measure, by mail subsidiary or other subvention, adequate to guarantee the establishment and rapid development of an American merciant marine, the restoration of the American dag to its ancient place upon the seas. Of course such aid ought only to be given under condition of publicity of each beneficiary's business of course such aid ought only to be given under condition of publicity of each beneficiary's business and accounts which would show that the aid received was needed to maintain the trade and was properly used for that purpose.

With our increasing international intercourse it becomes incumbent upon me to repeat more emphatically than ever the recommendation which I made in my inaugural address, that congress shall at once give to the courts of the United States jurisdiction to punish as a crime the volation of the rights of aliens secured by treaty with the United States in order that the general government of the United States shall be able, when called up by a friendly nation, to redeem its solvmn promise by treaty to secure to the citizens or subjects of that incline resident in the United States for that incline resident in the United States for that incline resident in the United States for that the general government of the United States dead in the United States for that the general government of the United States dead in the United States for the United States for that the general government of the United States and the united States for the United States for the United States for the United States for the United States for the United States for the United States for the United States for the Unit from violence and due process of law in respect to their life, liberty and property.

#### DIPLOMATIC MERIT PLAN.

I also, and for the same general reasons, strongly commend to the favorable action of the congress the enactment of a law applying to the diplomatic and consular service the principles embodied in section 1783 of the revised statutes of the United States, in the civil-service act of Jan. 16, 1883, and the executive orders of June 27, 1906, and of Nov. 26, 1909.

and the executive orders of June 27, 1806, and of Nov, 26, 1809.

The excellent results which have attended the partial application of civil-service principles to the diplomatic and consular services are an earnest of the benefit to be wrought by a wider and more permanent extension of those principles to both branches of the foreign service. The marked improvement in the consular service during the four years since the principles of the civil-service act were applied to that service in a limited way, and the good results already noticeable from a similar application of civil-service principles to the diplomatic service a year ago, convince me that the enactment into law of the general principles of the existing executive regulations could not fail to effect further improvement of both branches of the foreign service, offering as it would by its assurance of permanency of tenure and promotion on merit an inducement for the entry of capable young men into the service and an incentive to those already in to put forth their best efforts to attain and maintain that degree of efficiency which the interests of our international relations and commerce demand merce demand

merce demand
Durling many years past sopeals have been made from time to time to congress in favor of government ownership of embassy and legation premises abroad. The arguments in favor of such ownership have been many and off repeated and are well known to the congress. The acquisition by the government of suitable residences and offices for tist diplomatic officers, especially in the capitals of the Latin-American states and of Europe, is so

important and necessary to an improved diplomatic service that I have no hesitation in urging upon the congress the passage of some measure similar to that favorably reported by the house committee on foreign affairs on Feb. 14, 1910 (report No. 438), that would authorize the gradual and annual acquisition of premises for diplomatic use.

The work of the diplomatic service is devoid of partisanship; its importance should appeal to every American citizen and should receive the generous consideration of the congress.

The work of the dipiomatic service is devoid of partisanship; its importance should appeal to every American citizen and should receive the generous consideration of the congress.

ECONOMY THE WATCHWORD.

Every effort has been made by each department chief to reduce the estimated cost of his department for the ensuing fiscal year ending June 10, 1912. It say this in order that congress may understand that these estimates thus made present the smallest sum which will maintain the departments, bureaus and offices of the government and meet its other obligations under existing law, and that a cut of these estimates would result in embarrassing the executive branch of the government in the performance of its duties. This remark does not apply to the river and harbor estimates, except to those for experses of maintenance and the meeting of obligations under authorized contracts, nor does it apply to the public building bill nor to the navy building programme. Of course, as to these congress could withhold any part or all of the estimates for them without interfering with the discharge of the ordinary obligations of the government or the performance of the functions of its departments, bureaus and offices.

The final estimates for the year ending June 30, 1912, as they have been sent to the treasury on Nov. 29 of this year, for the ordinary expenses of the government, including those for public buildings, rivers and harbors, and the navy building programme, amount to \$630,494,013,12. This is \$22,964,887,36 less than the appropriations for the fiscal year ending June 30, 1911. It is \$16,883,153.44 less than the total estimates, including supplemental estimates, submitted to congress by the treasury for the year 1911, and is \$5,574,659,39 less than the original estimates submitted by the treasury for the year and effectively expended in order to complete the canal as promptly as possible, and, therefore, the ordinary motive for cutting down the expenses of the government does not apply to appropriations for this year a

TREASURY REFORMS.

THEASURY REFORMS.

The treasury department is one of the original departments of the government. With the changes in the monetary system made from time to time and with the creation of national banks, it was thought necessary to organize new bureaus and divisions, which were added in a somewhat haphazard was and resulted in a duplication of duties which might well now be ended.

This lack of system and economic co-ordination has attracted the attention of the head of that department, who has been giving his time for the last two years, with the aid of experts and by

consulting his bureau chiefs, to its reformation; he has abolished 400 places in the civil service without at all injuring its efficiency, and at the risk of being tedious, but merely to illustrate the character of the reforms that are possible, I shall comment on a number of changes that are being made or ought to be made by legislative aid.

The auditing system in vogue is as old as the government and the methods used are antiquated. government and the methods used are antiquated. There are six auditors and seven assistant auditors for the nine departments, and under the present system the only function which the auditor of a department exercises is to determine, on accounts presented by disbursing officers, that the object of the expenditure was within the law and the appropriation made by congress for the purpose on its face, and that the calculations in the accounts are correct. He does not examine the merits of the transaction or determine the reasonableness of the price paid for the articles purchased, nor does he furnish any substantial check upon disbursing officers and the heads of departments or barceus with sufficient promptness to enments or bureaus with sufficient promptness to enable the government to recoup itself in full measure for unlawful expenditure.

wre for unlawful expenditure.

A careful plan is being devised and will be presented to congress with the recommendation that the force of auditors and employes under them be greatly reduced, thereby effecting substantial economy. But this economy will be small compared with the larger economy will be small compared with the larger economy will be small compared with the larger economy will be small compared by consolidation and change of metnods. The possibilities in this regard have been shown in the reduction of expenses and the importance of methods and efficiency in the office of auditor for the post-office department, who, without in the slightest degree impairing the comprehensiveness and efficiency of his work, has cut down the expenses of his office \$120,600 a year.

Again, in the collection of the revenues, especially the customs revenues, a very great improvement has been effected, and further improvements are contemplated. By the detection of frauds are contemplated. By the detection of frauds in weighing sugar upward of \$3,400,000 has been recovered from the beneficiarles of the fraud, and an entirely new system fixed out the possibilities of such abuse has been recovered from the possibilities.

weighing sugar upward of \$3,400,000 has been recovered from the beneficiaries of the fraud, and an entirely new system free from the possibilities of such abuse has been devised. The department has perfected the method of collecting duties at the port of New York so as to save the government upward of \$10,000,000 or \$11,000,000, and the same spirit of change and reform has been infused into the other customs offices of the country. The methods used at many places are archaic. There would seem to be no reason at all why the surveyor of the port, who really acts for the collector, should not be a subordinate of the collector, should not be a subordinate of the collector, should not be a subordinate of the collector, at a less salary and directly under his control, and there is but little reason for the existence of the naval officer, who is a kind of local auditor. His work is mainly an examination of accounts, which is conducted again in Washington and which results in no greater security to the government. The naval officers in the various ports are presidential appointees, many of them drawing good salaries, and those offices should be abolished or with reduced force made part of the central auditors assets. with reduced force made part of the central audit-

ing system.

There are entirely too many customs districts and too many customs collectors. These districts should be consolidated and the collectors in charge of them, who draw good salaries, many of them out of proportion to the collections made, should be abolished or treated as mere branch offices, in ne adolisate or treated as mere branch offices, in accordance with the plan of the treasury department, which will be presented for the consideration of congress. As an illustration, the cost of collecting \$1 of revenue at typical small ports like the port of York, Me., was \$50.04. At the port of Annapolis, Md., it cost \$309.41 to collect \$1 of revenue; at Natchez, \$52.76; at Alexandria, Va., \$129.49 \$122.49.

\$122.49.

It is not essential to the preventing of smuggling that customs districts should be increased in number. The violation of the customs laws can be quite as easily prevented and much more economically by the revenue-cutter service and by the use of the special agent traveling force of the treasury department. A reorganization of the special customs agents has been perfected with a view to retaining only those who have special knowledge of the customs laws, regulations and usual

## STATEMENT OF ESTIMATES OF APPROPRIATIONS FOR THE FISCAL YEARS 1913 AND 1911 AND OF APPROPRIATIONS FOR 1911, SHOWING INCREASES AND DECREASES.

methods of evasion, and with this improvement there will be no danger to the government from the recommended consolidation and abolition of customs districts.

the recommended consolidation and abolition of customs districts.

An investigation of the appraising system now in rogue in New York city has shown underappraisement and a sacrifice of the interests of the government, which is in the curse of being remedied by reorganization and the employment of competent experts. Prosecutions have been instituted growing out of the frauds there discovered and are now awaiting hearing in the federal courts.

Very great improvements have been made in respect to the mints and assay offices. Diminished appropriations have been asked for those whose continuance is unnecessary, and this year's estimate of expenses is \$226,000 less than two years ago. There is an opportunity for further saving in the abcilition of several mints and assay offices that have now become unnecessary. During the last year 100 unnecessary employes have been dropped from the Philadelphia mint. Modern machinery has been installed there, more and better work has been done and the appropriations have been consequently diminished. been consequently diminished.

In the bureau of engraving and printing great economies have been effected. Useless divisions have been abolished with the result of saving \$440.000 this year in the total expenses of the bureau, despite increased business.

The treusurer's office and that of the division of public moneys in part cover the same functions, and this is also true of the office of the register and the division of loans and currency. Plans for the elimination of the duplication in these offices will be presented to congress.

The office of the compitoller of the currency is one most important in the preservation of proper banking methods in the national banking system of the United States, and the present compitoller has impressed his subordinates with the necessity of so conducting their investigations as to establish the principle that every bank failure is unnecessary because proper inspection and notice of threat-ning conditions to the responsible directors and officers can prevent it.

In our public buildings we still suffer from the method of appropriation, which has been so much criticised in connection with our rivers and harbors. Some method should be devised for control-

CHICAGO DAILY NEWS ALMAN Hing the supply of public buildings, so that they will harmonize with the actual needs of the government. Not only are buildings appropriated for by congress which are not needed and buildings left unappropriated for by congress which are not needed, but when it comes to the actual construction there has been in the past too little study of the building plans and sites with a view to the actual needs of the government. Postoffice buildings which are in effect warehouses for the economical handling of transportation of thousands of tons of mail have been made monumental structures, and often located far from the construction of the buildings a closer scrutiny of the methods employed by the government architects or by architects employed by the government have resulted in decided economies. It is hoped that more time will give opportunity for a more thorough reorganization of the ultimate expenditure of \$33,011,500, and I approved it because of the many good features it contained, just as I approved the river and harbor bill, but it was drawn upon a principle that ought to be abandoned. It seems to me that the wiser method of preparing a public building bill continued to be abandoned. It seems to me that the wiser method of preparing a public buildings in every part of the construction of public buildings in every part of the construction of public buildings in every part of the construction which I have army engineers make report with reference to the utility of proposed improvements in rivers and harbors, with the added function which I have recommended for the army engineers of including in their recommendation the relative importance of the various projects found to be worthy of approval and execution.

As the treasury denartment is the one through

# PRAISES THE TARIFF BILL

PRAISES THE TARIFF BILLs

As the treasury department is the one through which the income of the government is collected and its expenditures are disbursed, this seems proper place to consider the operation of the existing tariff bill, which became a law Aug. 6, 1000.

As an income-producing measure, the existing tariff bill has never been exceeded by any customs bill in the history of the country.

The corporation excise tax, proportioned to the net income of every business corporation in the country, has worked well. The tax has been easily collected. Its prompt payment indicates that the incidence of the tax has not been heavy. It offers, moreover, an oportunity for knowledge by the government of the general condition and business of all corporations, and that means by far the most important part of the business of the rountry. In the original act provision was made two subsequently amended by congress and that matter left to the regulation of the president. I have directed the issue of the needed regulations and have made it possible for the public generally are made it possible for the public generally are made it possible for the public generally in from any public stock exchange or is offered for sale to the general public by advertisement or otherwise. The returns of those corporations whose stock is not so listed or offered for sale are directed to be open to the inspection and examination of creditors and stockholders of the corporation whose record is sought. The returns of all corporations are subject to the inspection of any government officer or to the examination of any court in which the return made by the corporation is relevant and competent evidence.

The schedules of the rates of duty in the Payne tariff act have been subjected to a great deal of criticism, some of it just, more of it unfounded and to much misrepresentation. The act was should be a tariff for the protection to be the difference between the cost of producing the imported article abroad and the cost of producing the home produc

this tariff is that in respect to a number of the schedules the declared measure was not followed, but a higher difference retained or inserted by way of undue discrimination in favor of certain industries and manufactures. Little, if any, of the criticism of the tariff has been directed against the protective principle above stated, but the main body of the criticism has been based on the charge that the attempt to conform to the measure of protection was not honestly and sincerely adhered to.

The time in which the tariff was prepared undoubtedly was so short as to make it impossible for the congress and its experts to acquire the information necessary strictly to conform to the declared measure. In order to avoid criticism of this kind in the future and for the purpose of more nearly conforming to the party promise, congress at its last session made provision, at my request, for the continuance of a board created under the authority of the maximum and minimum clause of the tariff bill and authorized this board to expend the money appropriated under my direction for the ascertainment of the cost of production at home and abroad of the various articles included in the schedules of the tariff. The tariff board thus appointed and authorized has been diligent in preparing itself for the necessary investigations.

included in the schedules of the tariff. The tariff board thus appointed and authorized has been dillipent in preparing itself for the necessary investigations.

The hope of those who have advocated the use of this board for tariff purposes is that the question of the rate of a duty imposed shall become more of a business question and less of a political question, to be ascertained by experts of long training and accurate knowledge. The halt in business and accurate knowledge. The halt in business and the shock to business, due to the announcement that a new tariff bill is to be prepared and put in operation, will be avoided by treating the schedules one by one as occasion shall arise for a change in the rates of each, and only after a report upon the schedule by the tariff board competent to make such report. It is not likely that the board will be able to make a report during the present session of congress on any of the schedules, because a proper examination involves an enormous amount of detail and a great deal of care, but I hope to be able at the opening of the new congress, or at least during the session of that congress, to bring to its attention the facts in regard to those schedules in the present tariff that may prove to need amendment.

The carrying out of this plan, of course, involves the full co-operation of congress in limiting the consideration in tariff matters to one schedule at a time, because if a proposed amendment to a tariff bill is to livolve a complete consideration of all the schedules and another revision, then we shall only repeat the evil from which the business of this country has in times past suffered most grievously by stagnation and uncertainty, pending a resettlement of a law affecting all business directly or indirectly, and the effect of which no wise business man would ignore in new projects and new investments. I cannot too much emphasize the importance and benefit of the pla above proposed for the treatment of the teriff. It facilitates the removal of noteworthy defects

ber is convenient, but I do not know that an increase of two members would be objectionable. Whether or not the protective policy is to be continued and the degree of protection to be accorded to cur home industries are questions which the people must decide through their chosen representatives, but whatever policy is adopted it is clear that the necessary legislation should be based on an impartial, thorough and continuous study of the fets. the facts.

## FAVORS CURRENCY STUDY.

FAVORS CURRENCY STUDY.

The method of impartial sclentific study by experts as a preliminary to legislation, which I hope to see ultimately adopted as our fixed national policy with respect to the tariff, rivers and harbors, waterways and public buildings, is also being pursued by the nonpartisan monetary commission of congress. An exhaustive and most valuable study of the banking and currency systems of foreign countries has been completed.

A comparison of the business methods and institutions of our powerful and successful commercial rivals with our own is sure to be of immense value. I urge upon congress the importance of a nonpartisan and disinterested study and consideration of our bunking and currency system. It is idle to dream of commercial expansion and of the development of our national trade on a scale that measures up to our matchiess opportunities unless we can lay a solid foundation in a sound and enduring banking and currency system. The problem is not partisan, is not sectional—it is national.

ARMY SMALL FOR NATION.

#### ARMY SMALL FOR NATION.

ARMY SMALL FOR NATION.

The war devartment has within its jurisdiction the management of the army, and, in connection therewith, the coast defenses; the government of the dependencies of the Philippines and of Porto Rico; the recommendation of plans for the improvement of harbors and waterways and their execution when adopted; and, by virtue of an executive order, the supervision of the construction of the Panama canal.

The army of the United States is a small body compared with the total number of people for the preservation of whose peace and good order it is a last recourse. The army now numbers about 80,000 men, of whom about 18,000 are engaged in the coast artillery and detailed to the management and use of the guns in the forts and batteries that protect our coasts. The rest of the army, or about 60,400, is the mobile part of our national orces and is divided into thirty-one regiments of infantry, including the Porto Rican regiment, fiften regiments, or cavalry, six regiments of field artillery, a corps of ordnance, of engineers and of signal, a quarternaster's department, a commissary department and a medical corps.

The general plan for an army of the United

teen regiments of cavalry, six regiments of field artillery, a corps of ordnance, of engineers and of signal, a quartermaster's department, a commissary department and a medical corps.

The general plan for an army of the United States at pence should be that of a skeleton organization, with an excess of trained officers and thus cryable of rapid enlargement by enlistments, to be supplemented in emergency by the national militia and a volunteer force. In some measure this plan has been adopted in the very large proportion of cavalry and field artillery as compared with infantry in the present army and on a peace basts. An infantry force can be trained in six months: a cavalry or a light artillery force not under one and one-half or two years; hence the importance of having ready a larger number of the more skilled soldiers.

The militia system, for which congress by the constitution is authorized to provide was developed by the so-called Dick law, under which the uniform and the various branches of the militia are assimilated as far as possible to those of the recular army. Under the militia law, as the constitution provides, the governors of the states appoint the militia officers, but, by appropriations from congress, states have been induced to comply with the rules of assimilation between the regular army and the holilita, so that now there is a force, which could be incorporated under a single command with the regular army, and which for some time each year receives the benefit of drill and maneuvers under conditions approximating actual military service, under the supervision of regular army officers.

In the army of the United States, in addition to the regular forces and the militia forces which may be summoned to defense of the nation by the president, there is also the volunteer force, which made up a very large part of the army in the civil war, and which in any war of long continuance would become its most important constituent. There is an act which dates from the civil war, known as the volunteer act, which makes provision for the enlistment of volunteers in the army of the United States in time of war. This was found to be so defective in the Philippine war that a special act for the organization of volunteer regiments to take part in that war was adopted, and it was much better adapted to the necessities of the case. In the army of the United States, in addition to

of the case.

There is now pending in congress a bill repealing the present volunteer act and making provision for the organization of volunteer forces in time of war which is admirably adapted to meet the exigencies which would be then presented. The parsage of the bill would not entail a dollar's expense upon the government at this time or in the future, until war comes, but when war does come the methods therein directed are in accordance with the best military judgment as to what they ought to be, and the act would prevent the necessity for the discussion of new legislation and the delays incident to its consideration and adoption. I carnestly urge the passage of this volunteer bill.

I further recommend that congress establish a

I further recommend that congress establish a commission to determine as early as practicable a comprehensive policy for the organization, mobilization and administration of the regular army, the organized militia and the volunteer forces in the event of war.

One of the great difficulties in the prompt organization and mobilization of militia and volunteer forces is the absence of competer officers of the rank of captain to teach the new army, by the ther forces is the absence of competent omeers of the rank of captain to teach the new army, by the unit of the company, the business of being soldiers and of taking care of themselves so as to render effective scruice. This need of army officers can only be supplied by provisions of law authorizing the appointment of a greater number of army officers that are needed to supply the commands of regular army troops now enlisted in the service. There are enough regular army officers to command the troops now enlisted, but congress has authorized and the department has followed the example of congress and exercised the authority conferred by detailing these army officers to duty other than that of the command of troops. For instance, there are a large number of army officers assigned to duty with military training is given. Then a large number of officers are assigned to general staff duty, and there are various other places to which army officers can be and are legally assigned which take them away from their regiments and companies. companies.

companies

In a second with the militia of each state should be properly drilled and made more like the regular army, regular army officers should be detailed to assist the adjutant-general of each state in the supervision of the state militia, but this is impossible unless privision is made by congress for a very considerable ircrease in the number of company and field officers of the army. A bill was pending in the last session of congress for this rurnose, and I cannestly hope that, in the interest of the proper development of a republican army, an army small in the time of peace, but possible of prompt and adequate enlargement in time of war, shall become possible under the laws of the United States

A bill, the strong argument for which can be

United States

A bill, the strong argument for which can be based on the ground quite similar to that of the increased-officers bill, is the bill for the increase of sixty in the army engineers. The army engineers are largely employed in the expenditure of the moneys appropriated for the improvement of rivers and harbors. This, in addition to their military duties, which include the construction of fortifications both of our coasts and in our dependencies, together with the number used in the Fanama canal work, requires many more engineers than the army has, and this shortness of supply in such officers delays important river and harbor

work and important fortification work. I earnestly recommend the passage of this bill, which passed the house at the last session and is now pending in the senate.

## TO STRENGTHEN PHILIPPINES.

TO STRENGTHEN PHILIPPINES.

I have directed that the estimates for appropriation for the improvement of coast defenses in the United States should be reduced to a minimum, while those for the completion of the needed fortifications at Corregidor in the Philippine islands and at Pearl Harbor in the Hawiian islands should be expedited as much as possible. The proposition to make Olongapo and Subig bay the naval base for the Pacific was given up, and it is to be treated merely as a supply station, while the fortifications in the Philippines are to be largely confined to Corregidor island and the adjacent islands which command the entrance to Manila bay ata which are being rendered impregnable from land and sea attack. The Pacific naval base has been transferred to Pearl Harbor in the Hawiian islands. This necessitates the heavy fortification of the harbor and the establishment of an important military station near Honolulu. I urge that all the estimates made by the war department for these purposes be approved by congressional appropriation.

During the last summer, at my request, the sectory of war visited the Bullinghue islands and

During the last summer, at my request, the secretary of war visited the Philippine islands and has described his trip in his report. He found the islands in a state of tranquillity and growing prosperity, due largely to the change in the tariff laws, which has opened the markets of America to the products of the Philippines and has opened the Philippine markets to American manufactures. The rapid increase in the trade between the wo countries is shown in the following table:

#### PHILIPPINE EXPORTS, FISCAL YEARS 1908-1910. (Exclusive of gold and silver.)

## PROSPERITY IN PORTO RICO.

PROSPERITY IN PORTO RICO.

The year has been one of prosperity and progress in Porto Rico. Certain political changes are embodied in the bill "To provide a civil government for Porto Rico and for other purposes," which passed the house of representatives on June 15, 1910, at the last session of congress, and is now awaiting the action of the senate.

The importance of those features of this bill relating to public health and sanitation cannot be overestimated. The removal from politics of the municipal judges is excellent, and I recommend that a step further be taken by providing therein for the appointment of secretaries and marshals of these courts.

tor the appointment of secretaries and marshals of these courts.

I believe that the provision in the bill for a partially elective senate, the number of elective members being progressively increased, is unwise, and that the composition of the senate as provided in the bill as introduced in the house far better meets conditions existing in Porto Rico. This is an important measure, and I recommend its early consideration and message. consideration and passage.

I have already expressed my opinion to congress in respect to the character of the river and harbor bills which should be enacted into law, and I have exercised as much power as I have under the law in directing the chief of engineers to make his reports to congress conform to the needs of the committee framing such a bill in determining which of the proposed improvements is the more important and ought to be completed first and promptive first, and promptly.

#### THE PANAMA CANAL

At the Instance of Col. Goethals, the army engineer officer in charge of the work on the Panama canal, I have just made a visit to the istimus to inspect the work done and to consult with him on the ground as to certain problems which are likely to arise in the near future. The progress of the work is most satisfactory. If no unexpected obstacle presents itself the canal will be completed well within the time fixed by Col. Goethals, to wit, Jan. I. 1915, and within the estimate of cost, \$375,000,000.

Press reports have reached the United States

completed well within the time fixed by Col. Goethals, to wit. Jan. 1, 1915, and within the estimate of cost, \$375,000,000.

Press reports have reached the United States from time to time giving accounts of slides of earth of very large yardage in the Culebra cut and elsewhere along the line, from which it might be inferred that the work has been much retarded and that the time for completion has been necessarily postponed.

The report of Dr. Hayes of the geological survey, whom I sent within the last month to the isthmus to make an investigation, shows that this section of the canal zone is composed of sedimentary rocks of rather weak structure and subject to almost immediate disintegration when exposed to the air. Subsequent to the deposition of these sediments, igneous rocks, harder and more durable, have been thrust into them, and being cold at the time of their intrusion united but indifferently with the sedimentary rock at the contacts. The result of these conditions is that as the cut is deepened, causing unbalanced pressures, slides from the sides of the cut have occurred. These are in part due to the flowing of surface soil and decomposed sedimentary rocks upon inclined surfaces of the underlying undecomposed rock and in part to the drustling of structurally weak beds under excessive pressure.

These slides occur on one side or the other of the cut through a distance of four or five miles, and now that their character is understood allowance has been made in the calculations of yardage for the amount of slides which will have to be removed and the greater slope that will have to be removed and the greater slope that will have to be removed from this cut on an average of each month through the year is 1,300,000 and that the total remaining to be excavated, not offer any great reason for delay.

While this feature of the material to be excavated in the cut will not seriously delay or obstruct the construction of a canal of the lock type, the increase of excavation due to such slides in the cut made eight

struct the construction of a canal of the lock type, the increase of excavation due to such sildes in the cut made eighty-five feet deeper for a sealevel canal would certainly have been so great as to delay its completion to a time beyond the patience of the American people.

Among questions arising for present solution is the decision whether the canal shall be fortified. I have already stated to the congress that I strongly favor fortification and I now reiterate this opinion and ask your consideration of the subject in the light of the report already before you made by a competent board. competent board.

competent board.

If, in our discretion, we believe modern fortifications to be necessary to the adequate protection and policing of the canal, then it is our duty to construct them. We have built the canal. It is our property. By convention we have indicated our desire for, and, indeed, undertaken its universal and equal use. It is also well known that one of the chief objects in the construction of the canal has been to increase the military effectiveness of our pays.

ness of our navy.

Failure to fortify the canal would leave the at-

tainment of both these aims in the position of rights and obligations which we should be power-less to enforce and which could never in any other

tainment of both these aims in the position of rights and obligations which we should be powerless to enforce and which could never in any other way be absolutely safeguarded against a desperate and irresponsible enemy.

Another question which arises for consideration and possible legislation is the question of toils in the canal. This question is necessarily affected by the probable tomnage which will go through the canal. It is all a matter of estimate, but one of the government commission in 1900 investigated the question and made a report. He concluded that the total tonnage of the vessels employed in commerce that could use the isthmian canal in 1914 would amount to 6.843,805 tons net register, and that this traffic would increase 25.1 per cent per decade; that it was not probable that all the commerce included in the totals would at once abandon the routes at present followed and make use of the new canal, and that it might take some time, perhaps two years to readjust trade with reference to the new conditions which the canal would establish. He did not include, moreover, the tonnage of war vessels, although it is to be inferred that such vessels would make considerable use of the canal. In the matter of tolks he reached the conclusion that a dollar a net ton would not drive business away from the canal, but that a higher rate would do so.

In determining what the tolls should be we certainly ought not to insist that for a good many years to come they should amount to chough to pay the interest on the investment of \$400,000,000 which the United States has made in the construction of the canal. We ought not to do this, first, because the benefits to be derived by the United States from this expenditure are not to be measured solely by a return upon the investment. If it were, then the construction might well have been left to private enterprise. It was because an adequate return upon the money invested could not be expected immediately, or in the near future, and because the money and perform the work. In

by the Tehuantepec railroad and by other railroads and freight routes in Central America to the Atlantic side.

In all these cases the question whether the Panama canal is to be used and its tonnage increased will be determined mainly by the charge for its use. My own impression is that the toils ought not to exceed \$1 per net ton. On Jan. 1, 1911, the toils in the Suez canal are to be 7 francs and 25 centimes for one net ton by Suez canal measurement, which is a modification of Danube measurement, of the second of the second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second second se

establishment to have the coal, oil and other ship supplies, a dry dock and repair shop, conveniently located with reference to naval vessels passing through the canal. Now, if the government for naval purposes is to undertake to furnish these conveniences to the navy—and they are conveniences equally required by commercial vessels—here

naval purposes is to undertake to furnish these conveniences to the navy—and they are conveniences to the navy—and they are conveniences quality required by commercial vessels—here would seem to be strong reasons why the government should take over and include in its management the furnishing, not only to the navy but to the public, dry-dock and repair-shop facilities and the sale of coal, oil and other ship supplies.

The maintenance of a lock canal of this enormons size in a sparsely populated country and in the tropics, where the danger from disease is always present, requires a large and complete and well-trained organization with full police powers, exercising the utmost care. The visitor to the canal who is impressed with the wonderful freedom from tropical diseases on the isthmus must not be misled as to the constant vigilance that is needed to preserve this condition. The vast machinery of the locks, the necessary amount of dreiging, the preservation of the banks of the canal from slides, the operation and the maintenance of the equipment of the railway will all require a force, not, of course, to be likened in any way to the present organization for construction, but a skilled body of men who can keep in a state of usefulness this great instrument of commerce. Such an organization makes it easy to include within its functions the furnishing of dry docks, fuel, repairs and supply facilities to the trade of the world. These will be more essential at the isthmus of Panama than they are at Port Said or Suez, because there are no depots for coal, supplies and other commercial necessities within thousands of miles of the isthmus.

Another important reason why these ancillary duties may well be undertaken by the government is the opportunity for discrimination between partons of the canal that is offered where private concessions are granted for the furnishing of these facilities. Nothing would create greater prejudice against the canal than the suspicion that certain lines of the air supplies or that the sup

monopoly

monopoly. I cannot close this reference to the canal without suggesting as a wise amendment to the interstate-commerce law a provision problibiting interstate-commerce railroads from owning or controlling ships engaged in the trade through the Panama canal. I believe such a provision may be needed to save to the people of the United States the benefits of the competition in trade between the eastern and western seaboards which this canal was constructed to secure. canal was constructed to secure.

#### DEPARTMENT OF JUSTICE.

The duties of the department of justice have been greatly increased by legislation of congress enacted in the interest of the general welfare of the people and extending its activities into avenues plainly within its constitutional jurisdiction, but which it has not been thought wise or necessary for the general government heretofore to

occupy.

I am glad to say that under the appropriations made for the department the attorney-general has so improved its organization that a wast amount of litigation of a civil and criminal character has been disposed of during the current year. This will explain the necessity for slightly increasing the estimates for the expenses of the department. His report shows the recoveries made on behalf of the government, of duries fraudulently withheld, public lands improperly patented, fines and penalties for trespassing, prosecutions and convictions under the antifrust law and prosecutions under the interstate-commerce law. I invite especial at-

tention to the prosecutions under the federal law of the so-called "bucket shops" and of those schemes to defraud in which the use of the mall is an essential part of the fraudulent conspiracy, prosecutions which have saved ignorant and weak members of the public and are saving them hundreds of millions of dollars. The violations of the antitrust law present perhaps the most important litigation before the department and the number of cases filed shows the activity of the government in enforcing that statute.

#### NATIONAL INCORPORATION.

In a special message last year I brought to the attention of congress the propriety and wisdom of enacting a general law providing for the incorpo-ration of industrial and other companies engaged in interstate commerce, and I renew my recommenda-

tion in that behalf.

I invite the attention of congress to the great number of claims which, at the instance of con-gress, have been considered by the Court of Claims and decided to be valid claims against the government. The delay that occurs in the pay-ment of the move due under the claims injures the reputation of the government as an honest debtor, and I earnestly recommend that those claims which come to congress with the judgment and ap-proval of the Court of Claims should be promptly paid.

paid.

One great crying need in the United States is cheapening the cost of litigation by simplifying judicial procedure and expediting final judgment. Under present conditions the poor man is at a worful disadvantage in a legal contest with a corporation or a rich opponent. The necessity for the reform exists both in United States courts and in all state courts. In order to bring it about, however, it naturally falls to the general government by its example to furnish a model to all states. A legislative commission appointed by joint resolution of congress to revise the procedure in the United States courts has as yet made no report.

report.
Under the law the Supreme court of the United Under the law the Supreme court of the United States has the power and is given the duty to frame the equity rules of procedure which are to obtain in the federal courts of first instance. In view of the heavy burden of pressing litigation which that court has had to carry, with one or two of its members incapacitated through ill health, it has not been able to take up problems of improving the equity procedure, which has practically remained the same since the organization of the court in 1789. It is reasonable to expect that, with all the vacancies upon the court filled, it will take up the question of cheapening and simplifying the procedure in equity in the courts of the United States. The equity business is much the more important in the federal courts, and I may add much the more expensive. I am strongly convinced that the best method of improving Judicial procedure at law is to empower the Supreme

may add much the more expensive. I am strongly convinced that the best method of improving judicial procedure at law is to empower the Supreme court to do it through the medium of the rules of the court, as in equity. This is the way in which it has been done in England, and thoroughly done. The simplicity and expedition of procedure in the English courts to-day make a model for the reform of other systems.

Several of the lord chancellors of England and of the chief justices have left their lasting impress upon the history of their country by their constructive ability in proposing and securing the passage of remedial legislation effecting law reforms. I cannot conceive any higher duty that the Supreme court could perform than in leading the way to a simplification of procedure in the United States courts.

No man ought to have, as a matter of right, a review of his case by the Supreme court. He should be satisfied by one hearing before a court of first instance and one review by a court of appeals. The proper and chief usefulness of the Supreme court, and especially of the Supreme Court of the United States, is, in the cases which come before it, so to expound the law, and especially the fundamental law—the constitution—as to furnish precedents for the inferior courts in future litigation and for the executive officers in the construction of statutes and the performance of

their legal duties. Therefore, any provisions for review of cases by the Supreme court that cast upon that court the duty of passing on questions of evidence and the construction of particular forms of instrument, like indictments, or wills, or contracts, decisions not or general application or importance, merely clog and burden the court and render more difficult its higher function, which makes it so important a part of the framework of our government. The Supreme court is now carrying an unnecessary burden of appeals of this kind, and I carnestly urge that it be removed.

The statutes respecting the review by the Supreme Court of the United States of decisions of the Court of Appeals of the District of Columbia ought to be so amended as to place that court in the same position with respect to the review of its decisious as that of the various United States Circuit Courts of Appeals. The act of March 2, 1907, authorizing appeals by the government from certain judgments in criminal cases where the defendant has not been put in jeopardy, within the meaning of the constitution, should be amended so that such appeals should be taken to the Circuit Courts of Appeals instead of to the Supreme court in all cases except those involving the construction of the constitution or the constitutionality of a statute, with the same power in the Supreme court to review on certiorari as is now exercised by that court over determinations of the several Circuit Courts of Appeals.

Appeals in copyright cases should reach final judgment in the Courts of Appeals instead of the Supreme court. as now. The decision of the Courts of Appeals should be made final also in all cases wherein jurisdiction rests on both diverse citizenship and the existence of a federal question, and not as now be reviewable in the Supreme court when the case involves more than \$1,000.

Appeals from the United States court in Porto Rico should also run to the Circuit Court of Appeals of the third circuit instead of to the Supreme court. These suggested change

# INJUNCTION CURB ADVOCATED.

INJUNCTION CURB ADVOCATED.

I wish to renew my urgent recommendation made in my last annual message in favor of the passage of a law which shall regulate the issuing of injunctions in equity without notice in accordance with the best practice now in vogue in the courts of the United States. I regard this of especial importance, first, because it has been promised, and, second, because it will deprive those who now complain of certain alleged abuses in the improper issuing of injunctions without notice of any real ground for further amendment and will take away all semblance of support for the extremely radical legislation they propose, which will be most pernicious if adopted, will sap the foundations of judicial power and legalize that cruel social instrument, the secondary boycott.

I further recommend to congress the passage of the bill now pending for the increase in the sal-aries of the federal judges, by which the chief justice of the Supreme court shall receive \$17,500 and the associate justices \$17,000; the Circuit judges, constituting the Circuit Court of Appeals, shall receive \$10,000 and the District judges \$9,000. These judges exercise a wide jurisdiction and their duries require of them a profound knowledge of the law, great ability in the dispatch of business and care and delicacy in the exercise of their jurisdictions so as to avoid conflict whenever possible between the federal and the state courts.

men who have shown the greatest ability in their professional work at the bar, and it is the poorest economy possible for the government to pay salaries so low for judicial service as not to be able to command the best talent of the legal profession in every part of the country. The cost of living is such, especially in the large cities, that even the salaries fixed in the proposed bill will enable the incumbents to accumulate little, if anything, to support their families after their death. Nothing is so important to the preservation of our country and its beloved institutions as the maintenance of the independence of the judiciary, and next to the life tenure an adequate salary is the most material contribution to the maintenance of independence on the part of our judges.

#### POSTAL BANK SYSTEM.

POSTAL BANK SYSTEM.

At its last session congress made provision for the establishment of savings banks by the post-office department of this government, by which under the general control of trustees, consisting of the postmaster-general, the secretary of the treasury and the attorney-general, the system could be begun in a few cities and towns, and enlarged to cover within its operations as many cities and towns and as large a part of the country as seemed wise. The initiation and establishment of such a system has required a great deal of study on the part of the experts in the postoffice and treasury departments, but a system has now been devised which is believed to be more economical and simpler in its operation than any similar system abroad. Arrangements have been perfected so that savings banks will be opened in some cities and towns on Jan. 1, and there will be a gradual extension of the benefits of the plan to the rest of the country.

the rest of the country.

As 1 have said, the postoffice department is a great business department, and I am glad to note the fact that under its present management principles of business economy and efficiency are being applied. For many years there has been a deficit in the operations of the postoffice department, which has been met by appropriation from the treasury. The appropriation estimated for last year from the treasury over and above the receipts of the department was \$17.500,000. I am glad to record the fact that of that \$17,500,000 estimated for \$11,500,000 were saved and returned to the treasury.

giad to record the last of that of that \$17,500,000 estimated for \$11,500,000 were saved and returned to the treasury.

The personal efforts of the postmaster-general secured the effective co-operation of the thousands of costmasters and other postal officers throughout the country in carrying out his plans of reorganization and retrenchment. The result is that the postmaster-general has been able to make his estimate of expenses for the present year so low as to keep within the amount the postal service is expected to earn.

It is gratifying to report that the reduction in the deficit has been accomplished without any curtailment of postal facilities. On the contrary, the service has been greatly extended during the year in all its branches. A principle which the postmaster-general has recommended and sought to have enforced in respect to all appointments has been that those appointees who have rendered good service should be reappointed. This has greatly strengthened the interest of postmasters throughout the country in maintaining efficiency and economy in their offices, because they believed generally that this would secure for them a further.

tenure.

Upon the recommendation of the postmastergeneral I have included in the classified service all
assistant postmasters, and I believe that this
giving a secure tenure to those who are the most
important subordinates of postmasters will add
much to the efficiency of their offices and an economical administration. A large number of the
fourth-class postmasters are now in the classified
service. I think it would be wise to put in the
classified service the first, second and third class
postmasters. It is more logical to do this than
to classify the fourth-class postmasters, for the
reason that the fourth-class postmasters, for the
reason that the fourth-class postmasters are necessarily
men who must combine some other business with
the postmastership, whereas the first, second and

third class postmasters are paid a sufficient amount to justify the requirement that they shall have no other business and that they shall devote their attention to their postoffice duties.

To classify first, second and third class postmasters would require the passage of an act chauging the method of their appointment so as to take away the necessity for the advice and consent of the senate. I am aware that this is inviting from the senate a concession in respect to its quasi-executive power that is considerable, but I believe it to be in the interest of good administration and efficiency of service. To make this change would take the postmasters out of politics; would relieve congressmen who now are burdened with the necessity of making recommendations for these places of a responsibility that must be irksome and can create nothing but trouble; and it would result in securing from postmasters greater attention to business, greater fidelity and consequently greater economy and efficiency in the postoffices which they conduct.

The unrestricted manner in which the franking privilege is now being used by the several federal services and by congress has laid it open to serious abuses, a fact clearly established through investigations recently instituted by the department. While it has been impossible without a better control of franking to determine the exact expense to the government of the practice, there can be notoubt that it annually reaches into the millions. It is believed that many abuses of the franking system could be prevented, and consequently a marked economy effected, by supplying through the agencies of the postal service special official envelopes and stamps for the free mail of the government, all such envelopes and stamps to be issued on requisition to the various branches of the federal service requiring them, and such records to be kept of all official stamp supplies as will enable the postoffice department to maintain a proper postage account covering the entire volume of free government mal

transmission of the official mail resulting from the business of the new postal savings aystem. By properly recording the issuance of such stamps and envelopes accurate records can be kept of the cest to the government of handling the postal savings mail, which is certain to become an important item of expense and one that should be separately determined. In keeping with this plan it is hoped that congress will authorize the substitution of special official stamps and stamped envelopes for the various forms of franks now used to carry free of postage the vast volume of departmental and congressional mail matter.

to carry free of postage the wast volume of departmental and congressional mail matter.

During the past year methods of accounting similar to those employed in the most progressive of our business establishments have been introduced in the postal service and nothing has so impeded the department's plans in this regard as the impossibility of determining with any exactness how far the various expenses of the postal service are increased by the present unrestricted use of the franking privilege. It is believed that the adoption of a more exact method of dealing with this problem as proposed will prove to be of tremendous advantage in the work of placing the postal service on a strictly businessilke basis.

In my last annual message I invited the attention of congress to the inadequacy of the postal rate imposed upon second-class mail matter in so far as that includes magazines and showed by fig-

far as that includes magazines and showed by figures prepared by experts of the postoffice department that the government was rendering a service to the magazines costing many millions in excess of the compensation paid. An answer was attempted to this by the representatives of the magazines and a reply was filed to this answer by the postoffice department. The utter inadequacy of the answer, considered in the light of the reply of the postoffice department, I think must appeal to any fair-minded person. Whether the answer was all that could be said in behalf of the magazines is another question. I agree that the question is one of fact; but I insist that if the fact is as the experts of the postoffice departfar as that includes magazines and showed by fig-

Digitized by GOOGIC

ment show, that we are furnishing to the owners of magazines a service worth millions more than they pay for it, then justice requires that the rate should be increased. The increase in the receipts of the department resuiting from this change may be devoted to increasing the usefulness of the department in establishing a parcels post and in reducing the cost of first-class postage to 1 cent.

It has been said by the postmaster-general that a fair adjustment might be made under which the advertising part of the magazine should be charged for at a different and higher rate from that of the reading matter. This would relieve many useful magazines that are not circulated at a profit and would not shut them out from the use of the mails by a prohibitory rate. by a prohibitory rate.

#### PARCELS POST ADVOCATED.

PARCELS POST ADVOCATED.

With respect to the parcels post, I respectfully recommend its adoption on all rural-delivery routes, and that eleven pounds—the international limit—be made the limit of carriage in such post, and this with a view to its general extension when the income of the postoffice will permit it and the postal savings banks shall have been fully established. The same argument is made against the postal savings bank—that it is introducing the government into a business which ought to be conducted by private persons, and is paternalism. The postoffice department bas a great plant and a great organization, reaching into the most remote hamlet of the United States, and with this machinery it is able to do a great many things economically that if a new organization were necessary it would be impossible to do without extravagant expenditure. That is the reason why the postal savings bank can be carried on at a small additional cost, and why it is possible to incorporate at a very inconsiderable expense a parcels post in the rural-delivery system. A general parcels post will involve much greater outlay.

NAVY OFFICERS AS AIDS.

## NAVY OFFICERS AS AIDS.

NAVY OFFICERS AS AIDS.

In the last annual report of the secretary of the navy and in my annual message attention was called to the new detail of officers in the navy department by which officers of fing rank were assigned to duty as aids to the secretary in respect to naval operations, personnel, inspection and material. This change was a substantial compliance with the recommendation of the commission on naval reorganization, headed by Mr. Justice Moody, and submitted to President Roosevelt on Feb. 26, 1909. Through the advice of this committee of line officers the secretary is able to bring about a proper co-ordination of all the branches of the naval department with greater military efficiency. The secretary of the navy recommends that this new organization be recognized by legislation and thus made permanent. I concur in the recommendation. mendation.

mendation. The secretary, in view of the conclusions of a recent court of inquiry on certain phases of marine-corps administration, recommends that the major-general commandant of the marine corps be appointed for a four years' term, and that officers of the adjutant and inspector's department be detailed from the line. He also asks for legislation to improve the conditions now existing in the personnel of officers of the navy, particularly with regard to the age and experience of flag officers and captains, and points out that it is essential to the lighest efficiency of the navy that the age of our officers be reduced and that flag officers particularly should gain proper experience as flag officers in order to enable them properly to command fleets. I concur in the secretary's recommendations.

cost of maintaining the naval establishment.

cost of maintaining the naval establishment. The system has now been abandoned and a naval-supply account established by law July 1, 1910. The naval-supply fund of \$2,700,000 is now on deposit in the treasury to the credit of the department. The secretary recommends that the naval-supply account be made permanent by law and that the \$2,700,000 of the naval-supply fund be covered into the treasury as unnecessary, and I ask for legislative authority to do this. This sum when covered into the treasury will be really a reduction in recorded naval cost for this year. The estimates of the navy department are \$5,000,000 less than the appropriations for the same purpose last year, and included in this is the building programme of the same amount as that submitted for your consideration last year. It is merely carrying out the plan of building two battleships a year, with a few needed auxiliary vessels. I earnestly hope that this programme will be adopted.

The secretary of the navy has given personal examination to every navy yard and has studied the uses of the navy yards with reference to the necessities of our fleet. With a fleet considerably we nave shipyards more than double the number, and there are several of these shipyards expensively equipped with modern machinery, which, after investigation, the secretary of the navy believes to be entirely useless for naval purposes. He asks authority to sbandon certain of them and to move their machinery to other places where it can be made of use.

In making these recommendations the secretary

He asks autnority to abandon certain or them and to move their machinery to other places where it can be made of use.

In making these recommendations the secretary is following directly along progressive lines which have been adopted in our great commercial and manufacturing consolidations in this country; that is, of dismuntling unnecessary and inadequate plants and discontinuing their existence where it has been demonstrated that it is unprofitable to continue their maintenance at an expense not commensurate to their product.

The secretary points out that the most important naval base in the West Indies is Guantanamo, in the southeastern part of Cuba. Its geographical situation is admirably adapted to protect the commercial paths to the Panama canal and he shows that by the expenditure of less than half a million dollars, with the machinery which he shall take from other navy yards, he can create a naval station at Guantanamo of sufficient size and equipment to serve the purpose of an emergency naval station at Guantanamo of sufficient size and equipment to serve the purpose of an emergency navaisase. I earnestly Join in the recommendation that he be given the authority which he asks. I am quite aware that such action is likely to arouse local opposition; but I conceive it to be axiomatic that in legislating in the interest of the navy, and for the general protection of the country by the navy, mere local pride or pecuniary interest in the establishment of a navy yard or station ought to play no part. The recommendation of the secretary is based upon the judgment of impartial naval officers, entirely uninfluenced by any geographical or sectional considerations.

I unite with the secretary in the recommendation that an appropriation be made to construct a suitable crypt at Annapolis for the custody of the remains of John Paul Jones.

TRIBUTE TO PEARY.

#### TRIBUTE TO PEARY.

The complete success of our country in arctic exploration should not remain unnoticed. For cenregard to the age and experience of flag officers and captains, and points out that it is essential to the highest efficiency of the navy that the age of our officers be reduced and that flag officers particularly should gain proper experience as flag officers in order to enable them properly to command fleets. I concur in the secretary's recommendations.

I commend to your attention the report of the secretary on the change in the system of cost accounting in navy yards and also to the history of the naval-supply fund and the present conditions existing in regard to that matter. Under previous practice and what now seems to have been an erroneous construction of the law the supply fund and reduced which prevented the striking over \$14,000,000, and a system of accounting was increased from \$2,700,000 to something over \$14,000,000, and a system of accounting was increased from \$2,700,000 to something over \$14,000,000, and a system of accounting was introduced which prevented the striking of a proper balance and a knowledge of the exact

adjudicating claims for lands, by which appeals can be taken from the decisions of the department to the Court of Appeals of the District of Columbia for a judicial consideration of the rights of the complainant. This change finds complete analogy in the present provision for appeals from the recisions of the commissioner of patents. The judgments of the court in such cases would be of decisive value to land claimants generally and to the department of the interior in the administration of the law, would enable claimants to bring into court the final consideration of issues to the title to government land and would. I think, obviate a good deal of the subsequent litigation that now arises in our western courts. The bill is pending, I believe, in the house, having been favorably reported from the committee on public lands, and I recommend its enactment.

One of the difficulties in the interior department and in the land office has been the delays attendant upon the consideration by the land office and the secretary of the interior of claims for patents of public lands to individuals. I am glad to say that under the recent appropriations of the congress and the earnest efforts of the secretary and his subordinates, these arrears have been disposed of, and the work of the department has been brought more nearly up to date in respect to the pending business taan ever before in its history. Economies have been effected where possible without legislative assistance, and these are shown in the reduced estimates for the expenses of the department during the current fiscal year and during the partment during the current fiscal year and during the partment of the public

CONSERVATION OF RESOURCES.

CONSERVATION OF RESOURCES.

The subject of the conservation of the public domain has commanded the attention of the people within the last two or three years.

There is no need for radical reform in the methods of disposing of what are really agricultural lands. The present laws have worked well, the enlarged homestead law has encouraged the successful farming of lands in the semiarid regions.

The enlarged homestead law has encouraged the successful farming of lands in the semiarid regions.

The total sum already accumulated in the fund provided by the act for the reclamation of arid lands is about \$69,449,058.76, and of this all but \$6,241,058.76 has been allotted to the various projects, of which there are thirty. Congress at its last session provided for the issuing of certificates of indebtedness not exceeding \$20,000,000, to be redeemed from the reclamation fund when the proceeds of lands sold and from the water rents should be sufficient. Meantime, in accordance with the provisions of the law, I appointed a board of army engineers to examine the projects and to ascertain which are feasible and worthy of completion. That board has made a report upon the subject, which I shall transmit in a separate message within a few days.

In September last a conservation congress was within the jurisdiction and possible action of the federal government. In that address I assembled from the official records the statistics and facts as to what had been done in this behalf in the administration of my predecessor and in my own, and indicated the legislative measures which I believed to be wise in order to secure the best use, in the public interest, of what remains of our national domain. There was in this address a veryfull discussion of the reasons which led me to the conclusions stated. For the purpose of saving in the address and facts gathered with some difficulty in that address and cover and the saddress and cover the concept of the reasons and the conservation address, I recommend:

1. That the limitation now imposed mon the

For the reasons stated in the conservation ad-

for the feasons stated in the conservation audress, I recommend:

1. That the limitation now imposed upon the executive which forbids his reserving more forest lands in Oregon, Washington, Idaho, Montana, Colorado and Wyoming, be repealed.

2. That the coal deposits of the government be leased after advertisement inviting competitive

bids, for terms not exceeding fifty years, with a

minimum rental and royalties upon the coal mined, to be readjusted every ten or twelve years, and with conditions as to maintenance which will secure proper mining and as to assignment which will prevent combinations or monopolies from getting control of the coal in any one district or market. I do not think that coal measures under 2,500 acres of surface would be too large an amount to lease to any one lessee.

The secretary of the interior thinks there are difficulties in the way of leasing public coal lands, which objections he has set forth in his report, the force of which I freely concede. I entirely approved his stating at length in his report the objections in order that the whole subject may be presented to congress, but after a full consideration I favor a leasing system and recommend it.

3. That the law should provide the same separa-

presented to congress, but after a full consideration I favor a leasing system and recommend it.

3. That the law should provide the same separation in respect to government phosphate lands of surface and mineral rights that now obtains in coal lands and that power to lease such lands upon terms and limitations similar to those above recommended for coal leases, with an added condition enabling the government to regulate and if need be to prohibit the export to foreign countries of the product.

4. That the law should allow a prospector for oil or gas to have the right to prospect for two years over a certain tract of government land, the right to be evidenced by a license for which he shall pay a small sum; and that upon discovery a lease may be granted upon terms securing a mininum rental and proper royalties to the government, and also the conduct of the oil or gas well in accord with the best method of husbanding the supply of oil in the district. The period of the leases should not be as long as those of coal, but they should contain similar provisions as to assignment to prevent monopolistic combinations.

to assignment to prevent monopolistic combinations.

5. That water-power sites be directly leased by the federal government, after advertisement and bidding, for not exceeding fifty years, upon a proper rental and with a condition fixing rates charged to the public for units of electric power, both rental and rates to be readjusted equitably every ten years by arbitration or otherwise, with suitable provisions against assignment to prevent monopolistic combinations, or that the law shall provide that upon application made by the authorities of the state where the water-power site situated, it may be patented to the state upon condition that the state shall dispose of it under terms like those just described, and shall enforce those terms, or upon failure to comply with the condition the water-power site and all the plant and improvement on the site shall be forfeited and revert to the United States, the president being given the power to declare the forfeiture and to direct legal proceedings for its enforcement. Either of these methods would, I think, accomplish the proper public purpose in respect to water-power sites, but one or the other should be promptly adopted.

I earnestly urge upon congress that at this Season general conservation legislation of the char-

power sites, but one or the other should be promptly adopted.

I carnestly urge upon congress that at this session general conservation legislation of the character indicated be adopted. At its last session this congress took most useful and proper steps in the cause of conservation by allowing the executive, through withdrawals, to suspend the action of the existing laws in respect to much of the public domain. I have not thought that the danger of disposing of coal lands in the United States under the present laws in large quantities was so great as to call for their withdrawal, because under the present provisions it is reasonably certain that the government will receive the real value of the land. But in respect to oil lands or phosphate lands and of gas lands in the United States, and in respect to coal lands in Alaska, I have exercised the full power of withdrawal with the hope that the action of congress would follow promptly and prevent that tyling up of the resources of the country in the western and less-settled portion and in Alaska, which means stagnation and retrogression.

The question of conservation is not a partical gression.

The question of conservation is not a partisan one, and I sincerely hope that even in the short time of the present session consideration may be

given to those questions which have now been much discussed, and that action may be taken upon them.

## GOVERNMENT OF ALASKA.

GOVERNMENT OF ALASKA.

With reference to the government of Alaska, I have nothing to add to the recommendations I made in my last message on the subject. I am convinced that the migratory character of the population, its unequal distribution, and its smallness of number, which the new census shows to be about 50,000, in relation to the enormous expense of the territory, make it altogether impracticably to give to those people who are in Alaska to-day, and may not be there a year hence, the power to elect a legislature to govern an limmense territory to which they have a relation so little permanent, it is far better for the development of the territory that it be committed to a commission to be appointed by the executive, with limited legislative powers sufficiently broad to meet the local needs, than to continue the present insufficient government with few remedial powers, or to make a popular government where there is not proper foundation upon which to rest it.

The suggestion that the appointment of a commission will lead to the control of the government by corporate or selfish and exploiting interests has not the slightest foundation in fact. Such a government worked well in the Philippines, and would work well in Alaska, and those who are really interested in the proper development of that territory for the benefit of the people who live in it and the benefit of the people of the united States, who own it, should support the institution of such a government.

institution of such a government.

I have been asked to recommend that the credit I have been asked to recommend that the credit of the government be extended to aid the construction of railroads in Alaska. I am not rendy now to do so. A great many millions of dollars have already been expended in the construction of already been expended in the construction of alleast two railroads, and if laws be passed providing for the proper development of the resources of Alaska, especially for the opening up of the coal lands, I believe that the capital already invested will induce the investment of more capital sufficient to complete the railroads building, and to furnish cheap coal not only to Alaska but the whole Pacific coast. The passage of a law permitting the leasing of government coal lands in Alaska after public competition, and the appointment of a commission for the government of the territory, will lead to an improvement in Alaska and the development of her resources that is likely to surprise the country. surprise the country

surprise the country.

Our national parks have become so extensive and involve so much detail of action in their control that it seems to me there ought to be legislation creating a bureau for their care and control. The greatest natural wonder of this country and the surrounding territory should be included in another national park. I refer to the Grand Canyon of the Colorado.

# PENSIONS SHOULD BE LIBERAL.

PENSIONS SHOULD BE LIBERAL.

The uniform policy of the government in the matter of granting pensions to those gallant and devoted men who fought to save the life of the nation in the perilous days of the great civil war has always been of the most liberal character. Those men are now rapidly passing away. The best obtainable official statistics show that they are dying at the rate of something over 3.000 a month, and, in view of their advancing years, this rate must inevitably, in proportion, rapidly increase. To the man who risked everything on the field of battle to save the nation in the hour of its direst need we owe a debt which has not been and should not be computed in a begunding or parsimonious spirit. But while we should be actuated by this spirit to the soldier himself, care should be exercised not to go to absurd lengths, or distribute the bounty of the government to classes of persons who may, at this late day, from a more mercenary motive, seek to obtain some legal relation with an old veteran now tottering on the brink of the grave. The true spirit of the pension laws is to be found in the noble sentiments expressed by Mr. Lincoln in his last in-

augural address, wherein, in speaking of the nation's duty to its soldiers when the struggle should be over, he said we should "care for him who shall have borne the battle, and for his widow and orphans."

#### GREAT WEALTH ON FARMS.

GREAT WEALTH ON FARMS.

The report of the secretary of agriculture invites attention to the stupendous value of the agricultural products of this country, amounting in all to \$\$,920,000,000 for this year. This amount is larger than that of 1909 by \$305,000,000. The existence of such a crop indicates a good prospect for business throughout the country. A totable change for the better is commented upon by the secretary in the fact that the south, especially in those regions where the boll weevil has interfered with the growth of cotton, has given more attention to the cultivation of corn and other creals. So that there is a greater diversification

nore attention to the cultivation of corn and other cereals, so that there is a greater diversification of crops in the south than ever before—and all to the great advantage of that section.

The report contains a most interesting account of the activities of the department in its various bureaus, showing how closely the agricultural progress in this country is following along the lines of improvement recommended by the department through its publications and the results of its experiment stations in every state, and by the instructions given through the agricultural schools aided by the federal government and following the general curriculum urged by the head and bureau general curriculum urged by the head and bureau

chiefs of the department.

# PURE FOOD AS A FEATURE.

The activities of the department have been greatly increased by the enactment of recent legislation, by the pure-food act, the meat-inspection act, the cattle-transportion act and the act concerning the interstate shipment of game. This department is one of those the scope of whose actions is constantly widening and therefore it is impossible under existing legislation to reduce the cost and their estimates below those of preceding

years.

An interesting review of the results of an examination made by the department into statistics and prices shows that on the average since 1891 farm products have increased in value 72 per cent, while the things which the farmer buys for use have increased but 12 per cent, an indication that present conditions are favorable to the farming community. munity.

#### LOSS BY FOREST FIRES.

I have already referred to the forests of the United States and their extent, and have urged, as I do again, the removal of the limitation upon the power of the executive to reserve other tracts of land in six western states in which withdrawal for this purpose is now forbidden. The secretary of agriculture gives a very full description of the disastrous fires that occurred during the last summer in the national forests. A drought more incuse than any recorded in the history of the west had introduced a condition into the forests which made fires almost inevitable, and locomotive made fires almost inevitable, and locomotive sparks, negligent campers and in some cases inand locomotive cendiaries furnished the needed immediate cause. cendiaries furnished the needed immediate cause. At one time the fires were so extended that they covered a range of a hundred miles and the secretary estimates that standing timber of the value of \$25,000,000 was destroyed. Seventy-six persons in the employ of the forest service were killed and many more injured, and I regret to say that there is no provision in the law by which the expenses for their hospital treatment or of their interment could be met out of public funds. The Red Cross contributed \$1,000 and the remainder of the necessary expenses was made up by private contributed. sary expenses was made up by private contribu-tion, chiefly from the force of the forest service and its efficials. I recommend that suitable legis-lation be adopted to enable the secretary of agri-culture to meet the moral obligations of the gov-

culture to meet the moral obligations of the government in this respect.

The specific fund for fighting fires was only about \$135,000, but there existed discretion in the secretary in case of an emergency to apply other funds in his control to this purpose, and he did so to the extent of nearly a million of dollars,

which will involve the presentation of a deficiency estimate for the current fiscal year of over \$900,-000. The damage done was not, therefore, due to the lack of an appropriation by congress available to meet the emergency, but the difficulty of fighting it lay in the remote points where the fires began and where it was impossible, with the roads and trails as they now exist, promptly to reach them. Proper protection necessitates, as the secretary points out, the expenditure of a good deal more money in the development of roads and trails in the forests, the establishment of lookout stations and telephone connection between them and places where assistance can be secured.

The amount of reforestation shown in the report which will involve the presentation of a deficiency

places where assistance can be secured.

The amount of reforestation shown in the report of the forest service—only about 15,000 acres, as compared with the 150,000,000 acres of national forests—seems small, and I am glad to note that in this regard the secretary of agriculture and the chief of the forest service are looking forward to far greater activity in the use of available government land for this purpose.

Progress has been made in learning by experiment the best methods of reforesting. Congress is appealed to now by the secretary of agriculture to make the appropriations needed for enlarging the usefulness of the forest service in this regard. I hope that congress will approve and adopt the estimate of the secretary for this purpose.

## COMMERCE DEPARTMENT.

COMMERCE DEPARTMENT.

The secretary of the department of commerce and labor has had under his immediate supervision the application of the merit system of promotion to a large number of employes, and his discussion of this method of promotions, based on actual experience, I commend to the attention of congress. The taking of the census has proceeded with promptness and efficiency. The secretary believes, and I concur, that it will be more thorough and accurate than any census which has heretofore been taken, but it is not perfect. The motive that prompts men with a false civic pride to induce the padding of census returns in order to induce the padding of census returns in order to increase the population of a particular city has been strong enough to lead to fraud in respect to a few cities in this country, and I have directed the attorney-general to proceed with all the vigor possible against those who are responsible for these frauds. They have been discovered and they will not interefere with the accuracy of the census, but it is of the highest importance that official inquiry of this sort should not be embarrassed by resulted the conspiracies in some private or local interest. raudulent conspiracies in some private or local

interest.

The reorganization of the lighthouse board has effected a very considerable saving in the administration, and the estimates for that service for the present year are \$428,000 less than for the preceding year. In addition three tenders for which appropriations were made, are not being built because they are not at present needed for the service. The secretary is now asking for a large sum for the addition, of lights end other at the large sum for the addition of lights and other aids to the commerce of the seas, including a number in Alaska. The trade along that coast is becom-ing so important that I respectfully urge the ne-cessity for following his recommendation.

cessity for following his recommendation.

The commissioner of corporations has just completed the first part of a report on the lumber industry in the United States. This part does not treat of the question of a trust or combination in the manufacture of lumber, a subject to be dealt with later. The commissioner does find, however, a condition in the ownership of the standing timber of the United States, other than the government timber, that calls for serious attention. The direct investigation made by the commissioner covered an area which contains 80 per cent of the privately owned timber of the commissioner covered an area which contains 80 per cent of the privately owned timber of the country. His report shows that one-half of the timber in this area is owned by 200 individuals and corporations; that 14 per cent is owned by three corporations, and that there is very extensive interownership of stock, as well as other circumstances, all pointing to friendly relations among those who own a majority of this timber, a relationship which might lead to a combination for the maintenance of a price that would be very detrimental to the public interest and would create the necessity of removing all tariff obstacles to the free importations of lumber from other countries.

other countries.

I am glad to note in the secretary's report the satisfactory progress which is being made in respect to the preservation of the seals of the Prisplot islands. Very active steps are being taken by the department of state to secure an arrangement which shall protect the Priblioff herd from the losses due to pelagic sealing. Meantime the government has secured seal pelts of the bachelor seals (the killing of which does not interfere with the maintenance of the bend), from the sale of which next month it is expected to realize about \$450.000, a sum largely in excess of the rental paid by the lessee of the government under the previous contract.

The coast and geodetic survey has been engaged

previous contract.
The coast and geodetic survey has been engaged in surveying the coasts of the Phillippine archiplelago. This is beavy work, because of the extended character of the coast line in those islands, 
but I am glad to note that about half of the needed survey has been completed. So large a part
of the coast line of the archipelago has been unsurveyed as to make navigation in the neighborhood of a number of the islands, and especially
on the east side, particularly dangerous.

on the east side, particularly dangerous.

LABOR WARS SETTLED.

The commissioner of labor has been actively engaged in composing the differences between employers and employes engaged in interstate transportation, under the Erdman act, jointly with the chairman of the interstate-commerce commission, I cannot speak in too high terms of the success of these two officers in conciliation and settlement of controversies which, but for their interposition, would have resulted disastrously to all interests.

I invite attention to the very serious injury

these two omcers in conciliation and settlement of controversies which, but for their interposition, would have resulted disastrously to all interests. I invite attention to the very serious injury caused to all those who are engaged in the manufacture of phosphorous matches. The diseases incident to this are frightful, and as matches can be made from other materials entirely innocuous. I believe that the injurious manufacture could be discouraged and ought to be discouraged by the imposition of a heavy federal tax. I recommend the adoption of this method of stamping out a very serious abuse.

Since 1869 it has been the declared purpose of this government to favor the movement for an eight-hour day by a provision of law that none of the employes employed by or on behalf of the government should work longer than eight hours in every twenty-four. The first declaration of this view was not accompanied with any penal clause and with no provision for its enforcement, and though President Grant, by a proclamation, twice attempted to give it his sanction and to require the officers of the government to carry it out, the purpose of the framers of the law was ultimately defeated by a decision of the Supreme court holding that the statute as drawn was merely a direction of the government to its agents and did not invalidate a contract made in behalf of the government of the government of the government of the provides that the services and employment of all absorers and mechanics who are now or may be treafter be employed by the government of the united States, by the District of Columbia or by contractor or subcontractor on any of the public or of the columbia are hereby restricted to eight hours in any one calendar day, and it shall be unlawful, etc., etc. hours in any one calendar day, and it shall be un-lawful, etc., etc.

hours in any one calendar day, and it shall be unlawful, etc. etc.

This law has been construed to limit the application of the requirement to those who are directly employed by the government or to those who are employed upon public works situate upon land owned by the United States. This construction prevented its application to government battleships and other vessels built in private shipyards and to heavy guns and armor plate contracted for and made at private establishments.

The proposed act provides that no laborer or mechanic doing any part of the work contemplated by a contract with the United States in the employ of the contractor or any subcontractor shall be required or permitted to work more than eight hours a day in any one calendar day.

It seems to me from the past history that the government has been committed to a policy of encouraging the limitation of the day's work to eight hours in all works of construction initiated by itself, and it seems to me illogical to maintain a difference between government work done on government soil and government work done in a private establishment, when the work is of such large dimensions and involves the expenditure of much labor for a considerable period so that the private manufacturer may adjust himself and his establishment to the special terms of employment that he must make with his workmen for this particular job. To require, however, that every small contract of manufacture entered into by the government should be carried out by the contractor with men working at eight hours would be to impose an intolerable burden upon the government by limiting its sources of supply and excluding altogether the great majority of those who would otherwise compete for its business.

The proposed act recognizes this in the excep-

would otherwise compete for its business.

The proposed act recognizes this in the exceptions which it makes to contracts "for transportation by land or water, for the transmission of intelligence and for such materials or articles as may usually be sought in the open market, whether made to conform to particular specifications or not, or for the purpose of supplies by the government, whether manufactured to conform to particular specifications or not."

I recommend that instead of energing the pro-

user specifications or not."

I recommend that instead of enacting the proposed bill, the meaning of which is not clear and definite and might be given a construction emberrassing to the public interest, the present act be enlarged by providing that public works shall be construct to include not only buildings and work upon public ground, but also ships, armor and large gups when manufactured in private yards or factories.

large guns when manufactured in private yards or factories.

One of the great difficulties in enforcing this eight-hour law is that its application under certain emergencies becomes exceedingly oppressive and there is a great temptation to subordinate officials to evade it. I think that it would be wiser to allow the president, by executive order, to declare an emergency in special instances in which the limitation might not apply and, in such cases, to permit the payment by the government of extra compensation for the time worked each day in excess of eight hours. I may add that my suggestions in respect to this legislation have trull concurrence of the commissioner of labor.

In view of the keen, widespread interest now felt in the United States in a system of compensation for industrial accidents to supplant our present thoroughly unsatisfactory system of emplovers' liability (a subject the importance of employers' liability (a subject the importance of employers' liability (a subject the importance of employers' liability (a subject the importance of employers' liability (a subject the importance of employers' liability (a subject the importance be invited to hold its meeting in 1913 in Washington and that an appropriation of \$10,000 be made to cover the necessary expenses of organizing and carrying on the meeting.

#### IMMIGRATION.

IMMIGRATION.

The immigration into this country is increasing each year. A large part of it comes through the immigrant station at Ellis island in the city of New York. An examination of the station and the methods pursued satisfies me that a difficult task is there performed by the commissioner and his force with common sense, the strictest fairness and with the most earnest desire to enforce the law equitably and mercifully. It has been proposed to enlarge the accommodations so as to allow more of the immigrants to come by that port. I do not think it wise policy to do this. I have no objection to—on the contrary, I recommend—the construction of additional buildings for the purpose of facilitating a closer and more careful examination of each immigrant as he comes in, but I deprecate the enlargement of the buildings and of the force for the purpose of permitting the examination of more immigrants per day than are now examined. If it is understood that no more immigrants can be taken in at New York than are now taken in and the steamship companies thus are given a reason and a motive for transferring immigrants to other ports, we can be confident

that they will be better distributed through the country and that there will not be that congestion in the city of New York which does not make for the better condition of the immigrant or increase his usfulness as a new member of this community. Everything which tends to send the immigrant west and south into rural life helps the country. I concur with the secretary in his recommendations as to the amendments to the immigration law in increasing the fine against the companies for violation of the regulations and in giving greater power to the commissioner to enforce more care on the part of the steamship companies in accepting immigrants. The recommendation of the secretary, in which he urges that the law may be amended so as to discourage the separation of families, is, I think, a good one.

BUREAU OF HEALITH.

#### BUREAU OF HEALTH.

be amended so as to discourage the separation of families, is, I think, a good one.

BUREAU OF HEALTH.

In my message of last year I recommended the creation of a bureau of health in which should be embraced all those government agencies outside of the war and navy departments which are now directed toward the preservation of public health or exercise functions germane to that subject. I renew this recommendation. I greatly regret that the agitation in favor of this bureau has aroused a counter agitation against its creation, on the ground that the establishment of such a bureau is to be in the interest of a particular school of medicine. It seems to me that this assumption is wholly unwarranted, and that those responsible for the government can be trusted to secure in the personnel of the bureau the appointment of representatives of all recognized schools of medicine, and in the management of the bureau entire freedom from arrow repludice in this regard.

By an act passed by congress the president was authorized to expend \$1.000.000 to construct the needed work to prevent injury to the lands of the Imperial valley from the overflow of the Coloradoriver. I appointed a competent engineer to examine the locality and to report a plan for construction. He has done so. In order to complete the work it is necessary to secure the consent of Mexico, for part of the work must be constructed in Mexican territory. Negotiations looking to the securing of such authority are quite near success. The Southern Pacific Railroad company proposes to assist us in the work by lending equipment and by the transportation of material at cost the spring floods in the river. The work is being done under the supervision of the secretary of the interior and his consulting engineer. Gen. Marshall, late chief of engineers, now retired.

This leads me to invite the attention of congress to the claim made by the Southern Pacific Railroad company, or an amount expended in a similar work of relief called for by a flood and great emergency. This

able value of the work done. I recommend the payment of the claim in a sum found to be just.

DISTRICT OF COLUMBIA.

The government of the District of Columbia is a good government. The police force, while perhaps it might be given, or acquire, more military discipline in bearing and appearance, is nevertheless an efficient body of men, free from graft, and discharges its important duties in this capital of the nation effectively. The parks and the streets of the city and the district are generally kept clean and in excellent condition. The commissioners of the district have its affairs well in hand, and, while not extravagant/ are constantly looking to those municipal improvements that are expensive, but that must be made in a modern growing city like Washington.

While all this is true, nevertheless the fact that Washington is governed by congress, and that he citizens are not responsible and have no direct control through popular election in district maters, properly subjects the government to inquiry and criticism by its citizens, manifested through the public press and otherwise. Such criticism

should command the careful attention of congress. Washington is the capital of the nation and its maintenance as a great and beautiful city under national control every lover of his country has much at heart, and it should present in every way a model in respect of economy of expenditure, of sanitation, of tenement reform, of thorough public instruction. sanitation, of tenement reform of thorough public instruction, of the proper regulation of public utilities, of sensible and extended charities, of the proper care of criminals and of youth needing reform, of healthful playgrounds and opportunity for popular recreation and of a beautiful system of parks. I am glad to think that progress is being made in all these directions, but I venture to point out certain specific improvements toward these ends which congress in its wisdom might adopt. Speaking generally, I think there ought to be more concentration of authority in respect of the accomplishment of some of these purposes, with more economy of expenditure.

to the accomplishment of some of these purposes, with more economy of expenditure.

Attention is invited to the peculiar situation existing in regard to the parks of Washington. The rark system proper, comprising some 343 different areas, is under the office of public buildings and grounds, which, however, has nothing to do with the control of Rock Creek park, the zoological park, the grounds of the department of agriculture, the botanic garden, the grounds of the capitol and other public and ought to be part of the park system. Exclusive of the grounds of the boundary open to the public and ought to be part of the park system. Exclusive of the grounds of the Soldiers' home and of Washington barracks, the public grounds used as parks in the District of Columbia comprise over 3,100 acres, under ten different controlling officials or bodies. This division of jurisdiction is most unfortunate. Large sums of money are spent yearly in beautifying and keeping in good condition these parks and the grounds connected with government buildings and institutions. The work done on all of them is of the same general character—work for which the office of public buildings and grounds has been provided by congress with a special organization and equipment, which are lacking for the grounds not under that office. There can be no doubt that if all work of care and improvement upon the grounds belonging to the United States in the District of Columbia were put, as far as possible, under one responsible head, the result would not only be greater efficiency and economy in the work itself, but greater harmony in the development of the public parks and gardens of tecty.

in the work itself, but greater harmony in the development of the public parks and gardens of the city.

Congress at its last session provided for two more parks, called the Meridian Hill and Montrose parks, and the district commissioners have also included in their estimates a sum to be used for the acquisition of much-needed park land adjoining the zoological park, known as the Klingle Ford tract. The expense of these three parks, included in the estimates of the commissioners, aggregates \$900,-000. I think it would lead to economy if the improvement and care of all these parks and other public grounds above described should be transferred to the office of public buildings and grounds, which has an equipment well and economically adapted to carrying out the public purpose in respect to improvements of this kind.

To prevent encroachments upon the park area it is recommended that the erection of any permanent structure on any lands in the District of Columbia belonging to the United States be prohibited except by specific authority of congress.

I have already in previous communications to congress referred to the importance of acquiring for the District of Columbia at least a part of the territory on the other side of the Potomac in Virginia, which was originally granted for the district by the state of Virginia and then was retroceded by act of congress in 1846. It is very evident from conferences that I have had with the senators and representatives from Virginia that there is no hope of a vegranting by the state of the land thus given hack, and I am frank to say that in so far as the tract includes the town of the land thus given hack, and I am frank to say that in so far as the tract includes the town of the land which lies along the Potomac river above the land which lies along the Potomac river above the land which lies along the Potomac river above the

Arlington cemetery, Fort Myer, the government experiment farm, the village of Rosslyn and the Pailsades of the Potomac, reaching to where the old district line intersects the river, is very sparsely settled and could be admirably utilized for increasing the system of the parks of Washington.

sparsely settled and could be admirably utilized for increasing the system of the parks of Washington.

It has been suggested to me by the same Virginia senators and representatives that if the government were to acquire for a government park the land above described, which is not of very great value, the present law of Virginia would itself work the creation of federal jurisdiction over it, and if that were not complete enough the legislature of Virginia would in all probability so enlarge the jurisdiction as to enable congress to include it within the control of the government of the plainter of the plainter of the plainter of the plainter of the plainter of the plainter of the plainter of the plainter of the plainter of the power of the power of the part of Washington I earnestly recommend that steps be taken to carry out this plain.

There are a sufficient number of corporations enjoying the use of public utilities in the District of Columbia to justify and require the enactment of a law providing for their supervision and regulation in the public interest consistent with the vested rights secured to them by their charters. A part of these corporations, to wit, the street railways, have been put under the control of the interstate-commence commission, but that commission recommends that the power be taken from it, and intimates broadly that its other and more important duties make it impossible for it to give the requisite supervision. It seems to me wise to place this general power of supervision and regulation in the district commissioners. It is said that their present duties are now absorbing and would prevent the proper discharge by them of these new functions, but their present jurisdiction brings them so closely and frequently in contact with these corporations and makes them to know in such detail how the corporations are discharge by them of these new functions brings them with powers in respect to such corporations similar to those of the public utilities commission of New York city or similar boa

I do not think the present control of the school system of Washington commends itself as the most

I do not think the present control of the school system of Washington commends itself as the most efficient and economical and thorough instrument for the carrying on of public instruction. The expenses of the schools of Washington as compared with those of other cities similarly situated are shown by the following table: [See page 427.] The cost of education in the District of Columbia is thus seen to be excessive as compared with the cost in other cities of similar size, and it is not apparent that the results are in general more satisfactory. The average cost per pupil per day in Washington is about 38 cents, while the average cost in thirteen other American cities fairly comparable with Washington in population and standard of education is about 25.5 cents. For each dollar spent in salaries of school teachers and officers in the district about 4.4 days of instruction per pupil are given, while in the thirteen cities above referred to each dollar expended for salaries affords on the average 6.8 days of instruction. For the current fiscal year the estimates of the board of education amounted to about three-quarters of the entire revenue locally collected for district purposes.

the entire revenue locally collected for district purposes.

If I may say so, there seems to be a lack of definite plan in the expansion of the school system and the erection of new buildings and of proper economy in the use of these buildings that indicates the necessity for the concentration of control. All plans for improvement and expansion in the school system are with the school losard, while the limitation of expenses is with the district commissioners. I think it would be much better to put complete control and responsibility in the district commissioners, and then provide a board of school visitors, to be appointed by the Supreme court of the district or by the president, from the different school districts of Washington, who, representing local needs, shall meet and make recommendations to the commissioners and

(h) As result of San Francisco earthquake over \$1,000,000 spent in new construction and included in total cost for year, making it unduly large.

to the superintendent of education—an educator of ability and experience, who should be an apability and experience, who should be an appointee of and responsible to the district commissioners.

missioners.

Among the items for permanent improvements appearing in the district estimates for 1912 is one designed to substitute for Willow Tree alley, not orious in the records of the police and health departments, a playsround with a building containing batis. a gymnasium and other helpful features, and I bope congress will approve this estimate. Fair as Washington seems with her beautiful streets and shade trees, and free, as the expanse of territory which she occupies would seem to make her, from slums and insanitary congestion of population, there are centers in the interior of squares where the very poor, and the criminal classes as well, huddle together in filth and noisome surroundings, and it is of primary importance that these nuclei of disease and suffering and vice should be removed, and that there should be substituted for them small parks as breathing spaces, and model tenements having sufficient af a space and meeting other byginic requirecient air space and meeting other hygienic require-ments. The estimate for the reform of Willow Tree cient air space and meeting other hysicine requirements. The estimate for the reform of Willow Tree alley, the worst of these places in the city, is the beginning of a movement that ought to attract the earnest attention and support of congress, for congress cannot escape its responsibility for the existence of these human pest holes.

The estimates for the District of Columbia for the fiscal year 1912 provide for the repayment to the United States of \$616,000, one-fourth of the

floating debt that will remain on June 30, 1911. The bonded debt will be reduced in 1912 by about the same amount. The District of Columbia is now in an excellent financial condition. Its own share of indebtedness will, it is estimated, be less than \$6,000,000 on June 30, 1912, as compared with about \$9,000,000 on June 30, 1909. The bonded debt, owed half and half by the United States and the district, will be extinguished by 1924 and the floating debt of the district probably long before that time fore that time.

fore that time.

The revenues have doubled in the last ten years, while the population during the same period has increased but 18.78 per cent. It is believed that, if due ceonomy be practiced, the district can soon emerge from debt, even while financing its permanent improvements with reasonable rapidity from current revenues. To this end I recommend the enactment into law of a bill now before congress—and known as the Judson bill—which will insure the gradual extinguishment of the district's debt, while at the same time requiring that the many permanent improvements needed to complete a fitting capital city shall be carried on from year many permanent improvements needed to complete a fitting capital city shall be carried on from year to year and at a proper rate of progress with funds derived from the rapidly increasing revenues. I renew my recommendation that the claims of the depositors in the Freedmen's bank be recognized and paid by the passage of the pending bill on that subject.

I also renew my recommendation that steps be taken looking to the holding of a negro exposition in celebration of the fiftieth anniversary of the

Digitized by GOOGIC

issuing by Mr. Lincoln of the emancipation proclamation.

#### CIVIL SERVICE.

GIVIL SERVICE.

The civil-service commission has continued its useful duties during the year. The necessity for the maintenance of the provisions of the civil-service law was never greater than to-day. Officers responsible for the policy of the administration and their immediate personal assistants or deputies should not be included within the classified service; but, in my judgment, public opinion has advanced to the point where it would support a bill providing a secure tenure during efficiency for all purely administrative officials. I entertain the profound conviction that it would greatly aid the cause of efficient and economical government and of better politics if congress could enact a bill providing that the executive shall have the power to include in the classified service all local offices under the treasury department, the interior department and the department of justice, the postoffice department, the interior department and the department of commerce and labor, appointments to which now require the confirmation of the senate, and that upon such classification the advice and consent of the senate shall cease to be required in such appointments. By their certainty of tenure, dependent on good service, and by their freedom from the necessity for political activity, these local officers would be induced to become more efficient public servants.

for political activity, these local officers would be induced to become more efficient public servants. The civil-service law is an attempt to solve the problem of the proper selection of those who enter the service. A better system under that law for promotions ought to be devised, but, given the selected employe, there remains still the question of promoting his efficiency and his usefulness to the government, and that can be brought about only by a careful comparison of unit work done by the individual and a pointing out of the necessity for improvement in this regard where improvement is possible.

Is possible.

The increase in the activities and in the annual expenditures of the federal government has been so rapid and so great that the time has come to check the expansion of government activities in new directions until we have tested the economy and efficiency with which the government of today is being carried on. The responsibility rests upon the bead of the administration. He is held accountable by the public, and properly so. Despite the unselfish and patriotic efforts of the heads of departments and others charged with responsibility of government, there has grown up in this country a conviction that the expenses of government are too great.

The fundamental reason for the existence unde-

rmment are too great.

The fundamental reason for the existence undetected of waste, duplication and bad management is the lack of prompt, accurate information. The president of a private corporation doing so vast a business as the government transacts would, through competent specialists, maintain the closest scrutiny on the comparative efficiency and the comparative costs in each division or department of the business. He would know precisely what the dutles and the activities of each bureau or division are in order to prevent overlapping. No adequate machinery at present exists for supplying the president of the United States with such information respecting the business for which he is responsible. For the first time in the history of the government congress in the last session supplied this need and made an appropriation to enable the president to inquire into the economy and efficiency of the executive departments, and I am now assembling an organization for the purpose.

At the outset I find comparison between departments and bureaus impossible for the reason that to the departments are the estimates and are

At the outset I find comnarison between departments and bureaus impossible for the reason that in no two departments are the estimates and expenditures displayed and classified allike. The first step is to reduce all to a common standard for classification and judgment, and this work is now being done. When it is completed the foundation will be laid for a businesslike national budget and for such a just comparison of the economy and efficiency with which the several bureaus and divisions are conducted as will enable the president and the heads of departments to detect waste, eliminate duplication, encourage the intelligent and effective civil servants, whose efforts too often go

unnoticed, and secure the public service at the lowest possible cost.

lowest possible cost.

The committee on appropriations of congress have diligently worked to reduce the expenses of government and have found their efforts often blocked by lack of accurate information containing a proper analysis of requirements and of actual and reasonable costs. The result of this inquiry should enable the executive in his communications to congress to give information to which congress is entitled and which will enable it to promote economy.

I have requested the head of each department

I have requested the head of each department to appoint committees on economy and efficiency in order to secure full co-operation in the movement by the employes of the government themselves. I urge the continuance of the appropriation of \$100,000 requested for the fiscal year 1912.

My experience leads me to believe that while government methods are much criticised, the bad results—if we do have bad results—are not due to lack of zeal or willingness on the part of the civil servants. On the contrary, I believe that a fine spirit of willingness to work exists in the personnel, which, if properly encouraged, will produce results equal to those secured in the best-managed private enterprises. In handling government expenditure the aim is not profit—the aim is the maximum of public service at the minimum of cost. We wish to reduce the expenditures of the government and we wish to save money to enable the government and we wish to save money to enable projects which we are debarred from taking up now because we ought not to increase our enpenditures.

At a later date I shall send to congress a special message on this general subject.

cial message on this general subject.

CIVIL PENSIONS.

It is impossible to proceed far in such an investigation without perceiving the need of a suitable means of eliminating from the service the superannuated. This can be done in one of two ways, either by straight civil pension or by some form of contributory plan.

Careful study of experiments made by foreign governments shows that three serious objections to the civil pension payable out of the public treasury may be brought against it by the taxpayer, the administrative officer and the civil employe, respectively. A civil pension is bound to become an enormous, continuous and increasing tax on the public exchequer; it is demoralizing to the service, since it makes difficult the dismissal of incompetent employes after they have parity earned thair pension, and it is disadvantageous to the main body of employes themselves, since it is always taken into account in fixing salaries, and only the

thair pension, and it is disadvantageous to the main body of employes themselves, since it is always taken into account in fixing salaries, and only the few who survive and remain in the service until pensionable age receive the value of their deferred pay. For this reason, after a half century of experience under a most liberal pension system, the civil servants of England succeeded, about a year ago, in having the system so modified as to make it virtually a contributory plan with provision for refund of their theoretical contributions. The experience of England and other countries shows that neither can a contributory plan be successful, human nature being what it is, which does not make provision for the return of contributions, with interest, in case of death or resignation before pensionable age. Followed to its logical conclusion this means that the simplest and most independent solution of the problem for both employes and the government is a compulsory savings arrangement, the employe to set aside from his salary a sum sufficient, with the help of a liberal rate of interest from the government, to purchase an adequate annuity for him on retirement, this accumulation to be inalienably his and claimable if he leaves the service before reaching the retirement age or by his helrs in case of his death. This is the principle upon which the Gillett bill now pending is drawn.

The Gillett bill, however, goes further and provides that the government shall contribute to the pension fund of those employes who are now so advanced in age that their personal contributions will not be sufficient to create their annuities before reaching the retirement age. In my judgment this provision should be amended so that the annuities before reaching the retirement age. In my judgment this provision should be amended so that the annuities before reaching the retirement age.

nuities of those employes shall be paid out of the solaries appropriated for the positions vacated by retirement, and that the difference between the annuities thus granted and the salaries may be used for the employment of efficient clerks at the lower grades. If the bill can be thus amended I recommend its passage, as it will initiate a valuable system and ultimately result in a great saving in the public expenditures.

# INTERSTATE-COMMERCE LAW.

recommend its passage, as it will initiate a valuable system and utilimately result in a great saving in the public expenditures.

INTERSTATE-COMMERCE LAW.

There has not been time to test the benefit and utility of the amendments to the interstate-connecree law contained in the act approved June 18. 1910. The law as enacted did not contain all the features which I recommended. It did not specifically denounce as unlawful the purchase by one of two parallel and competing roads of the stock of the other. Nor did it subject to the restraining intense of the interstate-commerce commission the power of corporations engaged in operating interstate railroads to issue new stock and bonds; nor did it authorize the making of temporary agreements between railroads, limited to thirty days, fixing the same rate for traffic between the same places.

I do not press the consideration of any of these objects upon congress at this session. The object of the first provision is probably generally covered by the antitrust law. The second provision was in the act referred to the consideration of a commission has been appointed by the executive and to report upon the matter to congress. That commission has been appointed by the executive and to report upon the matter to congress. That commission has been appointed and is engaged in the investigation and consideration of the question submitted under the law. It consists of President Arthur T. Hadley of Yale university as chairman; Frederick C. Straus, Frederick N. Judson, Prof. B. H. Meyer and Walter L. Fisher, with William E. S. Griswold as secretary.

The third proposal led to so much misconstruction of its object, as being that of weakening the effectiveness of the antitrust law, that I am not disposed to press it for further consideration, It was intended to permit railroad companies to avoid useless rate cutting by a mere temporary acquiescence in the same rates, for the same service over competing railroads, with no obligation whatever to maintain those rates for any time.

The

#### VALUATION OF RAILROADS.

VALUATION OF RAILROADS.

The interstate-commerce commission has recommended appropriations for the purpose of enabling it to enter upon a valuation of all railroads. This has always been within the jurisdiction of the commission, but requisite funds have been wanting. Statistics of the value of each railroad would be valuable for many purposes, especially if we utilimately enact any limitations upon the power of the interstate railroads to issue stocks and bonds, as I hope we may. I think, therefore, that in order to permit a correct understanding of the facts, it would be wise to make a reasonable appropriation to enable the interstate-commerce commission to proceed with due dispatch to the valuation of all railroads. I have no doubt that railroad companies themselves can and will greatly facilitate this valuation and make it much less costly in time and money than has been supposed.

Forged and fraudulent bills of lading purporting to be Issued against cotton some months since resulted in losses of several millions of dollars to American and foreign banking and cotton interests. Foreign bankers then notified American bankers that after Oct. 31, 1910, they would not accept bills of exchange drawn against bills of lading for cotton issued by American railroad companies, unless American bankers would guarantee the integrity of the bills of lading. The American bankers rightly maintained that they were not justified in giving such guaranties, and that, if they did so, the United States would be the only country in the world whose bills were so discredited and whose foreign trade was carried on under such guaranties. on under such guaranties.

discredited and whose foreign trade was carried on under such guaranties.

The foreign bankers extended the time at which these guaranties were demanded until Dec. 31, 1910, relying upon us for protection in the meantime, as the money which they furnished to move our cotton crop is of great value to this country.

For the protection of our own people and the preservation of our credit in foreign trade I urge upon congress the immediate enactment of a law under which one who, in good faith, advances money or credit upon an interstate or foreign shipment can hold the carrier liable for the value of the goods described in the bill at the valuation specified in the bill, at least to the extent of the advances made in reliance upon it. Such liability exists under the laws of many of the states. I see no objection to permitting two classes of bills of lading to be issued: (1) Those under which a carrier shall be absolutely liable, as above suggested, and (2) those with respect to which the carrier shall device the shall assume no liability except for the goods actually delivered to the agent issuing the following the carrier might be permitted to make a small separate specific charge in addition to the rate of transportation for such guaranteed bill, as an insurance premium against loss from the added risk, thus removing the principal objection which inderest the modern of the liability suggested, viz., that the ordinary transportation accuracy of the bills of lading.

I further recommend that a punishment of fine

I further recommend that a punishment of fine and imprisonment be imposed upon railroad agents and shippers for fraud or misrepresentation in connection with the issue of bills of lading issued upon interstate and foreign shipments.

upon interstate and foreign shipments.

Except as above, I do not recommend any amendment to the interstate-commerce law as it stands. I do not now recommend any amendment to the antitrust law. In other words, it seems to me that the existing legislation with reference to the regulation of corporations and the restraint of their business has reached a point where we can stop for a while and witness the effect of the vigorous execution of the laws on the statute books in restraining the abuses which certainly did exist and which roused the public to demand reform. If this test develops a need for further legislation, well and good, but until then let us execute what we have. Due to the reform movements of the present decade, there has undoubtedly been a great improvement in business methods and standgreat improvement in business methods and stand-

The great body of business men of this country, those who are responsible for its commercial development, now have an earnest desire to obey the law and to square their conduct of business to its requirements and limitations.

These will doubtless be made clearer by the decisions of the Supreme court in cases pending

decisions of the Supreme court in cases promobelore it.

I believe it to be in the interest of all the people of the country that for the time being the activities of government, in addition to enforcing the existing law, be directed toward the economy of administration and the enlargement of opportunities for foreign trade, the conservation and improvement of our agricultural lands, the building up of home industries and the strengthening of confidence of capital in domestic investment.

The White House, Dec. 6, 1910.

## CENTER OF POPULATION AND ITS MEDIAN POINT.

The center of population is the center of gravity of the population of the country, each individual being assumed to have the same weight. What is known as the median point is the point of intersection of the line dividing the population equally north and south with the line dividing it equally east and west. The center of population in 1900 was at a point six miles southeast of Columbus, Ind., or north latitude 33 degrees and 9.5 minutes and west longitude 85 degrees 48.9 minutes. The

AND ITS MEDIAN POINT.

median point in 1900 was at Spartanburg. Ind.,
or latitude 40 degrees 4 minutes and 22 seconds
and longitude 84 degrees 51 minutes and 23 seconds.

The center of area of the United States, excluding Alaska and Hawaii and other recent accessions, is in northern Kansas, in approximate latitude 39 degrees 55 minutes and approximate longitude 39 degrees 55 minutes. The center of population is therefore about three-fourths of a degree south and more than thirteen degrees east
of the center of area.

#### THIRTEENTH UNITED STATES CENSUS.

63,069,756

77,165,937

THREEENH UNITAL The act passed at the extra session of the fist congress and approved July 2, 1909, for the taking of the thirteenth and subsequent censuses provides that a census shall be taken of the population, agriculture, manufactures and mines and quarries of the United States in 1910 and every ten years thereafter, and that it shall include each state and territory on the mainland, the District of Columbia, Alaska, Hawsii and Porto Rico. All reports are to be made within three years from July 1, 1909, the time being known as the decennial census period. An assistant director, a geographer, a chief statistician and other officers and clerks in addition to the regular force in the census office are provided for.

The annual compensation of the officials of the census office during the decennial census period shall be as follows: Director, \$7,000; assistant director, \$5,000; chief statisticians, \$3,000 each; chief clerk, \$2,500; dispositions given the clerk, \$2,500; geographer, \$2,500; chiefs of division, \$2,000 each;

The additional cierks and other employes provided for must pass a civil-service examination, which shall be open to all applicants without regard to politics. Such examination shall be held in such places in each state as may be designated by the civil-service commission.

civil-service commission.

The thirteenth census was restricted to inquiries relating to population, agriculture, manufactures, mines and quarries. The schedules relating to population included for each inhabitant the name, relationship to head of family, color, sex. age, conjugal condition, place of birth, place of birth of parents, rumber of years in United States, citizenship, occupation, whether or not employer or employe, and, if employe, whether or not employed at the date of enumeration and the number of months unemployed during the preceding calendar year, whether or not engaged in agriculture, school attendance, literacy and tenure of home and whether or not a survivor of the union or confederate army or navy, and the name and address of each blind or deaf and dumb person; and for the

enumeration of institutions shall include paupers, prisoners, juvenile delinquents, insane, feeble-minded, blind, deaf and dumb and inmates of benevolent institutions.

The results of the enumeration of the population of the states and territories and of the principal cities were announced in the course of the year

and, so far as given up to Dec. 15, will be found in this issue of The Daily News Almanac and Year-Book. The figures are official, but are subject to some slight corrections. The population of the states by counties will be found in connection with the election tables.

#### POPULATION BY CERTAIN AGES AND BY LITERACY IN 1900.

The aggregate of males of voting age in 1900 was 21,250,862, of whom 16,163,556 were native born and 5,087,306 foreign born. The males of militia age aggregated 16,275,001, of whom 13,061,363 were native born and 3,213,639 foreign born. The total illiterates were 2,252,320, and the total number of per-

sons of school age was 26,038,123. The illiterates in the largest cities numbered: New York, 65,556; Chicago. 20.572; Philadelphia, 17,588; St. Louis, 7,026; Boston, 8,111; Baltimore, 10,152, and Cleveland, 5,786.

#### CONSTITUTION OF THE UNITED STATES.

September 17, 1787.

PREAMBLE. We, the people of the United States, in order to form a more perfect union, establish justice, insure domestic tranquillity, provide for the common defense, promote the general welfare and secure the blessings of liberty to our selves and our posterity, do ordain and establish this constitution for the United States of America:

### ARTICLE 1.

Section I. All legislative powers herein granted shall be vested in a congress of the United States, which shall consist of a senate and house of representatives.

Section II. 1. The house of representatives shall be composed of members chosen every second year by the people of the several states, and the electors in each state shall have the qualifications requisite for electors of the most numerous branch of the

for electors of the most numerous branch of the state legislature.

2. No person shall be a representative who shall not have attained to the age of 25 years and been seven years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state in which he shall be chosen.

3. Representatives and direct taxes shall be appoint the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state of the state o

o. Representatives and united takes which may be included within this union, according to their respective numbers, which shall be determined by adding to the whole number of free persons, including those bound to service for a term of

17, 1787.

years, and excluding Indians not taxed, three-fifths of all other persons. The actual enumeration shall be made within three years after the first meeting of the congress of the United States, and within every subsequent term of ten years, in such manner as they shall by law direct. The number of representative, shall not exceed one for every 30,000, but each state shall have at least one representative, and until such enumeration shall be made the state of New Hampshire shall be entitled to choose three; Massachusetts, eight; Rhode Island and Providence Plantations, one; Connecticut, five; New York, six; New Jersey, four; Pennsylvania, eight; Delaware, one; Maryland, six, Virginia, ten; North Carolina, five; South Carolina, five, and Georgia, three.

4. When vacancles happen in the representation from any state the executive authority thereof shall issue writs of election to fill such vacancles. 5. The bouse of representatives shall choose their speaker and other officers and shall*have the sole power of impeachment.

Section III. 1. The senate of the United States shall be composed of two senators from each state, chosen by the legislature thereof, for six years, and each senator shall have one vote.

2. Immediately after they shall be assembled in consequence of the first election they shall be divided, as equally as may be, into three classes.

vacated at the expiration of the second year; of the second class, at the expiration of the fourth year, and of the third class at the expiration of the sixth year, so that one-third may be chosen every second year, and if vacancies happen by resignation or otherwise, during the recess of the legislature of any state, the executive thereof may make temporary appointments until the next meet-ing of the legislature, which shall then fill such vacancies. vacancies.

ing of the legislature, which shall then fill such vacancies.

3. No person shall be a senator who shall not have attained the age of 30 years and been nine years a citizen of the United States, and who shall not, when elected, be an inhabitant of that state for which be shall be chosen.

4. The vice-president of the United States shall be president of the senate, but shall have no vote unless they be equally divided.

5. The senate shall choose their other officers and also a president pro tempore in the absence of the vice-president or when he shall exercise the office of president or when he shall exercise the office of president of the United States.

6. The senate shall have the sole power to try all impeachments. When sitting for that purpose they shall be on oath or affirmation. When the president of the United States is tried the chief usities shall preside, and no person shall be convicted without the concurrence of two-thirds of the members present.

7. Judgment, in cases of impeachment, shall not extend further than to removal from office and disqualification to hold and enjoy any office of ohonor, trust or profit under the United States, but the party convicted shall, nevertheless, be llable and subject to indictment, trial, judgment and punishment according to law

punishment according to law

punishment according to law

Section IV. 1. The times, places and manner of
holding elections for senators and representatives
shall be prescribed in each state by the legislature
thereof, but the congress may at any time, by
law, make or alter such regulations, except as to
the places of choosing senators.

2. The congress shall assemble at least once in
every year, and such meeting shall be on the first
Monday ir. December, unless they shall, by law,
appoint a different day.

Section V. 1. Feed howe shall be the index of

appoint a different day.

Section V. 1. Each house shall be the judge of the elections, returns and qualifications of its own members, and a majority of each shall constitute a quorum to do business, but a smaller number may adjourn from day to day, and may be authorized to compel the attendance of absent members, in such manner and under such penalties as each

in such manner and under such penalties as each house may provide.

2. Each house may determine the rules of its proceedings, punish its members for disorderly behavior, and, with the concurrence of two-thirds, expel a member.

3. Each house shall keep a journal of its proceedings, and from time to time publish the same, excepting such parts as may be their judgment. ceedings, and from time to time publish the same, excepting such parts as may, in their judgment, require secrecy; and the yeas and nays of the members of either house, on any question, shall, at the desire of one-fifth of those present, be entered on the journal.

4. Neither house, during the session of congress, shall, without the consent of the other, adjourn for more than three days, nor to any other place than that in which the two houses shall be sitting.

Section VI. 1. The senstors and representatives Section VI. 1. The senators and representatives shall receive a compensation for their services, to be ascertained by law, and paid out of the treasury of the United States. They shall, in all cases, except treason, felony and breach of the peace, be privileged from arrest during their attendance at the session of their respective houses and in going to or returning from the same, and for any speech or debate in either house they shall not be questioned in any other place.

2. No senator or representative shall, during the time for which he was elected, be appointed to any civil office under the asthority of the United States which shall have been created, or the emoluments whereof shall have been increased, during such time, and no person holding any office under the united States shall be a member of either house during his continuance in office.

either house during his continuance in office.
Section VII. 1. All bills for raising a revenue shall originate in the house of representatives, but

the senate may propose or concur with amendments, as on other bills.

2. Every bill which shall have passed the house of representatives and the senate shall, be-2. Every bill which shall have passed the house of representatives and the senate shall, before it becomes a law, be presented to the president of the United States; if he approve, he shall sign it, but if not, he shall return it, with his objections, to that house in which it shall have originated, who shall enter the objections at large on their journal and proceed to reconsider it. It, after such reconsideration, two-thirds of that house shall agree to pass the bill, it shall be sent, together with the objections, to the other house, by which it shall likewise be reconsidered, and if approved by two-thirds of that house it shall become a law. But in all such cases the votes of both houses shall be determined by yeas and nays, and the names of the persons voting for and against the bill shall be entered on the journal of each house respectively. If any bill shall not be returned by the president within ten days (Sundays excepted) after it shall have been presented to him, the same shall be a law, in like manner as if he had signed it, unless the congress, by their adjournment, prevent its return, in which case it shall not be a law.

3. Every order, resolution or vote to which the

3. Every order, resolution or vote to which the concurrence of the senate and house of representaconcurrence of the schale and house of representa-tives may be necessary (except on a question of adjournment) shall be presented to the president of the United States, and before the same shall take effect shall be approved by him, or, being disapproved by him, shall be repassed by two-thirds of the senate and house of representatives, according to the rules and limitations prescribed in case of a bill.

1. To lay and collect taxes, duties, imposts and excises, to pay the debts and provide for the common defense and general welfare of the United States, but all duties, imposts and excises shall be uniform throughout the United States.

2. To borrow money on the credit of the United States.

3. To regulate commerce with foreign nations and among the several states and with the Indian

and among the several solutions.

4. To establish an uniform rule of naturalization and uniform laws on the subject of bankruptcles throughout the United States.

5. To coin money, regulate the value thereof and of foreign coin, and fix the standard of weights and measures

6. To provide for the punishment of counterfeiting the securities and current coin of the United States.

ing the securities and current coin of the United States.

7. To establish postoffices and postroads.

8. To promote the progress of science and useful arts by securing, for limited times, to authors and inventors, the exclusive right to their respective writings and discoveries.

9. To constitute tribunals inferior to the Supreme court. To define and punish piracles and elonies committed on the high seas and offenses against the law of nations.

10. To declare war, grant letters of marque and reprisal and make rules concerning captures on land and water.

11. To raise and support armies, but no appropriation of money to that use shall be for a longer term than two years.

12. To provide and maintain a navy.

13. To make rules for the government and regulation of the land and naval forces.

14. To provide for calling forth the militia to execute the laws of the union, suppress insurrections and repel invasions.

execute the laws of the union, suppress insurrections and repel invasions.

15. To provide for organizing, arming and disciplining the militia and for governing such part of them as may be employed in the service of the United States, reserving to the states respectively the appointment of the officers and the authority of training the militia according to the discipline prescribed by congress.

16. To exercise exclusive legislation in all cases whatsoever over such district (not exceeding ten

whatsoever over such district (not exceeding ten miles square) as may, by cession of particular states and the acceptance of congress, become the seat of government of the United States, and to

exercise like authority over all places purchased, by the consent of the legislature of the state in which the same shall be, for the erection of forts, magazines, arsenals, dockyards and all other need-

which the same shall be, for the erection of forts, magazines, arsenals, dockyards and all other needful buildings; and,

17. To make all laws which shall be necessary and proper for carrying into execution the foreigning powers and all other powers vested by this constitution in the government of the United States or in any department or officer thereof. Section IX. 1. The migration or importation of such persons as any of the states now existing shall think proper to admit shall not be prohibited by the congress prior to the year one thousand eight hundred and eight, but a tax or duty may be imposed on such importation, not exceeding \$10 for each person.

2. The privilege of the writ of habeas corpus shall not be suspended, unless when, in cases of rebellion or invasion, the public safety may require it.

quire it.

No bill of attainder or ex post facto law shall be passed.

shall be passed.

4. No capitation or other direct tax shall be laid, unless in proportion to the census or enumeration hereinbefore directed to be taken.

5. No tax or duty shall be laid on articles exported from any state. No preference shall be given, by any regulation of commerce or revenue, to the ports of one state over those of another; nor shall vessels bound to or from one state be obliged to enter, clear or pay duties in another.

6. No money shall be drawn from the treasury but in consequence of appropriations made by law, and a regular statement and account of receipts and expenditures of all public money shall be published from time to time.

7. No title of nobliity shall be granted by the United States, and no person holding any office of profit or trust under them shall, without the consent of congress, accept of any present, emolu-

of profit or trust under them shall, without the consent of congress, accept of any present, emolument, office or title of any kind whatever, from any king, prince or foreign state.

Section X. 1. No state shall enter into any treaty, alliance or confederation; grant letters of marque and reprisal; coin money; emit bills of credit; make anything but gold and silver coin a tender in payment of debts; pass any bill of attainder, ex post facto law, or law impairing the obligation of contracts, or grant any title of nobility.

2. No state shall, without the consent of the

nobility.

2. No state shall, without the consent of the congress, lay any imposts or duties on imports or exports except what may be absolutely necessary for executing its inspection laws, and the net produce of all duties and imposts laid by any state on imports or exports shall be for the use of the treasury of the United States, and all such laws shall be subject to the revision and control of the congress. No state shall, without the consent of congress, lay any duty of tonnage, keep troops or ships of war in time of peace, enter into any agreement or compact with another state or with a foreign power or engage in war, unless actually invaded or in such imminent danger as will not admit of delay.

ARTICLE II.

#### ARTICLE II.

ARTICLE II.

Section I. 1. The executive power shall be vested in a president of the United States of America. He shall hold his office during the term of four years, and together with the vice-president, chosen for the same term, be elected as follows:

2. Each state shall appoint, in such manner as the legislature thereof may direct, a number of electors, equal to the whole number of senators and representatives to which the state may be en titled in the congress, but no senator or representative or person holding an office of trust or profit under the United States shall be appointed an elector. an elector.

an elector.

3. The electors shall meet in their respective states and vote by ballot for two persons, of whom one at least shall not be an inhabitant of the same state with themselves. And they shall make a list of all the persons voted for and of the number of votes for each, which list they shall sign and certify and transmit sealed to the sent of government of the United States, directed to the president of the senate. The president of the

senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted. The person having the greatest number of votes shall be the president, if such number be a majority of the whole number of electors appointed, and if there be more than one who have such majority and have an equal number of votes, then the house of representatives shall immediately choose, by ballot, one of them for president; and if no person have a majority, then from the five highest on the list the said house shall, in like manner, choose the president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. In every case after the choice of the president the person having the greatest number of votes of the electors shall be the vice-president. But if there should remain two or more who have equal votes the senate shall choose from them. by ballot, the vice-president. [The foregoing provisions were changed by the 12th amendment.]

4. The congress may determine the time of choosing the electors and the day on which they shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural-born citizen or a citizen of the United States at the time of the senate shall, in the presence of the senate and

shall give their votes, which day shall be the same throughout the United States.

5. No person except a natural-born citizen or a citizen of the United States at the time of the adoption of this constitution shall be eligible to the office of president; neither shall any person be eligible to that office who shall not have attained to the age of 35 years and been fourteen years a resident within the United States.

6. In case of the removal of the president from office or of his death, resignation or inability to discharge the powers and duties of the said office, the same shall devolve on the vice-president; and the congress may, by law, provide for the case of removal, death, resignation or inability both of the president and vice-president, declaring what officer shall then act as president, and such officer shall act accordingly, until the disability be removed or a president shall be elected.

7. The president shall, at stated times, receive for his services a compensation, which shall neither be increased nor diminished during the period for which he shall have been elected, and he shall not receive within that period any other modules of the states or any of them.

8. Before he enters on the execution of his officer shall are the following a state of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of the president of th

8. Before he enters on the execution of his of-fice he shall take the following oath or affirmation:

I do solemnly swear (or affirm) that I will faithfully execute the office of president of the United States, and will, to the best of my ability, preserve, protect and defend the constitution of the United States.

Section II. 1. The president shall be command-Section II. 1. The president shall be commander in ehlef of the army and navy of the United States and of the militia of the several states when called into the actual service of the United States. He may require the opinion, in writing, of the principal officer in each of the executive departments upon any subject relating to the duties of their respective offices, and he shall have the power to grant reprieves and pardons for offenses against the United States except in cases of impactment of impeachment.

of impeachment.

2. He shall have power, by and with the advice and consent of the senate, to make treaties, provided two-thirds of the senators present concur, and he shall nominate, and, by and with the advice and consent of the senate, shall appoint ambassadors, other public ministers and consuls, judges of the Supreme court and all other officers of the United States whose appointments are not herein otherwise provided for and which shall be established by law. But the congress may, by law, vest the appointment of such inferior officers as they shall think proper in the president alone, in the courts of law or in the heads of departments.

3. The president shall have power to fill up all vacancies that may happen during the recess of the senate by granting commissions, which shall expire at the end of their next session.

Digitized by GOOGLE

Section III. He shall, from time to time, give to the congress information of the state of the union and recommend to their consideration such measures as he shall judge necessary and expedient. He may, on extraordinary occasions, concene both houses or either of them, and in case of disagreement between them, with respect to the time of adjournment, he may adjourn them to such time as he shall think proper. He shall receive ambassadors and other public ministers. He shall take care that the laws be faithfully executed, and shall commission all officers of the United States. United States.

Section IV. The president, vice-president and all civil officers of the United States shall be removed from office on impeachment for and conviction of treason, bribery or other high crimes and misdemeanors.

## ARTICLE III.

Section I. The judicial power of the United States shall be vested in one Supreme court and in such inferior courts as the congress may, from time to time, ordain and establish. The judges, both of the Supreme and inferior courts, shall hold their offices during good behavior, and shall, at stated times, receive for their services a compensation, which shall not be diminished during their continuance in office.

pensation, which shall not be diminished during their continuance in office.

Section II. 1. The judicial power shall extend to all cases, in law and equity, arising under this constitution, the laws of the United States and treaties made or which shall be made, under their constitution, the laws of the United States and treaties made or which shall be made, under their untreaties made or which shall be made, under their untreaties made or which shall be made, under their untreaties made and treaties and treaties and treaties to which the United States shall be a party; to controversies between two or more states; between a state and clizens of another state; between citizens of different states; between citizens of different states, between citizens or the citizens thereof and foreign states, citizens or subjects.

2. In all cases affecting ambassadors, other public ministers and consuls and those in which a state shall be a party the Supreme court shall have appellate jurisdiction. In all the other cases before mentioned the Supreme court shall have appellate jurisdiction, both as to law and fact, with such exceptions and under such regulations as the congress shall make.

3. The trial of all crimes, except in cases of impeachment, shall be by jury, and such trials shall be held in the state where the said crimes shall have been committed, but when not committed within any state the trial shall be at such place or places as the congress may by law have directed.

Section III. 1. Treason against the United States shall consist only in levying war against

Greeted.

Section III. 1. Treason against the United States shall consist only in levying war against them or in adhering to their enemies, giving them ald and comfort. No person shall be convicted of treason unless on the testimony of two witnesses to the same overt act or on confession in open

to the same overt act or on confession in open court.

2. The congress shall have power to declare the punishment of treason, but no attainder of treason shall work corruption of blood or forfeiture except during the life of the person attainted.

#### ARTICLE IV.

Section I. Full faith and credit shall be given in each state to the public acts, records and judicial proceedings of every other state. And the congress may, by general laws, prescribe the manner in which such acts, records and proceedings shall be proved and the effect thereof.

Section II. 1. The citizens of each state shall be entitled to all privileges and immunities of citizens in the several states.

izens in the several states.

2. A person charged in any state with treason, felony or other crime, who shall flee from justice and be found in another state, shall, on demand of the executive authority of the state from which he fled, be delivered up, to be removed to the state having jurisdiction of the crime.

3. No person held to service or labor in one state under the laws thereof, escaping into another, shall, in consequence of any law or regula-

tion therein, be discharged from such service or labor, but shall be delivered up on claim of the party to whom such service or labor may be due.

party to whom such service or labor may be due. Section III. 1. New states may be admitted by the congress of this union, but no new state shall be formed or erected within the jurisdiction of any other state, nor any state be formed by the junction of two or more states or parts of states, without the consent of the legislatures of states, without the consent of the legislatures of the states concerned as well as of the congress.

2. The congress shall have power to dispose of and make all needful rules and regulations respecting the territory or other property belonging to the United States, and nothing in this constitution shall be so construed as to prejudice any claims of the United States or of any particular state. state.

Section IV. The United States shall guarantee to every state in this union a republican form of government, and shall protect each of them against invasion, and on application of the legislature or of the executive (when the legislature cannot be convened) against domestic violence.

#### ARTICLE V.

The congress, whenever two-thirds of both houses shall deem it necessary, shall propose amendments to this constitution, or, on the application of the legislatures of two-thirds of the several states, shall call a convention for proposing amendments, which, in either case, shall be valid to all intents and purposes as part of this constitution, when ratified by the legislatures of three-fourths of the several states or by conventions in three-fourths thereof, as the one or the other mode of ratification may be proposed by the congress; provided, that no amendment which may be made prior to the year one thousand eight hundred and eight shall in any manner affect the first and fourth clauses in the ninth section of the first article, and that no state, without its consent, shall be deprived of its equal suffrage in the senate. The congress, whenever two-thirds of both houses senate.

## ARTICLE VI.

Section I. 1. All debts contracted and engagements entered into before the adoption of this constitution shall be as valid against the United States under this constitution as under the confederation.

2. This constitution and the laws of the United States which shall be made in pursuance thereof, and all treaties made or which shall be made under authority of the United States, shall be the expreme law of the land, and the judges in every state shall be bound thereby, anything in the constitution or laws of any state to the contrary not-withetendier. withstanding.

3. The senators and representatives before mentioned and the members of the several state legislatures and all executive and judicial officers, both of the United States and of the several states, shall be bound, by oath or affirmation, to support this constitution, but no religious test shall ever be required as a qualification to any office or public trust under the United States.

#### ARTICLE VII.

The ratification of the conventions of nine states shall be sufficient for the establishment of this constitution between the states so ratifying the

One in convention, by the unanimous consent of the states present, the seventeenth day of Sep-tember, in the year of our Lord one thousand seven hundred and eighty-seven, and of the inde-pendence of the United States of America the twelfth.

#### AMENDMENTS TO THE CONSTITUTION.

AMENDMENTS TO THE CONSTITUTION.

Proposed by congress and ratified by the legislatures of the several states, pursuant to article V, of the original constitution—For the first twelve, 1 stat. at large, 21. Thirteenth proposed, 13 d., 567; proclaimed, 16. 774. Fourteenth proposed, 14 Id., 358; proclaimed, 15 Id., 708, 708. Fifteenth proposed, 15 Id., 346.

I. Congress shall make no law respecting an establishment of neligion or prohibiting the free exercise thereof, or abridging the freedom of

Digitized by GOOGLE

speech or of the press, or the right of the people peaceably to assemble and to petition the government for a redress of grevances.

II. A well-regulated militia being necessary to

the security of a free state, the right of the peo-ple to keep and bear arms shall not be infringed.

III. No soldier shall, in time of peace, be quartered in any house without the consent of the owner; nor in wartime but in a manner to be prescribed by law.

IV. The right of the people to be secure in their persons, houses, papers and effects against unreasonable searches and seizures shall not be violated, and no warrants shall issue but upon probable cause, supported by oath or affirmation, and particularly describing the place to be searched and the persons or things to be seized.

V. No present shall be held to answer for a cap-

and the persons or things to be seized.

V. No person shall be held to answer for a capital or otherwise infamous crime unless on a presentment or indictment of a grand jury except in cases arising in the land or naval forces or in the militia, when in actual service, in time of war or public danger; nor shall any person be subject for the same offense to be twice put in jeopardy of life or limb; nor shall be compelled in any criminal case to be a witness against himself, nor be deprived of life, liberty or property without due process of law; nor shall private property be taken for public use without just compensation.

VI. In all criminal prosecutions the accused

taken for public use without just compensation.

VI. In all criminal prosecutions the accused shall enjoy the right to a speedy and public trial by an impartial jury of the state and district wherein the crime shall have been committed, which district shall have been previously ascertained by law, and to be informed of the nature and cause of the accusation; to be confronted with the witnesses against him; to have compulsory process for obtaining witnesses in his favor, and to have the assistance of counsel for his defense.

VII I make a common law where the value

VII. In suits at common law, where the value in controversy shall exceed \$20, the right of trial by jury shall be preserved, and no fact tried by jury shall be otherwise re-examined in any court of the United States than according to the rules of the common law.

VIII. Excessive bail shall not be required, nor excessive fines imposed, nor cruel and unusual punishments inflicted.

The enumeration in the constitution of certain rights shall not be construed to deny or disparage others retained by the people.

X. The powers not delegated to the United States by the constitution nor prohibited by it to the states are preserved to the states respectively or to the people.

XI. The judicial power of the United States shall not be construed to extend to any suit in law or equity commenced or prosecuted against one of the United States by clizens of another state or by clizens or subjects of any foreign

Section 1. The electors shall meet in their All. Section 1. The electors shall meet in their respective states and vote by ballot for president and vice-president, one of whom at least shall not be an inhabitant of the same state with themselves; they shall name in their ballots the person voted for as president, and in distinct ballots the person voted for as vice-president, and they shall make distinct lists of all persons voted for as president and of all persons voted for as president and of all persons voted for as they shall make distinct lists of all persons voted for as president and of all persons voted for as vice-president, and of the number of votes for each, which list they shall sign and certify and transmit sealed to the seat of the government of the Unitred States, directed to the president of the senate; the president of the senate shall, in the presence of the senate and house of representatives, open all the certificates and the votes shall then be counted; the person having the greatest number of votes for president shall be the president, if such number be a majority of the whole number of electors appointed, and if no person have such majority, then from the persons having the highest numbers, not exceeding three, on the list of those voted for as president, the house of representatives shall choose immediately, by ballot, for president. But in choosing the president the for president. But in choosing the president the votes shall be taken by states, the representation from each state having one vote; a quorum for

this purpose shall consist of a member or members from two-thirds of the states, and a majority of all the states shall be necessary to a choice. And if the house of representatives shall not choose a president whenever the right of choice shall devolve upon them before the fourth day of March next following, then the vice-president shall act as president, as in the case of the death or other constitutional disability of the president.

Section 2. The person having the greatest number of votes as vice-president shall be the vice-president, if such number be a majority of the whole number of electors appointed, and if no person have a majority, then from the two highest numbers on the list the senate shall choose a vice-president. A quorum for the purpose shall consist of two-thirds of the whole number as shall be necessary to a choice.

Section 3. But no person constitutionally incligible to the office of president shall be eligible to the office of president shall shall shall shall shall shall s

Section 3. But no person constitutionally ineligible to the office of president shall be eligible to that of vice-president of the United States.

XIII. Section 1. Neither slavery nor involuntary servitude, except as a punishment for crime, whereof the party shall have been duly convicted, shall exist within the United States or any place subject to their jurisdiction.

Section 2. Congress shall have the power to enforce this article by appropriate legislation.

XIV. Section 1. All persons born or naturalized in the United States and subject to the jurisdiction thereof are citizens of the United States and of the state wherein they reside. No state shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any state deprive any person of life, liberty or property without due process of liw, nor deny to any person within its jurisdiction the equal protection of the laws.

Section 2. Representatives shall be apportioned among the several states according to their respective numbers, counting the whole number of persons in each state, excluding Indians not taxed. But when the right to vote at any election for the choice of electors for president and vice-president of the United States, representatives in congress, the executive and judicial officers of a state or the members of the legislature thereof is denied to any of the male inhabitants of such state, being 21 years of age and citizens of the United States, or under any way abridged, except for participation in rebellion or other crime, the basis of representation therein shall be reduced in the proportion which the number of such male citizens shall have engaged in insurrection or representative in congress or elector of president and vice-president, or hold any office, civil or military, under the United States, or under any state, who, having previously taken the oath as a member of congress or as an officer of the United States, or as a member of persons and bounties for services in suppressi

of this article.

XV. Section 1. The right of citizens of the United States to vote shall not be denied or account of race, color or previous condition of servitude. Section 2.

Section 2. The congress shall have power to enforce this article by appropriate legislation.

Note—In 1800 and 1810 the territory of Illinois county was 1,103 and of St. Clair 1,255, total 2,355; contained but two organized counties, Randolph in 1810 Randolph 7,275 and St. Clair 5,007, total and St. Clair. In 1800 the population of Randolph 12,282.

## FACTS ABOUT ILLINOIS COUNTIES.

Date of organization, area in square miles and origin of names.

Adams—Jan. 13, 1825—830—John Quincy Adams. Alexander—March 4, 1819—220—Wm. M. Alexander. Bond—Jan. 4, 1817—880—Gov. Shadrach Bond. Boone—March 4, 1837—288—Daniel Boone. Brown—Feb. 1, 1839—306—Gen. Jacob Brown. Bureau—Feb. 28, 1837—846—Pierre de Buero (Indian trader).

Calhoun—Jan. 10, 1825—251—John C. Calhoun. Carroll—Feb. 22, 1839—450—Charles Carroll of Car-

rollton. rollton.

Cass—March 3, 1837—460—Gen. Lewis Cass.

Champaign—Feb. 20, 1833—1,008—County in Ohio.

Christian—Feb. 15, 1839—702—County in Kentucky.

Clark—March 22, 1819—513—George Rogers Clark.

Clay—Dec. 23, 1824—466—Henry Clay.

Clinton—Dec. 27, 1824—487—DeWitt Clinton.

Coles—Dec. 25, 1830—520—Gov. Edward Coles.

Cook—Jan. 15, 1831—890—Danlel P. Cook.*

Crawford—Dec. 31, 1816—470—Wm. H. Crawford of

Georgia. Cumberland-March 2, 1843-350-Cumberland road. DeKalb-March 4, 1837-650-Baron DeKalb. DeWitt-March 1, 1839-440-DeWitt Clinton Douglas-Feb, 8, 1859-440-Stephen A, Douglas. DuPage-Feb. 9, 1839-340-DuPage river. DuPage—Feb. 9, 1839—340—DuPage river. Edgar—Jan. 3, 1823—640—John Edgar (merchant). Edwards—Nov. 28, 1814—220—Gov. Ninian Edwards. Effingham—Feb. 15, 1831—486—Gov. Edw. Effingham. Fayette—Feb. 14, 1821—720—Marquis de Lafayette. Ford—Feb. 17, 1859—580—Gov. Thomas Ford. Franklin—Jan. 2, 1818—430—Benjamin Franklin. Fulton—Jan. 28, 1823—864—Robert Fulton. Gallatin—Sept. 14, 1812—340—Albert Gallatin. Greene—Jan. 20, 1821—540—Gen. Nathanael Greene. Grundy—Feb. 17, 1841—440—Felix Grundy of Tennessee.

nessee.

Inmilton—Feb. 8, 1821—440—Alexander Hamilton.

Hancock—Jan. 13, 1825—780—John Hancock.

Hardin—March 2, 1839—180—County in Kentucky.

Henderson—Jan. 30, 1841—380—Henderson river.

Henry—Jan. 13, 1825—825—Patrick Henry.

Iroquois—Feb. 26, 1833—1,100—Indian name.

Jackson—Jan. 10, 1816—580—Andrew Jackson.

Jasper—Feb. 15, 1831—484—Sergt. Wm. Jusper.

Jofferson—March 26, 1819—466—Thomas Jefferson.

Jersey—Feb. 28, 1839—360—New Jersey.

Jo Daviess—Feb. 17, 1827—650—Col. Jo Daviess of Kentucky.

Kentucky. Johnson-Sept. 14, 1812-340-Col. Richard M. John-

Kane—Jan. 16, 1836—540—Senator Elias K. Kane. Kankakee—Feb. 11, 1853—680—Indian name. Kendall—Feb. 19, 1841—321—Amos Kendall (postmaster-general).

master-general).

Knox—Jan. 13, 1825—720—Gen. Henry Knox.

Lake—March 1, 1839—394—Lake Michigan.

LaSalle—Jan. 15, 1831—1,152—Explorer LaSalle.

Lawrence—Jan. 16, 1821—362—Com. Jas. Lawrence.

Lee—Feb. 27, 1839—728—Richard Henry Lee.

Livingston—Feb. 27, 1837—1,026—Edward Livingston.

Logan—Feb. 15, 1839—620—Dr. John Logan.† Macon—Jan. 19, 1829—580—Nathaniel Mac North Carolina. Macon of

North Caronna.

Macoupin—Jan. 17, 1829—864—Indian name.

Madison—Sept. 14, 1812—740—James Madison.

Marion—Jan. 24, 1823—576—Gen. Francis Marion.

Marshall—Jan. 19, 1839—350—John Marshall.

Mason—Jan. 20, 1841—518—County in Kentucky.

Massac—Feb. 8, 1843—240—Fort Massac.

McDonough—Jan. 25, 1826—576—Gen. Thomas Me Donough.

McHenry—Jan. 16, 1836—612—Gen. Wm. McHenry. McLean—Dec. 25, 1830—1,161—John McLean (congressman). Menard—Feb. 15, 1839—311—Lieut.-Gov. Pierre Me-

nard.

Mercer—Jan. 13, 1825—550—Gen. Hugh Mercer. Monroe—Jan. 6, 1816—380—James Monroe. Montgomery—Feb. 12, 1821—740—Gen. R. Montgomery.

Morgan—Jan. 31, 1823—563—Gen. Daniel Morgan, Moultrie—Feb. 16, 1843—340—Gen. Wm. Moultrie. Ogle-Jan. 16, 1836-773-Lieut, Joseph Ogle.

Peorla-Jan. 13, 1825-630-Indian name,
Perry-Jan. 29, 1827-432-Com. Oliver H. Perry,
Piatt-Jan. 27, 1841-440-Benj, Piatt (atty.gen.),
Pike-Jan. 31, 1821-756-Zebulon M. Pike
Pope-Jan. 10, 1816-360-Nathaniel Pope,
Pulaski-March 3, 1843-190-Count Casimir Pulaski,
Putnam-Jan. 13, 1825-170-Gen. Israel Putnam. Randolph—Oct. 5, 1795—560—Edmund Randolph, Richland—Feb. 24, 1841—380—County in Ohio, Rock Island—Feb. 9, 1839—420—Island same name.

Saline—Feb. 25, 1847—396—Saline creek.
Sangamon—Jan. 30, 1821—875—Indian name.
Schuyler—Jan. 13, 1825—414—Gen. Philip Schuyler.
Scott—Feb. 16, 1839—252—County in Kentucky
Shelby—Jan. 23, 1827—760—Gov. Isaac Shelby.
Stark—May 2, 1839—290—Gen. John Stark.
St. Clair—April 27, 1790—Gen. Arthur St. Clair.
Stephenson—March 4, 1837—573—Col. Benjamin

Stephenson. Tazewell-Jan. 31, 1827-650-Gov. L. W. Tazewell,

Union-Jan. 2, 1818-400-Union of states. Vermilion-Jan. 18, 1826-882-Vermilion river. Vermillon—Jan. 18, 1826—882—Vermillon river.
Wabash—Dec. 27, 1824—220—Indian name.
Warren—Jan. 18, 1825—540—Gen. Joseph Warren.
Washington—Jan. 2, 1818—557—George Washington.
Wayne—March 26, 1819—720—Gen. Anthony Wayne.
Wilte—Dec. 9, 1815—500—Capt. Leonard White.
Wilteside—Jan. 16, 1836—676—Col. Sam Whiteside.
Will—Jan. 12, 1836—850—Conrad Will. ‡
Williamson—Feb. 28, 1839—440—County in Tennes-

Winnebago-Jan. 16, 1836-540-Indian name. Woodford-Feb. 27, 1841-556-County in Kentucky.

*Lawyer and first attorney-general of Illinois. †Father of Gen. John A. Logan. †Member of constitutional convention of 1818.

# MEMBERS OF THE 47TH GENERAL ASSEMBLY OF ILLINOIS (1910-1911).

#### CARNEGIE PEACE FUND.

Dec. 14, 1910, Andrew Carnegie transferred to a board of trustees \$10,000,000 in 5 per cent first-mortgage bonds, the revenue of which will be used to "hasten the abolition of international war" and to establish lasting world peace. The formal transfer was made at a meeting in the rooms of the Carnegie Research foundation. The trustees organized by choosing as president United States Senator Elihu Root, permanent representative of the United States at The Hague tribunal. President Taft consented to be honorary president of the foundation.

the foundation.

The method by which the annual income of half a million dollars shall be expended is left by Mr. Caracgie entirely to the trustees. The foundation is to be perpetual, and when the establishment of universal peace is attained the donor provides that the revenue shall be devoted to the banksment of the "next most degrading evil or evils," the suppression of which would "most advance the progress, elevation and happiness of men."

the suppression of which would "most advance the progress, elevation and happiness of men."
Trustees of the fund are: United States Senator Elihu Root, former secretary of state and former secretary of war.
Dr. Nicholas Murray Butler, New York, president of Columbia university.
Dr. Henry S. Pritchett, president of the Carnegie Foundation for the Advancement of Teaching.
Joseph H. Choate, lawyer, former ambassador to Great British. Great Britain.

Albert K. Smiley, Lake Mohonk, educator and humanitarian. Dr. Charles W. Eliot, president emeritus of Harvard university

James Brown Scott, solicitor of the state depart-John W. Foster, lawyer, former secretary of

Andrew J. Montague, lawyer, former governor of Virginia.
William M. Howard, lawyer and congressman, Lexington, Ga.

Judge Thomas Burke, Seattle, Wash. James L. Slayden, congressman, San Antonio,

Andrew D. White, former ambassador to Ger-

Robert S. Brookings, lawyer, St. Louis, Mo. Samuel Mather, banker and steel manufacturer,

Cleveland, O.

J. G. Schmidlapp, railroad man, Cincinnati, O.
Arthur William Foster, regent of the University
of California, San Francisco.

R. A. Franks, banker, Hoboken, N. J. Charlemagne Tower, former ambassador to Germany and Russia.

Oscar Straus, ambassador to Turkey. Austen G. Fox, lawyer, New York. John L. Cadwallader, lawyer, New York.

John Sharp Williams, senator-elect from Missis-C. L. Taylor of Pittsburg, chairman of the Car-

negie hero-fund commission. George W. Perkins of New York, financier and philanthropist.

The informal trust deed presented by Mr. Carnegle to the trustees reads in part as follows:

negle to the trustees reads in part as follows:
 "Gentlemen: I have transferred to you as trustees of the Carnegle peace fund \$10,000,000 5 per cent first-mortrage bonds, value \$11,500,000, the revenue of which is to be administered by you to hasten the abolition of international war, the foul-set blot upon our civilization. Although we no longer eat our fellow men or torture prisoners, or sack cities, killing their inhabitants, we still kill each other in war like barbarians. Only wild beasts are excusable for doing that in this the twentieth century of the Christian era, for the crime of war is inherent, since it decides not in favor of the right but always of the strong. The nation is criminal which refuses arbitration and drives its adversary to a tribunal which knows nothing of righteous judgment."

#### GOVERNMENT OF ILLINOIS.

Legislative power is vested in a general assembly, consisting of a senate and house of representatives, both elected by the people. The state is divided into fifty-one senatorial districts, each of which elects a senator and three representatives. The general assembly makes laws and appropriates money for the government of the state, elects United States senators to represent the state and in general stands in the same relation to the state as congress does to all the states as a whole. The powers and duties of the chief executive officers are as follows:

Governor—The governor is vested with the chief executive power of the state. He is the commander in chief of the military and naval forces and may call out the militiar to maintain the peace. He is required to inform the general assembly, by message, of the condition of affairs of the state and to recommend needed legislation. He may, by proclamation, call a special session of the assembly or adjourn it in case of disagreement between the two houses. He has the power to appoint certain officers and during a recess of the senate may fill yearnels elections to fill yearnels and may call special elections to fill yearnels and may and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call special elections to fill yearnels and may call and the fill yearnels and may call and the fill yearnels and may call and the fill yearnels and the fill yearnels a to appoint certain officers and during a recess of the senate may fill vacancies or remove certain officers and may call special elections to fill vacancies in certain offices. He may make requisitions upon the governors of other states for the return of fugitives from justice or offer rewards for the arrest of offenders against the laws of the state. He exercises a general supervision over the penitentiaries and may grant reprieves, commutations and pardons and may restore the rights of citizenship to ex-convicts. He may approve acts of the legislature and exercise the veto power. Lieutenant-Governor-This officer is ex-officio president of the senate and has the power to cast the deciding vote in case of a tie. In case of the death, conviction on impeachment, failure to qualify, resignation, absence from the state or other

fy, resignation, absence from the state or other disability on the part of the governor, the licu-tenant-governor succeeds to the office to the close

tenant-governor succeeds to the office to the close of the term.

Secretary of State—The secretary of state is charged with the safekeeping of the original laws and resolutions of the general assembly; with all books, bills and documents deposited with him by either house, and with all bonds, records and papers filed in his office. He keeps a record of the official acts of the governor, furnishes certified copies of the same to the assembly on request and certified copies of any of the records of his office on the payment of the statutory fees. He

OF ILLINOIS.

countersigns and affixes the seal of the state to all proclamations and commissions issued by the governer; issues licenses for incorporations and certificates of organization to cities and villages and incorporated towns. He has charge of most of the buildings and grounds belonging to the state in Springfield, furnishes supplies for the general assembly and supervises the printing and distribution of all the public documents of the state. He calls the house of representatives to order at the beginning of each general assembly and presides over the same until the election of a speaker. He is the keeper of the great seal of the state and is the custodian and sealer of weights and measures. measures.

measures.

Auditor—The auditor is required to keep all the accounts of the state; to audit the accounts of all officers or other persons authorized to receive moneys from the state treasury; to personally sign all warrants drawn on the treasury; to institute suits wherein the state is a plaintiff, and to make a blennial report of the business of his office to the governor. With the governor and treasurer he determines the state tax rate. He exercises a general supervision over state banks, building, loan and homestead associations.

State Treasurer—The state treasurer is custodian

general supervision over state banks, building, loan and homestead associations.

State Treasurer—The state treasurer is custodian of the revenues and public moneys of the state. He must make monthly settlements with the auditor and a biennial report to the governor.

Superintendent of Public Instruction—The superintendent exercises a general supervision over all the public schools of the state. He is the general and legal adviser of the county superintendents and must report biennially to the governor the general condition of all the schools of the state, the amount raised by taxation for school purposes and the manner of its expenditure and the general condition of all the school funds. He may grant state certificates to teachers or cause them to be withheld and must visit charitable institutions which are educational in character.

Attorney-General—It is the duty of the attorney-general to represent the state in the Supreme court in all cases in which the state is interested; to act as counsel for all state officials; to be the legal adviser of the governor and other state officers in matters relating to their official duties, and, on request, to furnish them, as well as either branch of the general assembly, with written opinions upon constitutional or legal questions.

Secretary state board of agriculture.

State veterinarian.
President Illinois Horse Breeders' association.
Secretary Illinois Horse Breeders' association.
President Illinois Farmers' institute.

# ILLINOIS PRIMARY-ELECTION LAWS.

Chronology of invalidated acts.
No. 1—Passed May 4, 1906; approved May 18; in force July 1; declared void April 5, 1906.
No. 2—Passed May 16, 1906; approved May 23; in force July 1; declared void April 5, 1908.
The primary election law of 1905 was declared neonstitutional by the state Supreme court on the ground that it contained provisions delegating legislative functions to political organizations, required the payment of fees by candidates for office, set up a geographical qualification for candidates for the legislature and made out one set of requirements for one part of the state and another set for another part.
The primary election law of 1906 was declared unconstitutional for the following reasons: The act contained more than the title specified, the latter wholly falling to provide for a primary election for the purpose of selecting candidates for office; it lodged legislative power with purely voluntary party organizations; it conflicted with the bill of rights which provides that all elections shall be free and equal; it provided no means by which a person might register for the primary election, if for any ason he had failed to register

at the last preceding general election, and it orovided that a voter could vote for only one candidate for representative in the general assembly.

The primary election law of 1998 was also declared unconstitutional by the state Supreme court because it required voters to register in order to vote at a primary in sections where the registry act is in force, but provided no opportunity for a voter to register within the period of thirty days before the primary election, thus depriving constitutionally qualified voters of their right to vote at primaries. Further, the law was invalid because it abridged the constitutional rights of a voter by denying to him the right to vote for three candidates for state representative, or to cumulate and divide his vote upon a less number. The law authorized senatorial committees to determine the number of candidates to be nominated and restricted the voter at the primary to one vote for each of as many candidates as the senatorial committee decided should be nominated. The sections declared invalid on account of these defects were 44, relating to registration, and 11, relating to the nomination of candidates for state representative. (For primary election laws passed by the legislature in 1910 see pages 47 to 51 of this issue of The Daily News Almanac and Year-Book.)

#### ILLINOIS EMPLOYERS' LIABILITY COMMISSION.

Under the law, approved March 4, 1910, creating an employers' liability commission, Gov. Deneen on March 15 appointed the following as members: Representing employes—Patrick Carr, Ladd; George Golden, Chicago; M. J. Boyle, Chicago; Daniel J. Gorman, Peoria; John Flora, Chicago; Edwin R. Wright, Caicago, Representing employers—P. A. Peterson, Rockford; Charles Piez, Chicago; T. Bent, Chicago; Ira G. Rawn, Chicago; Robert E. Conway, East St. Louis; Mason B. Starring, Chicago Starring, Chicago.

The duty of the commission was to investigate the problems of industrial accidents, and especially the present condition of the law of liability for ly the present condition of the law of liability for injuries or death suffered in the course of industrial employment and the best method of providing for connensation. It was required to present its conclusion and recommendations to the governor by Sept. 15, 1910. The condition was made, however, that the commission should report only such recommendations as should be agreed upon by a majority of that part of the commission representing the employers and a majority of the part representing the employes.

The commission made the investigation required by the act, held a number of public meetings and

The commission made the investigation required by the act, held a number of public meetings and drew up a bill "for an act to promote the general welfare of the people of this state by providing compensation for accidental injuries or death caused in the course of employment." On the final vote, however, the bill failed to receive the assent of a majority on each side and was therefore not formally submitted to the governor, though included in the commission's report. Some of the employers objected to the amount of compensation and the pension plan in cases of permanent and total disability. M. J. Boyle and John C. Flora,

representing the employes, declined to sign any compensation act because in their opinion an act of that kind should be preceded by a modification of the laws known as "the fellow servant rule," "assumption of risk" and "contributory negli-"assumption otion of risk" and "contributory negli-which they claimed unduly favored the employers.

minioyers.

While the commission failed in accomplishing the purpose for which it was created, it gathered a mass of statistics relating to industrial accidents in America and Europe. These were set forth in a printed report signed by Messrs, Piez, Jackson, Starring, Conway, Peterson and Bent and submitted to the governor. One table showed that in 620 cases of fatal accidents to employes in various parts of Illinois, 281 were settled out of court with an aggregate compensation of \$32.451; ill cases were pending in the courts and in 204 cases no recovery of any kind was made.

"But this outline, convenient for certain pur-

cases no recovery of any kind was made.
"But this outline, convenient for certain purposes, scarcely hints at the situation which the commission found." says the report. "It gives no idea of the suffering and hardship which our investigations disclosed; it tells nothing of the long and tedious fights, of the inequitable verdicts, the delays and uncertainties of the law; it scarcely suggests the unequal character of the struggle between the claim agents and the families of the deceased breadwiners. Almost every individual tween the cinim agents and the families of the deceased breadwinners. Almost every individual case investigated reflected some aspect or other of this sort, driving home to the members of the commission the conviction that the present system is unjust, haphazard, inadequate and wasteful, the cause of enormous suffering, of much disrespect for the convergence of the convergence of the cause of enormous suffering, of much disrespect for the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the convergence of the converg law and of a badly distributed burden upon society."

*Includes assessment on capital stock of railroads and other corporations.

Note—The assessed value is one-third of actual value. Prior to 1909 it was one-fifth. In 1910 the assessment on lands was \$655,931,832; on lots, \$876,-

593.238; railroad capital stock, \$2,684,111; other capital stock \$80,265,148; electric roads, \$14,507,628. The total full value of all classes of property in Illinois in 1910 was \$6,599,105,928, as against \$6,476,095,350 in 1909.

#### ILLINOIS PAROLE LAW INVALID.

The Illinois Supreme court in a decision announced Feb. 16, 1910, held the parole law passed by the legislature in 1899 to be unconstitutional. Section 16 of article 4 of the constitution provides that "bills making appropriations for the pay of that "bills making appropriations for the pay of members and officers of the general assembly and for the salaries of the officers of the government shall contain no provision on any other subject." Section 11 of the act creating the parole system provided that "there shall be allowed to each member of the board of pardons the sum of \$1,500 each

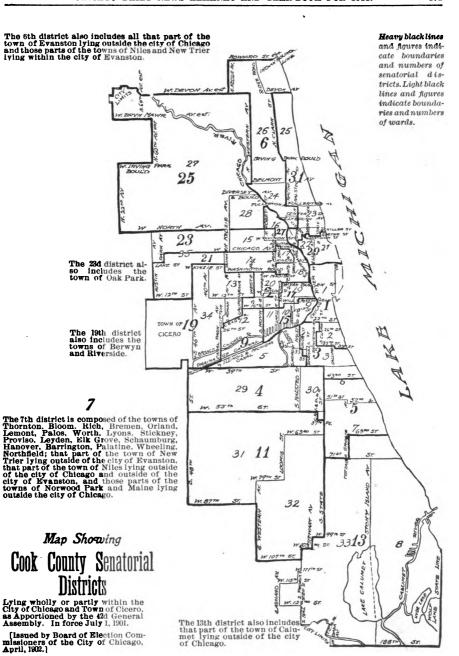

per year to compensate him for services performed under this act, said sum to be payable monthly on certificates of the board, approved by the governor and payable out of any money in the treasury not otherwise appropriated." As members of the board of pardons are officers of the government, and as the appropriation for their salaries was placed in a set centaining provisions on another subject. an act containing provisions on another subject, the conflict with the constitution was held to be fatal, making the whole act void.

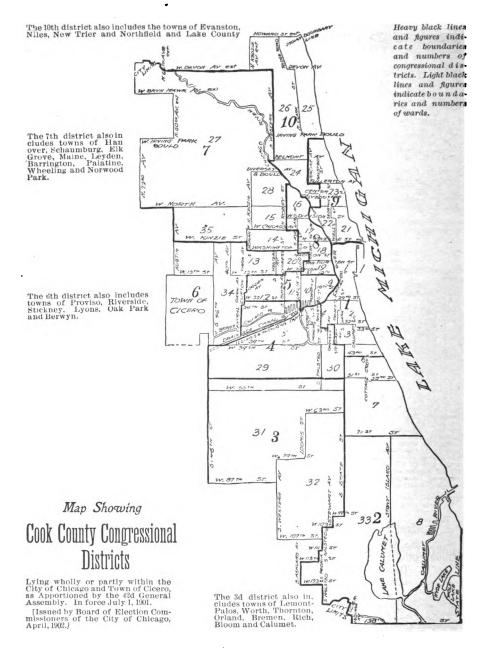

#### GARNISHMENT LAW OF ILLINOIS.

Section 14 of the act of 1872 as amended in 1897 and 1901 declares: "The wages for services of a wage earner who is the head of a family and residing with the same, to the amount of fifteen (\$15) dollars per week, shall be exempt from garnishment. All above the sum of fifteen (\$15)

dollars per week shall be liable to garnishment."
Employers are obliged to pay wages amounting to \$15 or less, notwithstanding the service of a writ of garnishment, providing the person to whom wages are due makes affidavit that he is the head of a family and is living with the same.

S. Ryan, deputy comptroller; Edward J. McCarthy, chief clerk; Morris Salmonson, marriage
licenses; Dr. T. J. Ferguson, vital statistics; M.
M. Hoffman, redemptions; Louis F. Wilk, cashler;
Frank McNally, bookkeeper; A. S. Cameron, tax extension.

extension. Duties—The county clerk is clerk of the county board and ex officio comptroller of county financial affairs. As such he has charge of all deeds, mortgages, contracts, bonds, notes and similar papers belonging to the county, settles all accounts, keeps books showing appropriations and expenditures, makes our report for fiscal year and submits estimates for the expenses of all the departments of the county organization. Duties-The

# COUNTY TREASURER'S OFFICE.

Courthouse, 1st and 2d floors, north end. Courtnouse, ist and zd hoors, noth end.
County Treasurer—William L. O'Connell, D.
Assistant Treasurer—Edward J. Werner.
Dutles—The county treasurer receives and disburses, pursuant to law, all the revenues and other public moneys belonging to the county.
He personally countersigns county orders and renders accounts to the board of commissioners.

#### COMPTROLLER'S OFFICE.

511 courthouse

Comptrolle:-Robert M. Sweitzer, D. Deputy Comptroller-Frank S. Ryan, D. Chief Clerk-Edward J. McCarthy. Duties-See County Clerk.

# SUPERINTENDENT OF PUBLIC SERVICE.

519 courthouse.

Superintendent of Public Service-James M. Slattery, D.

Duties-Purchases all supplies for the county institutions, advertising for bids at specified times and entering into yearly or quarterly contracts and making tests from time to time of the articles furnished to determine if they are up to contract requirements.

# RECORDER'S OFFICE.

Courthouse, 1st floor, south end. Recorder of Deeds—Abel Davis, R. Chief Deputy—John V. Clinnin. Chief Clerk—Lee A. Dunne.

Duties—The recorder is the keeper of the records and upon the filing of any instrument in writing in his office entitled to be recorded he must spread the same on the record books provided for that purpose, in the order of the time of filing. He is also the official abstract maker for Cook county.

# REGISTRAR OF TITLES.

Courthouse. 1st floor, south end.

Registrar—Abel Davis, R. Examiners—Charles G. Little, Charles T. Farson, Advisory Examiners—John S. Miller and Augustus S. Peabody.

S. Feadouy.

Duties—The registrar of titles under the Torrens
system of land registration directs the procedure
by which title is confirmed by decree of court
which does away with the need of an abstract
and the certificate of title which is issued is
guaranteed by the county.

# CIVIL-SERVICE COMMISSION.

547 courthouse.

Commissioners-John P. McGoorty, Ballard Dunn, John H. Fichter.

John H. Figurer.

Duties—The commissioners examine applicants for positions in the county service. Before an examination is held fourteen days' notice is given by advertisement. The rules are practically the same as those governing other bodies of the kind.

# JURY COMMISSION.

824 courthouse. Commissioners—William A. Amberg, president; Joseph H. Barnett, secretary; James J. Lane.
Clerk—Roswell H. Mason.

Duties—The commissioners are required to prepare a list of electors qualified to act as jurors, to select names from such list and place them in a jury box and a grand jury box, and to draw therefrom the number of jurors needed at each tarm of court term of court.

#### BOARD OF ASSESSORS.

Courthouse, 3d floor, north end.

Members of the Board—F. W. Koraleski, D.; William H. Weber, R., secretary; Walter E. Schmidt, R.; A. W. Miller, R., and Adam Wolf, R. Chief Clerk—William Kingsley.

Dutles—Fix the amount of assessment on all real and pagengal property according to the rate re-

and personal property according to the rate required by law.

#### BOARD OF REVIEW.

Courthouse, third floor, south end.

Members of Board—T. J. Webb, D.; Fred W. Up-ham, R.; Roy O. West, R. Chief Clerk—Frank A. Vogler.

Uniter Cherk-frank A. vogher.

Duties—The board of review takes the place of the old town board in revising and correcting the findings of the assessors and in hearing and adjusting complaints of property owners. The decisions of the board of review are final.

# COUNTY INSTITUTIONS.

Dunning.

Superintendent—Dr. O. C. Willhite, R. Dutles—Has the general management of the insane asylum and the poorhouse.

# COUNTY ARCHITECT.

Dexter building, 84 Adams street.

County Architect-Paul Gerhard. Duties—The county architect makes designs for new buildings, alterations in old ones, etc., as required by the county board. (Paid in fees.)

# SUPERINTENDENT OF SCHOOLS.

546 courthouse.

Superintendent—Edward J. Tobin, D.
Duties—He is required to visit each school in his
district at least once a year, to see that the
treachers are qualified for the performance of
their duties and to do all in his power to increase the efficiency and elevate the standards
of the schools.

# ATTEMPTED REVOLUTION IN MEXICO.

Nov. 20, 1910, was the date set for a general uprising of the opponents of President Diaz in Mexico, but the plot was discovered some days in advance of its execution and the government took vigorous action. The first serious clash took place Nov. 18, in the city of Puebla, where nearly 200 anti-re-electionists, as the rebels were called, were killed by the police and military. Rioting and

bloodshed also occurred in Orizaba, Zacatecas, Chllundhua and other places. The revolutionists showed the greatest strength in the north, where they were led by Francisco I. Madero, who was a candidate for the presidency in opposition to Porfirio Diaz. Before the end of November the movement came to an end in utter failure.

#### CHICAGO WATERWORKS SYSTEM.

The following table shows the growth of Chicago's waterworks system by decades since 1854, when the first large pumping station at Chicago avenue and the lake was built, and by years since 1900:

Population Gallons Gallons Water pumped per pipe Total per day.capita. mileage. revenue. 591,083 8.9 30.0 4.703,525 43.0 91.0 \$131,162.00 57.384,376 116.7 455.4 865,618.35 (school Year. 1854.. census). 65,872 109,260 1860.. 272.4 455.4 1,205.0 539,180.00 865,618.35 2,109,508.00 8,250,481.85 3,370,600.88 306,605 1870 . . 1880.. 491.516 . 152,372,288 1890.. 1,208,669 126.0 1900.. 2,007,695 322,599,630 160.6 1,872.0 1900... 2,007,595 1901... *1,786,266 1902... *1,844,661 1903... *1,903,096 1904... *1,962,251 1905... *2,060,000 1906... *2,140,000 1907... *2,225,000 342,824,449 191.9 358,101,710 376,015,974 194.1 1,918.0 8,611,558.81 196.0 1,939.0 3,689,625.80 1,978.0 200.0 2,038.0 204.2 2,073.0 204.3 2,153.0 204.0 2 398,985,350 3,834,541,30 1905. *2,060,000 410,856,108 200.0 2,038.0 4.019,205.88 1906. *2,140,000 436,954,473 204.2 2,073.0 4.281,065.50 1907. *2,225,000 456,151,954 204.3 2,153.0 4.450,349.61 1908. *2,300,000 467,772,045 204.0 2,188.9 4.465,249.54 1909. *47,921,000 223.0 2,229.9 5,246,635.77 *Federal census estimate.

In 1909 the total amount of water pumped was The pumping stations with the year of construction of each follow:

gallons is 635,000,000.

WATER TUNNELS.

One 5-foot tunnel from two-mile crib to Chicago avenue pumping station; built 1867; cost \$464.

One 7-foot tunnel from two-mile crib to Chicago avenue pumping station; built 1874; cost \$415,-

709.36.

One 7-foot tunnel from two-mile crib to Chicago avenue pumping station; built 1887-1895; cost \$342.786.64.

One 3-foot tunnel from four-mile crib to 14th street pumping station; built 1892; cost \$1,104.744.12.

One 10-foot tunnel from Carter H. Harrison crib to foot of Oak street; built 1898; cost \$677.577.56.

One 7-foot tunnel from Lake View crib to Lake View pumping station; built 1896; cost \$701,792.45.

One 7-foot tunnel from Hyde Park crib to 68th street pumping station; built 1898; cost \$771,556.07.

One 14-foot tunnel from Hyde Park to 73d street and Railroad avenue.

and Railroad avenue.

LAND TUNNELS.

One 7-foot tunnel from Chicago avenue pumping station to 22d street pumping station; built 1874; cost \$542,912.63.

One 7-foot tunnel from Park row shaft to foot of Peck place and thence to Harrison street pumping station; built 1891; cost \$279.848.78.

One 6-foot connecting tunnel in Jefferson street from Van Buren to Harrison: built 1891; cost \$15.968.17.

One 10-foot tunnel foot of Oak street to Green street and Grand avenue, and two 8-foot tunnels from that point to Central Park avenue and Springfield avenue pumping stations respectively; built 1890; cost \$2.121.525.02.

One 7-foot tunnel connecting above 10-foot tunnel with Chicago avenue pumping station (remodeled); built 1898; cost \$42.438.48.

One 9-foot tunnel from 104th street and Stewart avenue to 73d and State streets; one 12-foot tunnel in 73d street from State street to Yates avenue to Railroad avenue; in course of construction; estimated cost, \$3.000.000.

One 7-foot tunnel in Polk street connecting Peck place shaft and Jefferson street shaft.

One 8-foot tunnel from Chicago avenue to 22d street and Ashland avenue; built, 1907-8; cost, \$651.071.89.

\$651.071.89.

Office—In Academy of Sciences, Lincoln park, Clark and Center streets.

The Lincoln park district consists of the towns of North Chicago and Lake View, with Fullerton avenue as the dividing line, and is bounded on the north by Devon avenue, on the south by the Chicago river and extends from Lake Michigan on the east to the north branch of the river and North Western avenue on the west.

east to the north branch of the river and North Western avenue on the west.

The area of the Lincoln park district is 12.64 square miles and the population about 440,262. The total area of the parks and boulevards is 699.94 acres, with 9.33 miles of boulevard. Lincoln Park—Lincoln park, previously known as Lake park, began its history under its present name by resolution passed by the common council of Chicago under date of June 5, 1866. The park proper is 317 acres in extent and extends from Diversey boulevard to Oak street along the lake front. To this 255 acres of land is being added by filing in Lake Michigan north of Diversey boulevard. This extension will contain a seventy-acre yacht harbor and will have bathlug facilities.

The park contains a large floral department, also an extensive zoological garden containing about 1,200 animals. Boating and bathing facilities of the park largon—one mile about 1,200 animals. Boating and bathing facilities are furnished and the park lagoon—one mile in length—gives an admirable course for racing. The Academy of Sciences is located in the park at the foot of Center street. This building was receted in 1893 and contains about 250,000 spectmens. It is noted for its collection of local natural history specimens and for its complete collection of mollusks.

The park has provided facilities for outdoor.games during both the winter and summer seasons.

Secretary—A. W. O'Neill, room 501, 200 Randolph
street

Superintendent of Parks-John Algots. Superintendent of Playgrounds and Bathing Beaches

-Theodore A. Gross. City Forester-Jacob H. Prost.

City Forester—Jacob H. Prost,

The special park commission is appointed by the
mayor by authority of the city council. It has
charge of a number of small parks and squares
which are under the immediate jurisdiction of the
city, and it also conducts several bathing beaches
on the lake shore and a number of municipal playgrounds. The parks are provided with ornamental
and drinking fountains wherever it is oracticable,
lagoons, swings, tennis courts and landscape and
other features according to circumstances. The
playgrounds are provided with play apparatus,
athletic fields, baseball diamonds, basket-ball
courts, skating ponds, drinking fountains, running
tracks, gymnastic apparatus and buildings containing toilet rooms, offices, sand courts and roofed tracks, symnastic apparatus and buildings containing toilet rooms, offices, sand courts and roofed platforms. The bathing beaches are provided with bathhouses containing dressing rooms, lockers, checkrooms, washrooms, toilets and office. In 1910 the city appropriation was \$4,040 for administration, \$59,280 for parks, \$59,484 for playgrounds, \$5,000 for city forester and \$4,876 for bathing benches.

Following is a list of the small parks, play-grounds and bathing beaches in charge of the special park commission, with the area of the parks in acres. Two parks maintained privately are included in the list and are so described:

Adams Park—75th place, 76th street and Dobson

avenue: 11/2.

Aldine Square

-Vincennes avenue, 37th place and

alley north of 38th place; 1½.

Amy L. Barnard Park—105th street, between Longwood boulevard and Walden parkway; 1½.

### COOK COUNTY FOREST PRESERVE DISTRICT

Appraiser

Under an act of the Illinois legislature, approved June 16, 1909, the following proposition was submitted to the voters of Cook county at the election of Nov. 8, 1910:

"For the adoption of an act to provide for the creation and management of forest preserve districts and repealing a certain act therein named and creating under said act a forest preserve district, the boundaries of which to coincide with and comprise the whole of the territory of Cook county, Illinois."

As will be seen by a reference to the election returns on another page, this proposition was approved by a majority of those voting on the question, and the Cook county forest preserve district was thus created. Under the law the affairs of the district are managed by a board consisting of a president of the board of county commissioners. The president of the board of county commissioners. The president of the board receives a salary of not to exceed \$2.500 a year and the commissioners not to exceed \$1.500 each. The term of office is four years, except in the case of the first appointees, two of whom are to serve but two years.

The board has the power to designate by ordinance streets or other highways to be used for

Professor of meteorology (weather)...... 3.000

PRESERVE DISTRICT.

pleasure driving and to improve and maintain the same; to acquire lands for laying out driveways and foreat piewerves; to raise money by general taxation for such purpose and to borrow money by the issuance of bonds. Such indebtedness is limited to 1 per cent of the taxable property in the district, including the existing indebtedness.

The board also has the power to acquire lands for the erection and maintenance thereon of public buildings for the use of the general public and assembly purposes of a general and not religious character; also to acquire and hold land for the purpose of protecting and preserving the flora and fauna and scenic beauties of the state; to protect and preserve such lands as nearly as may be in their natural condition for the education, pleasure and recreation of the public.

The accompanying map shows where it is pro-

The accompanying map shows where it is proposed to locate some of the new park districts in Cook county, comprising what is usually called the projected "outer belt park system."

Commissioners—Lewis Rinaker, Rep., four years; Charles H. Wacker, Dem., two years; Gustavus J. Tatge, Dem., two years; Nelson A. Cool, Rep., four years; Samuel Insull, Rep., four years.

#### RAILROAD TRACK ELEVATION.

[From report of Walter J. Raymer, commissioner of track elevation.]

Ordinances have been passed by the city council and accepted by the railroad companies for the elevation of their roadbeds and tracks from May 23. 1892, to Nov. 1, 1910, covering the following amount of work:
Total number of miles of main tracks to be ele-

vated, 155.89

Total number of miles of all tracks to be elevated, 935.55.

Total number of subways to be constructed, 795. Total estimated cost of the entire work, \$76,700,000. The amount of elevation done from May 23, 1892, Dec. 31, 1910, was as follows:
Total number of miles of main tracks elevated,

143.74.

Total number of miles of all tracks elevated, 883.52.
Total number of subways constructed, 598.
Total estimated cost of work done, \$63,662,000.

#### PRINCIPAL LIBRARIES OF CHICAGO AND EVANSTON.

THE CHICAGO PUBLIC LIBRARY. Michigan avenue and Washington street. Michigan avenue and Washington street.

Taylor, Frank. Administration: Rawson, Lagorio. Branches: Taylor, Armstrong, Stern. Delivery stations: Frank, Armstrong, Freeman.
Building and grounds: Lagorio, Rawson. Finance: Rawson, Stern, Armstrong. By-laws:
Freeman, Lagorio, Taylor.
Meetings—Regular meetings of the board are held
to p. m. on the second Monday of each month.
Librarian—Henry E. Legler.
Assistant Librarian—Carl B. Roden.
Secretary—Henry G. Wilson.
Hours—Circulation department open 9 a. m. to 8:30

Hours-Circulation department open 9 a. m. to 8:30 p. m.; Sundays, closed; reading room and reference department, 9 a. m. to 10 p. m.; Sundays,

ence department, 9 a, m. to 10 p. m.; Sundays, 9 a. m. to 6 p. m.

The public library is free to all residents of the city. Books may be borrowed for home reading either at the main building downtown or at any of the various delivery stations. The only requirement is that the borrower must furnish a certificate signed by a resident whose name appears in the city directory, guaranteeing the library against loss

At the close of May 31, 1910, the public library contained 402,848 volumes. The aggregate circulation for the year ending May 31, 1910, was 1,805,012 volumes, which does not include the use of books kept on the open shelves at the main library or its branches or the periodicals or newspapers used in the reading rooms. This use would bring the total book issues to 2,416,559.

### THE MOVEMENT FOR GOOD ROADS.

THE MOVEMENT
The following call for an international good roads cougress to be held in Chicago in 1911 was issued in 1910; to 21, 1901, there was held in the city of Buffalo an international good roads congress, the call for which was issued from the head-quarters of the National Good Roads association at Chicago. Participation by delegates from foreign countries was invited and such invitation was transmitted by the department of state to the dipplomatic officers of the United States throughout the world, and through them communicated to the ministers of foreign affairs with the request that it be given publicity for the information of organizations and individuals who might be interested.

On the tenth anniversary of this milestone in the good roads movement, there will be held in the city of Chicago on Sept. 18, 19, 20, 21, 22 and 23, 1911, officially in the first week of the International Municipal Congress and Exposition, an international good roads congress, to which are invited delegates from every city, state and nation.

The production of permanent public streets and roads is one of the most important problems of the century, affecting the material and social well being of all classes and conditions of people.

The marvelous development of the motor vehicle has brought about such changed conditions as to demand the best thought and experience of road experts.

When the MICHAMPA

experts.

When the agricultural production alone of the United States for the past eleven years totals \$70,-000,000,000, a sum to stagger the imagination, and it cost more to take this product from the farm to the railway station than from such station to the railway station than from such station to the American and European markets, and when the saving in cost of moving this product of agricul-ture over good highways instead of bad, would

have built a million miles of good roads, the in-calculable waste of bad roads in this country is shown to be of such enormous proportions as to de-mand immediate reformation and the wisest and

shown to be of such enormous proportions as to demand immediate reformation and the wisset and best statesmanship.

Great as is the loss to transportation, mercantile, industrial and farming interests, incomparably greater is the loss to women and children and social life, a matter as important as civilisation itself. The truth of the declaration of Charles Sumner fifty years ago that "the two greatest forces for the advancement of civilisation are the schoolmaster and good roads" is emphasized by the experience of the intervening years and points to the wisdom of a union of the educational, commercial, transportation and industrial interests of all nations in aggressive action for permanent roads and streets.

THE NATIONAL GOOD ROADS ASSOCIATION.

Anna M. Grady, Sec. and Trees.

In the confident belief that a general discussion of the road and street problem from every point of view by delegates from our own and foreign coun-

view by delegates from our own and foreign countries will prove in the highest degree helpful, we, the undersigned join in this call for an international good roads congress at Chicago Sept. 18 to

tional good roads congress at Chicago Sept. 18 to 23, 1911.

THE NATIONAL GOOD ROADS CONGRESS. THE ILLINOIS STATE GOOD ROADS ASS'N. THE CHICAGO GOOD ROADS ASS'N. THE CHICAGO GOOD ROADS ASSOCIATION. CHICAGO ASSOCIATION OF COMMERCE.

The headquarters of the National Good Roads association, the Illinois State Good Roads association are in the Chicago Good Roads association are in the Chicago Opera House building, Chicago, Arthur C. Jackson is president of the three associations and Anna M. Grady secretary and treasurer.

#### CHICAGO STOCK EXCHANGE.

President—Fred D. Countiss, 6 The Rookery. Secretary—Charles T. Atkinson, 171 Michigan-av.

Location—The Rookery, 215-225 LaSalle street. Hours—"Calls" at 11 a. m. on stocks and bonds.

### Greenebaum 3

at cor. Clark and Bandolph-ats. Fifty-six years ago in this city Mr. Elias Greenebaum, who still enjoys good health, father of the members of the banking firm of Greenebaum Sons, founded his investment and Real Estate First Mortgage business. The growth and success of this firm read like the progress and solid development of the great City of Chicago, with which their name is so closely associated throughout the world. Henry Everett Greenebaum, Moses Ernst Greenebaum and James Eugene Greenebaum comprise the banking firm. Already the third generation of Greenebaum Sons. Bankers, have been carefully trained in this business, in fact have grown up in it and have inherited the same conservative and enterprising qualities which have distinguished this house for over half a century. We find here Mr. Walter J. Greenebaum, Manager of the Bond Department; Mr. John Greenebaum, Manger of First Mortgage Investments; both are sons of Mr. Henry Everett Greenebaum. Mr. M. Ernst Greenebaum, Jr., Manager of the Real Estate Department, and Mr. Edgar N. Greenebaum, in the Loan Division, both heing sons of Mr. Moses Ernst Greenebaum. Forty clerks assist in the office and a General Banking and Investment Business is transacted. The investment and mortgage business is one of the chief activities of the Greenebaum Sons bank, controlling ample capital to underwrite large issues of safe at cor. Clark and Randolph-sts. Fifty-six years morrgage outsiness is one of the chief activities of the Greenebaum Sons bank, controlling ample capital to underwrite large issues of safe investment securities. At the same time it maintains a department for loans on improved real estate and building loans on moderate sized realdences, flats and business buildings. The banking departments are similar to those in any well-equipped institution in a metropoli-

tan city and transact a general banking business. The foreign department is one of the oldest in the west. Well known in all parts of the world, Greenebaum Sons are agents and correspondents of banks and bankers in all five continents. Their letters of credit and drafts are honored in all parts of the civilized world and often serve as a valuable introduction to their holders in cities and towns abroad. They also maintain a foreign collection and legal department in charge of expert foreign attorneys acquainted with the laws and legal requirements of other nations regarding estates. tan city and transact a general banking business

department in charge of expert foreign attorneys acquainted with the laws and legal requirements of other nations regarding estates, inheritances, claims, collections, foreign securities, etc. Information cheerfully given. The constant increase in the daily business of their foreign department necessitated recently a reorganization thereof. Mr. Fréd-Mayer, for many years with this bank, is nowriffanager of the Foreign Department and has risen to his present position by the merit-service; system. Some of the larger First Mortgage Real Estate Bond Issues for the erection of new first-class buildings recently negotiated by Greene-baum Soms are the Kiper Commercial Building, the great Hearst Buildings, Alberta Block, Roslyn Apartments, Shire-Cliff Apartments, Knoedler Commercial Buildings, Myers Buildings, Steele-Wedeles Co.'s Fire Proof Wholesale Grocery Warehouse, Stein, Hirsch & Co.'s Warehouse and Factory, Drexel Square Bldgs. These First Mortgage Real Estate Bonds were issued in units of \$1,000 and \$500, bearing 54% to 6% interest, and were all quickly bought by the large number of investment clients who

the large number of investment clients who place their funds through Greenebaum Sons.

### CHICAGO TELEPHONE ORDINANCE AND RATES.

Passed by city council Nov. 6, 1907.

The Chicago Telephone company is authorized to operate its telephone wires in the city until Jan. 2. 1929. Its books and records are to be open for examination by the city comptroller and its accounts may be audited for the purpose of verifying the statement of gross receipts, of which 2 per cent is to be paid into the city treasury as compensation for the franchise. The city is to have free telephone service. The city reserves to take from time to time and to modify the rules and regulations. It is provided, however, that such changes shall not be made to continue for a period of more than or of less than five years. The company shall not make any rate agreements or division of territory with any other company. The right to purchase the plant of the company on Jan. 1, 1919, or Jan. 1, 1924, is reserved to the city, the price to be fixed by appraisers. The maximum rates fixed by the ordinance are as follows: The Chicago Telephone company is authorized to

### BUSINESS TELEPHONES.

#### FLAT BATE.

For a single-party line with the right to the unlimited use of the same, \$125 a year.

#### MEASURED RATE.

For a single-party line, including 1,200 outgoing conversations or messages, \$60 a year.

For the next 2,400 outgoing messages, or part thereof, during the year, 3 cents each.

part thereof, during the year, 3 cents each.

For all outgoing messages in excess of 3,600 during the year, 2 cents each.

Every subscriber who will contract to pay for 7,200 outgoing messages a year at the above rates shall be furnished with a second single-party line without extra charge, and every subscriber shall be furnished with an additional single-party line without extra charge for each 6,000 outgoing messages he will contract to pay for, in addition to the 7,200 during the year at the rate of 2 cents each.

A single-party line or lines, including the right to transmit outgoing messages without limit and without any charge per message, shall be furnished at \$1 per day each. Subscribers to single-party lines at this rate shall be deemed subscribers to measured service. Every subscriber to measured service shall also be furnished with as many single-party lines as he may demand at the rate of \$5 per quarter for each line.

RESIDENCE TELEPHONES. For a single-party line, including all outgoing messages, \$18 per quarter.
For a two-party line, \$14 per quarter.

NICKEL PREPAID SERVICE.

NICKEL PREPAID SERVICE,

Nickel prepayment service with outgoing messages at 5 cents each, as follows:
One-party line, at a guaranty of 20 cents a day, including four messages.
Two-party line, at a guaranty of 12½ cents a day, including two and a half messages.
Two-party line, for residences only, at a guaranty of 10 cents a day, including two messages.
Four-party line, for residences only, at a guaranty of 5 cents per day, including one message.

PUBLIC TELEPHONE SERVICE.

The charge for a single conversation or message from any telephone in Chicago to any other tele-phone in the city shall not exceed 5 cents.

NEIGHBORHOOD EXCHANGE SERVICE. NEIGHBORHOOD EXCHANGE SERVICE.

The company may maintain local or neighborhood exchanges and shall establish them wherever the city council may direct. Any subscriber in any such exchange may communicate with any telephone within the city limits outside the neighborhood district, for which a charge of 5 cents may be made for each period of 5 minutes or fraction thereof. The rates per month for local exchange service, including all outgoing messages under yearly contracts, shall not exceed the following:

lowing: Line. Business, Residence. | Dishiese | One-party | ... | \$4.00 | Two-party | ... | \$4.00 | Four-party | ... | 2.00 | TOLL SERVICE.

The company shall not charge more than 10 cents The company shall not charge more than 10 cents for each conversation or message up to three minutes (and not more than 5 cents for each additional minute), transmitted from any telephone in Chicago to any other telephone outside the city but within fifteen miles of the present city hall, or within one mile of the city limits and within the state of Illinois.

METERS.

The company shall install in connection with each measured-service line of its subscribers a meter which shall prove effective in actual use for accurately recording the number of outgoing messages over the line.

CHICAGO

UR firm, and its predecessor, has been in the mortgage business in Chicago continuously for the last twenty-five years. During that time we have made and sold millions of dollars' worth of first mortgage loans to the entire satisfaction of our clients. We invite new investment accounts on the strength of the experience thus gained and on our established record for conservatism and fair dealing.

### ANTIBALOON CAMPAIGN IN CHICAGO.

Prohibitionists and others opposed to the liquor Prohibitionists and others opposed to the liquor traffic made an effort to have placed upon the ballots at the election of April 5, 1910, in Chicago, the proposition, "Shall this city become antisaloon territory?" In accordance with the act of 1907 a perition for this purpose was circulated and 74,028 names having been secured the document was filed with the election commissioners Feb. 4. Objections were filed March 18 at the instance of the United Societies by twenty-one legal voters and taxnayers setting forth that more than 35,000 of the alleged signature were littless between these were not those

setting forth that more than 35,000 of the alleged signatures were illegal because they were not those of duly registered legal voters. March 25 the board of election commissioners announced that the objections were sustained. It held:

1. That no signature on the petition was valid if signed by any one who was not properly registered at the time he signed. Names of persons who had moved since the registration of the spring of 1999 were thus eliminated, although they had had no opportunity to reregister.

2. As a corollary to this ruling it was held that the petition was lacking in the law's requirements of 63,511 names. The shortage was given as 15,613, even if every doubtful name was counted for the petition. Out of the 74,026 names on the petition, only 44,278 were held to be unquestioned. "In the opinion of the board 26,128 signatures are not those of duly registered legal voters, and consequently cannot be considered valid or counted under the law. Therefore, deducting said number from 74,028 leaves upon the petition 47,898 signatures, which is 15,613 less than 25 per cent of the legal voters, or the required number. This total of 15,613 gives the 'dry' petition the benefit of 3,620 doubtful signatures.

13.613 gives the 'dry' petition the benent of 3,620 doubtful signatures.

"The number of valid signatures upon the petition being less than the number required by law, this board is without jurisdiction to submit the question at the coming election, and the objections will be sustained."

The valuation since 1875 is the equalized valuation fixed by the state board of equalization. From 1887 to 1875 the valuation was made by the city for the city tax. From 1898 to 1908, inclusive, the assessed value was one-fifth of the actual value. In 1909 the rate was fixed at one-third. The amounts in the personal property column include the railroad valuation. The separate figures in 1910 were: Personal property, \$208,607,727; railroads 287,383 334. roads, \$87,363,934.

### TAXING BODIES IN CHICAGO.

- 1. STATE TAX—For state purposes. The governor, anditor and treasurer constitute the board which ascertains the rate per cent required to produce the amount of taxes levied by the general assembly. The "state school tax" is levied in the same manner.
- 2. County Tax-The county board levies the taxes
- COUNTY TAX—The county board levies the taxes for all county purposes.
   CITY TAX—The city council, acting with the mayor, levies the taxes for all city purposes.
   SCHOOL TAX—The city council and the mayor make a separate levy for this purpose.
   LIBRARY TAX—The city council and the mayor make a separate levy for this purpose.
   SANITARY DISTRICT—The tax is levied by the board of trustace.

- SANITARY DISTRICT—The tax is levied by the board of trustees.
   SOUTH PARK SYSTEM—The south park commissioners levy for park purposes in the towns of South Chicago, Hyde Park and Lake.
   WEST PARK SYSTEM—The West Chicago park commissioners levy for park purposes in the town of West Chicago.
   LINCOLN PARK—The Lincoln park commissioners are not 'corporate authorities," the Lincoln park act not having been adopted by popular vote. The levy for Lincoln park is made by the county treasurer, acting as ex officio supervisor.
- the county treasurer, acting as ex once supervisor.

  16. RIDGE PARK—A small park district in Rogers Park, organized under the law providing for local park districts by popular vote. The board of five commissioners levies for the district.

  17. THE NORTH SHORE PARK DISTRICT—Organized the same as Ridge Park.

  By an act of the legislature approved May 11,

1901, and by the vote of the people at the spring election in 1902 the townships lying within the limits of Chicago were consolidated and the powers of the town boards transferred to the city council. This reduced the taxing boards in Chicago from eighteen to eleven as above.

### ASSESSMENT OF TAXABLE PROPERTY IN COOK COUNTY.

Includes equalized valuation of railroads and capital stock of corporations,

1900	\$806,957,900	1906	\$461.813.707
1901	408.189.960	1907	514.757.122
1902	438,489,922	1908	514.730.532
1903	445.028.259	1909	897,212,850
1904		1910	
1905	441,990,246		010,000,011

The above figures are one-fifth of the actual valuation down to and including 1908. The rate was changed to one-third in 1909.

### COOK COUNTY TAX RATE FOR 1910.

Town	State (	County	City	School	Sanit'y	Park	Town	Total
West Chicago	.30	.53	1.41	1.55	.34	.77		*5.00
South Chicago.	.30	.53	1.41	1.55	.34	.51		4.64

CHRONOLOGY.
74-4 441-41 3- 1 1007

First investigation made in 1885.
Sanitary bill signed May 29, 1889.
Sanitary district organized Jan. 18, 1890.
Earth broken ("shovel day") Sept. 3, 1892.
La e water turned into canal Jan. 2, 1900.
Formal opening of canal Jan. 17, 1900.

#### DIMENSIONS OF CANAL.

Length of main and water power channel, 39.16 miles. miles.
Length of river, lake to Robey street, 6 miles.
Length river diversion channel, 13 miles.
Width main channel, Robey treet to Summit:
Bottom, 110 feet; top, 198.
Width main channel, Summit to Willow Springs:
Bottom, 202 feet; top, 290.
Width main channel, Willow Springs to Lockport (rock section): Bottom, 160 feet; top, 162.
Width river diversion channel: Bottom, 200 feet, Minimum depth of water in main channel, 22 feet.
Current in erch sections, 1½ miles per hour.
Present capacity of canal, 300,000 cubic feet per minute. minute. Total amount of excavation, 42,229,635 cubic yards.

The north shore channel, extending from Lawrence avenue to Lake Michigan, in the village of Wilmette, is now being constructed. It is to be about 8 miles long with a water depth of 13.8 feet.

The construction of the Sag canal to drain the Calumet region was begun in the fall of 1910. When completed it will be 22 miles long.

### HOUSE-NUMBER SYSTEM IN CHICAGO.

Sept. 1, 1999, a new house number system went into effect in Chicago. By the terms of the ordinance passed June 22, 1908, no change was made in the old numbers in the district between the river, 12th street and the lake. Neither was any change made in the north and south streets on the south side. State and Madison streets were made base lines and all numbered streets and avenues were given the prefix north, south, east avenues were given the prefix north, south, east or west, according to their location with reference to these base lines. Named streets, such as Hal-sted street, Chicago avenue, etc., which either cross or are open on each side of either of the

base lipes, were given similar prefixes according to their location north, couth, east or west of the base lines. Named streets open on only one side of either of the base lines were given no prefix. The basis of numbering, under the new ordinance, is every twenty feet of frontage and not every lot. To each one-eighth of a mile 100 numbers are assigned, or 800 to the mile. On north and south streets the new odd numbers are on the cast and the even numbers on the west side of the street; on east and west streets the odd numbers are on the south and the even numbers on the north side of the street.

### STREETS, ALLEYS AND PAVEMENTS.

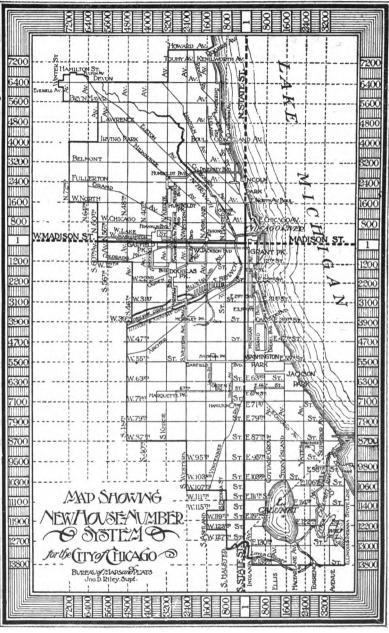

The combined length of the streets and alleys of Chicago is 4,315.55 miles. The street mileage is 2,880.66 and the siley mileage 1,434.89. Of the

Pavements.	Miles.		Miles.
Asphalt	478.61	Concrete	4.97
Block asphalt	1.74	Creosoted block	11.43
Brick	122.24	Granite	79.29
Cedar	396.90	Granite	569.16

streets 1,674,65 miles are paved. The total of each kind of pavement in use Jan. 1, 1910, was:

Pavements. Medina stone	Miles. 1.19	Pavements. Wood asphalt	Miles.
Slag	6.50		
Novaculite	2,00	Total	.1,674.65
Rock senhelt	0.57		-

# The Elgin National Watch Co.

LADY ELGIN.

Founded in 1864. Delivered their first watch, grade B. W. Raymond, serial number 101, in April, 1867. From this beginning the Company has grown to enormous proportions, producing during the intervening years (1867 to 1910) more than 16,000,000 watches, 400 grades and 10 different sizes, ranging from the largest,

the Veritas Model, 1 8-10 inches in diameter, to the smallest, the Lady Elgin, the size of a nickel five-cent piece. The output includes styles to suit every taste and vocation; whether the purchaser is an engineer with the responsibilities of many lives or a person of leisure, all can be accommodated. The output of the Elgin National Watch Company is 3,300 watches daily.

The factory buildings occupy 13 acres and the floor space is approximately 1,800,000 square feet. The buildings are steel and fire-proof construction of the most modern design both in conveniences and sanitation. The company conducts an up-to-date Hotel

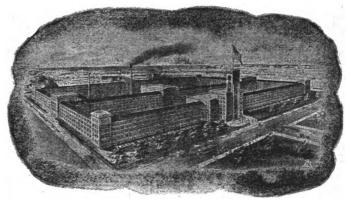

VERITAS.

for the comfort of those employes preferring hotel life, a perfectly equipped Gymnasium, Band Room, Library and Dance Hall. The Hospital is splendidly equipped and in charge of a graduate nurse, who looks after emergency cases. If an operation should be necessary everything required is available, including rest rooms. The factory grounds were beautifully laid out by O. C. Simonds & Company and are kept in perfect condition by a competent corps of gardeners.

The Officers and Directors are: Charles H. Hulburd, President; Ernest A. Hamill, Vice-President; Louis E. Laslin, Martin A. Ryerson, A. C. Bartlett, Henry A. Blair, A. A. Sprague.

The Detail Managers are: G. V. Dickinson, General Agent; J. R. Perry, Secretary; J. B. Warren, Western Sales Agent; W. Il Kinna, Eastern Sales Agent.

The factory Management consists of: George E. Hunter, Superintendent; Israel Hatch, Assistant Superintendent, and E. N. Herbster, Comptroller.

FACTORY BUILDINGS, ELGIN, ILL.

The accompanying illustrations show the plan of the factory buildings and the two extremes in the size of Elgin watches.

## Elgin National Watch Co.

General Offices:

131 Wabash Avenue, Chicago, Ill.

New York Office: 15 Maiden Lane.

Toronto Office: Traders Bank Bldg.

### CRICAGO COMMITTEE OF PUBLIC EFFICIENCY.

Organized in 1910.

Trustees—Julius Rosenwald, chairman; Alfred L. Baker, treasurer; Onward Bates, William A. Bond, Clyde M. Carr, Charles R. Crane, Henry B. Favill, Walter L. Fisher, Charles E. Merriam. Director—Herbert R. Sands. Secretary—George C. Sikes.
Headquarters—900 Masonic Temple.
The purposes of the organization are:
(1) To scrutinize the systems of accounting in the eight local governments of Chicago.
(2) To examine the methods of purchasing materials and supplies and letting and executing con-

struction contracts in these bodies.

(3) To examine the pay rolls of these local governing bodies with a view of determining the efficiency of such expenditures.

(4) To make constructive suggestions for improvements in the directions indicated under 1, 2 and 3, and to co-operate with public officials in the installation of these improved methods.

(5) To furnish the public with exact information regarding public revenues and expenditures, and thereby promote efficiency and economy in the public service.

# CHICAGO HARBOR COMMISSION.

Jan. 6, 1908, Mayor Fred A. Busse sent a special message to the city council calling attention to the pressing need of giving careful and comprehensive consideration at the earliest possible date to the improvement of Chicago's harbor facilities and asking authority for the appointment of a commission to study the question. The authority was given on the same date and the following commission was appointed: John M. Ewen (chairman), Charles H. Conover, Frederic A. Delano, Isham Randolph, Charles H. Wacker and Aldermen Charles

M. Foell and Peter L. Hoffman. Ald. John P. Stewart was subsequently added to the committee. Frof. C. E. Merriam was made secretary and J. Paul Goode, George C. Sikes and George G. Tunell were appointed by the commission to make special investigations. The commission made its report, to the mayor and aldermen in March, 1999. A summary, prepared by the commission itself, of its recommendations will be found in The Daily News Almunac and Year-Book for 1910, page 530.

# CHICAGO CHARTER MOVEMENT.

What was known as the Chicago charter convention was organized in 1905, the first session being held Dec. 12, that year. Milton J. Foreman was president, Alexander H. Revell vice-president, M. L. McKinley secretary and Henry Barrett Chamberlin assistant secretary. The convention was made up of delegates chosen by or representing the mayor city council governor assembly was made up of delegates chosen by or representing the mayor, city council, governor, assembly, board of education, sanitary trustees, county board, public library board and the Chicago park boards. Its purpose was to frame a comprehensive, simple and elastic charter for the city of Chicago to be submitted to the state legislature for consideration. The work was completed and the charter taken to Springfield in, the early part of 1907, where it was introduced in each house of the legislature and referred to the appropriate committees.

lature and referred to the appropriate committees. Some of the main features of the charter were these: Consolidation in the municipal government these: Cossolidation in the municipal government of Chicago of the power vested in the board of education, township, park and other local governments within the city; submission of propositions to popular vote; aldermen to be elected once in four years; the raising of adequate revenue by the issue of bonds and by other means; the power to own, maintain and operate all public utilities in the city, including intramural railroads, subways and tunnels, and telephone, telegraph, gas, electric lighting, heating, refrigerating and power plants; the parks to be under the management of a city department of parks; the public-school system to be a department of the city government and under

the control of a board of education of fifteen members appointed by the mayor for terms of three years; the public library to be managed by a board of nine directors appointed by the mayor for terms of six years.

Several radical changes were made by the legislature, one of the most important being the substitution of the old primary system for the one proposed. Another was the redistricting of the city into fifty wards, one alderman to be elected from each. These and other changes aroused much opposition, but the charter was passed May 12, 1907. According to the terms of the act it was submitted to the voters of Chicago at a special election held Sept. 17, 1907, when it was defeated by a vote of 121,935 mays to 59,786 yeas.

121,935 nays to 59,786 yeas.

Early in 1909 the charter convention resumed work and prepared eleven bills for submission to the legislature, in the hope that some at least night be enacted into law. These separate bills included the principal points in the charter defeated by the referendum vote of 1907.

The charter bills encountered opposition from the start, not only from the senators and assemblymen representing districts outside of Chicago, but also from some of the city members, and, while favorable action was taken in committee and also in each house on the consolidation measure and on one or two of the other propositions, no legislation was secured and the work of the convention again went for nothing.

School Registrar-Ralph W. Holmes.
Trustees, 1999-10-Edward E. Ayer, Adolphus C.
Bartlett, John C. Black, Chauncey J. Blair, Clarence Buckingham, Edward B. Butler, Daniel H. Burnham, Clyde M. Oarr, Charles Deering, Henry H. Getty, John J. Glessner, Frank W. Gunsaulus, Churles L. Hutchinson, Bryan Lathrop, Frank G. Logan, R. Hall, McCormick, John J. Mitchell, Samuel M. Nickerson, Honoce Palmer, Martin A. Sprague. Ex officio: Fred A. Busse, mayof; Walter H. Wilson, city comptroller; Henry G. Foreman, president south park commissioners; William Best, auditor south park commissioners.

The Art Institute of Chicago was incorporated May 24, 1879, for the "founding and maintenance of schools of art and design, the formation and exhibition of collections of objects of art and the cultivation and extension of the arts of design by any appropriate means." The museum building upon the lake front, first occupied in 1833, has never been closed for a day. It is open to the public every week day from 9 to 5, Sundays from 1 to 5. Admission is free to members and their families at all times, and free to all upon Wednesdays, Saturdays, Sundays and legal holidays. Upon other days the entrance fee is 26 cents.

All friends of art are invited to become members. Annual members pay a fee of \$10 a year. Life members pay \$100 and are thenceforth exempt from dues. Governing members pay \$100 upon election and \$25 a year thereafter. Upon the payment of \$400 governing members become governing life members and are thenceforth exempt from dues. All receipts from life memberships are invested and the income only expended. All members are entitled, with their families and visiting friends, to admission to all exhibitions, receptions, public lectures and entertainments given by the Art institute and to the use of the Ryerson reference library upon art. All friends of art are invited to become members. ence library upon art.

## MUSEUM.

The Art museum now ranks among the first three or four in the country. It contains excellent examples of the old masters and of the modern painters. There is also a large and comprehensive collection of sculptures; this contains reproductions of the work of the greatest sculptors, ancient and modern. There is an extensive collection of architectural casts. The museum possesses an admirable collection of original drawings for illustration. There is also a collection of etchings and steel engravings. There is a constant succession of passing exhibitions of the best modern art, twenty or more in a year. All students enjoy the full use of the collections and the library. The advantage of having The Art museum now ranks among the first three

these great collections located in the same building cannot be overestimated. The number of visitors to the art galieries during the year ending June 1, 1910, was 546,775.

SCHOOL.

SCHOOL.

The school of instruction in the practice and theory of art includes departments of painting, sculpture, decorative designing, illustration, architecture and normal instruction. There are day and evening classes for beginners and for advanced pupils. Special classes on Saturdays. The instructors number about 80 and the pupils will average about 3,000 a year. The principle upon which the school is founded is to maintain in the highest efficiency the severe practice of academic drawing and painting, from life, from the antique and from objects, and around this practice, as a living stem, to group the various departments of art education.

The school is conducted upon the most modern methods. The classes are organized upon the French "atelier and concours" system. Constant communication and interchange are kept up with European art centers, and a ready hearing is given to all new methods and theories. Students may enter at any time. The tuition rates are as follows:

Day School—Full time for full term of twelve weeks, \$30; four weeks, \$12; four days a week, full term, \$27; four weeks, \$11; three days a week, full term, \$24; four weeks, \$9; two days a week, full term, \$18; four weeks, \$7; one day a week, full term, \$12; four weeks, \$5.

Haif-Day Courses—Five half days a week, \$24 a term; four weeks, \$10; four half days a week, \$21 a term; four weeks, \$3; three half days a week, \$17 a term; four weeks, \$7; two half days a week, \$13 a term; four weeks, \$5; one half day a week, \$8 a term; four weeks, \$4.

Evening Rates—Three nights a week, \$7 for twelve weeks or \$3 for four weeks; two nights a week, \$5.50 a term or \$2.50 for four weeks; one night a week, \$4 a term or \$2 for four weeks. Saturday Rates for Juvenile Class—Twelve half days for \$5.

uays for \$6.
Special Classes—

Ceramic Design-Twelve half days 5.00
The attendance of students for the year ended June 1, 1910, was as follows:
Day school 917
Saturday school
The section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the section of the se

## CHICAGO ACADEMY OF FINE ARTS.

No. 6 East Madison street.

President—Carl N. Wernts.
Vice-president—M. M. Newman.
Secretary—E. M. Ashcraft. Jr.
The Chicago Academy of Fine Arts was founded in October. 1992. Its object is to popularize art and art education through the more practical channels of illustration, cartooning, commercial illustration, design, normal art training, crafts, miniature, etc. It was the first school to teach commercial art, crafts work, miniature and cartooning in exclusive classes: also the first school to give its students training in business ethics and selling systems. The average attendance is

700 pupils per year, with twenty instructors, the faculty including some of the best-known local artists. There are day and evening classes and the rates of tuition are as follows:

Afternoons only—\$16 for 3 months.

Mornings only—\$26 for 3 months.

All-day classes—\$100 per season of 9 months.

Evening classes—\$22 for 9 months, 3 nights

weekly.

weekly.

Sunday class—\$20 for 9 months.
Saturday classes for school teachers, children and others—\$5 for 3 months.
All classes limited.

# UNION STOCK YARDS, CHICAGO.

# "The Live-Stock Market of the World."

The Chicago Union Stock Yards is the greatest market of any kind in the world. It consists of about 500 acres covered with pens, viaducts, buildings, raliroad tracks, etc., the whole paved with brick and divided into blocks and streets like a city, and providing all necessary facilities for doing an enormous business in receiving, unloading, yarding, feeding, watering, buying, selling, weighing, delivering and shipping live animals. It is supplied by twenty-two states of the union. There were received and sold on this market last year 14,481,372 animals for the stupendous sum of \$123,697,543.

Chicago's great meat-packing district, familiarly known as "Packingtown," is located back of and adjoining the Union Stock Yards proper, and consists of a nearly equal territory covered with immense brick buildings and a mase of railway tracks, all devoted to the slaughter, refrigeration, manufacture and distribution in refrigerator cars of meat products and byproducts for consumption throughout the world. There are also a number of independent packing plants located outside of "Packingtown."

These two districts, one embracing the livestock market and the other the meat-packing interests, while in a large measure interdependent, are controlled and operated under entirely separate management and ownerships. More than 45,000 men are employed in and about the Stock Yards and packing houses, and the daily volume of transactions reaches into the millions.

millions.

All stock reaching Chicago is sold, generally. on day of arrival. None is forwarded in first hands. All sales are for cash on day of sale, followed by immediate delivery of the property sold. A considerable portion of the daily receipts is sold for shipment alive, mainly to eastern slaughtering points and to the seaboard for export. Eastern buyers constantly compete with the large packers for the daily offerings, thus turnishing at all times abundant healthy competition among buyers. Over 100 established commission firms and corporations are engaged in selling live stock on the market regularly for nonresident shippers and producers.

Since 1900 there has been marketed and sold in Chicago a yearly average of over 16,000,000 animals, exceeding 1300,000,000 in value, or about one-half the total combined receipts of the six principal live-stock markets of the United States which means that a daily average of

principal live-stock markets of the United States which means that a daily average of over 1.000 carloads of live stock, of an average value exceeding \$1.000 per carload, or an aver-age of more than \$1.000.000 worth of animals, are idisposed of every business day of the year on the Ukicago live-stock market.

FIGURES SHOW ENORMOUS BUSINESS. The Chicago Union Stock Yards was the first great centralized live-stock market, and since its establishment in 1866 has handled the fol-lowing number of animals:

# CHICAGO AND CALUMET HARBOR LIGHTS AND FOG SIGNALS.

# CHICAGO HARBOR-LIGHTS.

On the southerly end of the northerly inner breakwater, a fixed red light in gray conical metal tower 31½ feet high; light visible 9% miles.

On the northerly end of the inner breakwater, a fixed white light from lens lantern shown from top of white post 19 feet high.

On the easterly end of the north pier at the entrance of Chicago river, a fixed red light shown from lens lantern on post 22 feet high; with the next light it forms a range showing the direction of the piers and course for entering the

On the north pier, near its easterly end, at the entrance to Chicago river, a fixed white light, in gray framework tower 27 feet high; light visible 13 miles.

In 30 feet of water, inside of and near the south-easterly end of the outer breakwater; flashing alternately red and white; interval between flashes, 10 seconds; red conical tower on rock-faced masonry tower, 59½ feet high; light 67½ feet above lake level and visible 16 miles.

On the northwesterly end of the outer break-water, a fixed red light, shown from lons lan-tern in gray skeleton metal tower 19 feet high; height of lantern above lake level 55 feet.

CHICAGO HARBOR-FOG SIGNALS.
On the north pier in front of and attached to the light tower, a bell, struck by machinery, a double and single blow alternately with intervals of 20 seconds.

At the light tower near the southeasterly end of the outer breakwater, a 10-inch steam whistle; blasts 5 seconds, silent intervals 25 seconds.

Calumet HARBOR-LIGHTS.
Calumet bar gas buoy, moored in 21 feet of water, on the northerly end of the Calumet bar; fixed white light with 10-second eclipse, shown from lens lantern.

nom lens lantern.
On the southeasterly end of the new breakwater, a fixed white light, shown from bulk metal tower 34 feet high; light visible 13½ miles.
On the outer end of the north pier, entrance to the mouth of the Calumet river and South Chicago harbor and about 11 miles southeasterly from the Chicago breakwater, a fixed red light, shown from gray cylindrical tower 30 feet high; light visible 33 miles.

CALUMET HARBOR-FOG SIGNALS.

At the breakwater tower, a first-class compressed-air airen which sounds thus: Blast, 3 seconds; silent interval, 12 seconds; blast, 3 seconds; silent interval, 42 seconds.

At the north pler light, a bell struck by machinery every 20 seconds.

# Keep Your Mouth Clean It Is Essential to Good Health

USE

# ORO-THYOL (liquid)

for cleansing the mouth, and as a gargle and spray for sore throat.

It is antagonistic to all germs—the cause of most sickness—which enter the system through the mouth.

It is not injurious to delicate tissue.

ORO-THYOL TOOTH PASTE AND POWDER are ideal preparations for the perfect cleansing of the teeth.

REFRESHING—COOLING

Try ORO-THYOL and be convinced.

# FIELD MUSEUM OF NATURAL HISTORY.

President-Stanley Field. Vice-Presidents-Martin A. Ryerson, Watson F. Blair. Director of the Museum and Secretary-Frederick J. V. Skiff.

Treasurer—Byron L. Smith. Auditor and Assistant Secretary—D. C. Davies.

The Field museum of natural history, established in 1894 at the close of the World's Columbian exposition of 1893, occupies the temporary building erected for fine arts in Jackson park, the exposition site. The founding of a scientific institution of this character in Chicago was made possible by the gift of \$1,000,000 by Marshall Field, who on his death (Jan. 16, 1906) bequeathed the institution a further \$8,000,000, \$4,000,000 for endowment. In addition \$500,000 has been do nated by other individuals and there is an annual income from other sources than endowment of about \$25,000. The citizens of Chicago have confirmed legislative provision for the levy of a tax for the maintenance of the museum when a new building shall have been erected, which it is estimated will eventually produce approximately \$100,000 per annum.

mated will eventually produce approximately \$100,000 per annum.

The nucleus of the exhibition material was gathered by gift and purchase at the World's Columbian exposition. Most of this material, however, has since been rearranged, readapted or discarded. Several departments created at the organization have been shandoned, until, after the lapse of eleven years and the expenditure of over \$2,000,000, the museum is now divided into four departments—amely. anthropology, botany, geology and 2001namely, anthropology, botany, geology and zool-

NATURAL HISTORY.

ORY. Many expeditions for the purpose of obtaining study, exhibition and exchange material and data have been dispatched to all parts of North America and to different countries. The results of these expeditions, investigations and researches have been published by the museum from time to time, which publications have been distributed to kindred societies and institutions both at home and abroad. Two courses of free lectures are given annually. The museum has a working library of about 53,000 titles, an extensive exchange system fully equipped departmental laboratories, a herbarium of 260,000 sheets, study collections in mammals and birds reaching many thousand specimens, a large two-story taxidermy section, a well-equipped printing shop, illustration studies and assaying and lapidary rooms. In North American ethnology, in the world's mineralogy, in economic botany the museum is particularly prominent, while its series of mounted mammals furnish examples of advanced museum methods. The present main building covers nine acres and is open to the public on all days except Christmas and Thanksgiving. An admission fee of 25 cents is charged except on Saturdays and Sundays, when admission is free to all. Students, scholars and teachers are admitted free at all times.

The museum is incorporated under state law and the administrative control rests in a board of trustees with president, secretary, etc. The executive of the museum is the director, under whom there are four head curators with divisional assistant curators, preparators, etc. The entire measure for the accessions system, the historical files, publications and supplies are in charge of a recorder.

# You Need REST

Go where rest and health await you. You will be yourself again in a week or two. Then you will enjoy the business struggle and the social whirl. In your present physical condition it may be too much for you. So come now to

# French Lick West Baden Springs

The very air is invigorating. And golf, horseback riding, driving and the outdoor and indoor attractions add spice to your stay, while the waters at "America's Pountain of Youth" fill you with energy, ambition and push.

For the joy of utmost health and happiness this winter, come to French Lick now. Write anyway for descriptive booklet, rates, etc. Address

Presbyterian Social Union—Secretary, Thomas G. McCulloh, 5130 Hibbard avenue. Unitarian Sunday School Society—515, 175 Dear-

born street.
Young Men's Christian Association—153 LaSalle street; general secretary, L. Wilbur Messer.

# CHICAGO'S FREE PUBLIC BATHS.

Charles T. Rogers, superintendent.

Names and location of baths:
Carter H. Harrison—759 Mather street.
Martin B. Madden—325 Wentworth avenue.
William Mavor—4647 Gross avenue.
Robert A. Waller—19 South Peoria street.
Kosclussko—144 Holt avenue.
De Witt C. Cregter—1153 Gault court.
John Wentworth—2839 South Halsted street.
Theodore T. Gurney—1141 West Chicago avenue.
William B. Ogden—3346 Emerald avenue.
Joseph Medill—2138 Grand avenue.
Thomas Gahan—4226 Wallace street.
Pilsen—1849 Throop street. Thomas Gahan—4226 Wallace street.
Pilsen—1849 Throop street.
Ferdinand Henrotin—2415 North Marshfield avenue.
William Loeffler—1217 South Union street.
Simon Baruch—1911 West 20th street.
Free baths are given at the 14th street and 22d street pumping stations and at several lake beaches, but special buildings have not been pro-

, superintendent.

vided at these points. The Carter H. Harrison bath, which was opened in January, 1904, is said to have been the first free public bath in the United States, if not in the world. Similar baths in Vienna charged a fee of 2 cents and those in New York 5 cents. The Madden bath was opened in April, 1897; the Mavor bath in May, 1900; the Waller bath in February, 1901; the Koschussko bath in April, 1904; the Cregier bath in October, 1905; the Wentworth bath in December, 1905; the Gurney bath in May, 1906; the Ogden bath in July, 1906; the Medill bath in September, 1906; the chan bath in November, 1907; the Pilsen bath in March, 1908; the Henrotin bath in September, 1908; the Loeffler bath in February, 1909, and the Baruch bath in April, 1910. The average cost of each plant has been between \$15,000 and \$\$9,000, and the average annual cost of maintenance, \$4,000.

SOCIETIES OF ARTISTS AND ART CLUBS.

Art Students' League—Art institute; president, Richard F. Babcock; secretary, Claire L. Stadeker. Chicago Arts and Crafts Society—Secretary, B. B. Jarvie, 1340 East 47th street.

Chicago Camera Club—87 Lake street; president, F. B. Noyes; secretary, H. A. Langston. Chicago Ceramic Art Association—Art institute; president, Margaret E. Iglehart; corresponding secretary, Miss Eleanor Stewart, 1367 East 53d street. Chicago Public School Art Society—Corresponding secretary, Mrs. John H. Long.

Chleago Society of Artists (organised 1902)—President, John H. Vanderpoel; secretary, George F. Schults; clubrooms in Art institute.

Chicago Water Color Club (organized 1907)—President, George F. Schults; secretary, Antonia Sterba, 608, 216 Clark street.

Friends of American Art—President, W. O. Good-man; secretary, George F. Porter. Lake View Art Club—Secretary, Miss Mary G. Younglove, 834 Fullerton avenue. Palette and Chisel Club—Athenseum building; pres-ident, O. E. Hake; secretary, A. E. Hayden.

# CHICAGO BOARD OF TRADE.

Jackson boulevard and LaSalle street.

President—A. Stamford White.
Vice-President—John C. F. Merrill.
Secretary—George F. Stone.
Treasurer—Ernest A. Hamill.

# AMERICAN FENCE

Square Mesh, Hinged-Joints (patented) with Flexible Stays.

A square mesh fence of weight, great strength and durability. Large wires in both the horizontals and the uprights, and the whole fabric woven together with the American hinged joint (patented), making the most substantial and flexible union mechanically possible. Both wires are positively locked and firmly held against side slip and yet are free to act like a hinge in yielding to pressure and returning quickly to place without bending or injuring the metal. Many years of the hardest usage in the field have demonstrated the value of the American forms of construction, justly entitling it to be called a resilient wall of steel solid and enduring.

# ELLWOOD FENCE

Diamond Mesh, Elastic Cables

The steel in Ellwood fence is especially made for the purpose from carefully selected stock; it is hard, elastic, tough and springy. The line wires, composed of two or more wires twisted into cables, give each individual wire the shape of an elongated coiled spring. The fence is therefore sufficiently elastic to take care of expansion and contraction, and yet so rigid when properly stretched as to prevent sagging. The small and permanent mesh is made by weaving one continuous wire throughout the fabric. The mesh or stay wires are so interwoven that slipping is impossible. The triangular truss is the strongest form of construction known; for this reason, Ellwood fence will stand the hardest usage and still retain its shape.

# ROYAL FENCE

Square Mesh, Continuous Stays, with Royal Loop

Is made of heavy, hard, stiff steel wire, the strongest and best possible to produce for fencing purposes. The stay or upright wires are continuous from top to bottom of the fence and secured to the horizontal wires by the Royal loop. Being wrapped around the horizontal wires entirely within the tension curves, the stays are rigidly held in place and side slipping prevented. The whole forms a fabric of the greatest strength and ample flexibility, the best of the continuous stay fences.

# **ANTHONY FENCE**

Square Mesh, Rigid Stays, with Anthony Knot

The upright and horizontal wires are tied with the famous Anthony knot, the smallest fence knot made. Machinery of special design has been brought to such a degree of perfection that the most nicely balanced woven wire fabric is produced, each wire drawing with mathematical precision under equal tension and uniformly even with the others. This brings into play, under stress of action, all the wires within a considerable radius of the center of contact, affording to an extraordinary degree great resistance combined with flexibility.

stations served from the carrier stations and each with a clerk in charge.

There are 3,366 clerks in the general postoffice and stations and 1,904 carriers, including collectors.

## COLLECTIONS AND DELIVERIES.

In the downtown district there are twenty-six collections of mail matter between 7 a. m. and 11 p. m.; in the outlying districts there are ten collections during the day and evening. Mail is delivered six times a day in the business district and three times in the outlying districts.

Special delivery letters are delivered in the central postoffice district between 7 a. m. and 11 p. m. and from stations within their respective districts (station U excepted) between 7 a. m. and 6 p. m. Night special delivery is made only within the hours and territory as shown by the accompanying map.

In the district bounded by the Chicago river on the north and west, and on the south by 12th street, hotels, clubs, newspapers, telegraph offices and undertakers have all-night service.

Area serred: Until 6 p. m., 191.16 square miles; until 9 p. m., 67.64 square miles; until 10 p. m., 55.63 square miles; until 11 p. m., 11.38 square miles; all night, 1.08 square miles.

thereof

thereof.

4. For children between 5 and 14 years of age, when accompanied by an adult, not more than haif of the above rates shall be charged for like distances. For children under 5 years of age, when accompanied by an adult, no charge shall be made.

5. For the use of any vehicle mentioned in this reconstruction one or more passengers.

5. For the use of any vehicle mentioned in this section conveying one or more passengers, when hired by the hour with the privilege of going from place to place and stopping as often as may be required, as follows: For the first hour.

For each additional hour or part thereof at the rate of \$1 an hour.

6. In the case of any vehicle described in this section being engaged by the hour and discharged at a distance from the place where it was engaged, the driver shall have the right to charge for the time necessary to return to such place. turn to such place.

TWO-HORSE VEHICLES.

1. For one or two passengers not exceeding one mile. \$1.00

as orten as may be required, as follows:
For the first hour. 2.00
For each additional hour or part thereof, at
the rate of \$1.50 an hour.
6. In the case of any vehicle described in this
section being engaged by the bour and discharged at a distance from the place where
it was engaged, the driver shall have the
right to charge for the time necessary to return to such place.
Hiring by the Hour-Must be so specified at the
time of hiring. In all cases where the hiring of
any vehicle licensed under the provisions of this
article is not at the time of such hiring specified
by the person hiring same to be by the hour, it
shall be deemed to be by the mile, and for any
detention exceeding a total period of fifteen minutes during the whole period of such hiring, when
so working by the mile, the driver may demand
pay for such period of detention at the rate of
\$1.00 per hour in addition to the rate per mile.
Baggarg-Every passenger upon any vehicle 11:

\$1.00 per hour in addition to the rate per mile.

Baggage—Every passenger upon any vehicle il.

censed under the provisions of this article shall

be allowed to have conveyed with him upon such

vehicle without charge therefor his ordinary
light traveling baggage in an amount not to ex
ceed in weight seventy-five pounds.

Lost Baggage—Whenever any package, article of

baggage or goods of any kind shall be left in

or upon any vehicle licensed under the provisions

of this article, the driver of such vehicle shall

upon the discovery of such package, baggage or

goods forthwith deliver the same to the board of

inspectors of passenger vehicles.

# TAXICABS.

No person, firm or corporation owning, operating or controlling any taxicab shall let the same for hire or reward for a fee or charge to be fixed and determined by the hour or fraction thereof, but the fare demanded and received shall (excepting for the fare demanded and received shall (excepting for the fare demanded and received shall excepting for the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare for the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demanded by the fare demand

waiting time as herein provided for) be computed by the distance traveled and shall not exceed the following rates:

Waiting Time—Waiting time shall include the time during which the taxleab is not in motion, beginning with its arrival at the place to which it has been called, or the time consumed while standing at the direction of a passenger, but no charge shall be made for time lost for inefficiency of the taxleab or its operator or for time consumed by a premature arrival in response to a call. call.

of the taxicab or its operator or for time consumed by a premature arrival in response to a call.

Taximeter to Show Only One Tariff—Flagpost—The dial of such taximeter shall show but one tariff, which shall be registered in accordance with the rates prescribed in this ordinance. Each taxicab shall be equipped with a flag at least three by two inches, either painted red or bearing thereon in letters of at least one inch in height the word "Vacant" or the words "For Hire." The flagpost of such flag shall be kept up or toward a vertical position when the taxicab is for hire, and when such taxicab is engaged in the service of a passenger or passengers said flagpost shall be kept down or toward a horisontal position.

Operator to Announce Charge Before Changing Position of Flagpost—It shall be the duty of the operator or driver of every taxicab to announce to the person hiring the same, at the termination of the service and before the position of the flag or flagpost is changed, the charge therefor, as shown on the dial of said taximeter.

Baggage—Every passenger upon any public automobile, taxicab, autocar or other similar vehicle shall be allowed to have conveyed with him upon such vehicle, without charge therefor, his ordinary light traveling baggage in an amount not to exceed in weight 100 pounds. A fee of 25 cents may be charged for conveying a trunk.

Lost Baggage—Whenever any package, article of baggage or goods of any kind shall be left in or upon any vehicle licensed under the provisions of this article, the operator of such vehicle shall, apon discovery of such package, baggage or goods, or this article, the operator of such vehicle shall, apon discovery of such package, baggage or goods, or this article, the operator of such vehicle shall, apon discovery of such package, baggage or goods, or the street of the board of inspectors of passenger vehicles.

AUTOMOBILES (OTHER THAN TAXICABS).

the seating capacity of any such vehicle neither the operator's seat nor any portion thereof shall be computed, but the seating capacity shall be determined by the number of persons which can be accommodated in the interior or tonneau of such vehicle. No Charge for Answering Call or for Return from Call—No charge shall be made for the time consumed in responding to a call or in returning to the place from which such vehicle is called. No Charge in Case of Breakdown—In case any an-

the place from which such vehicle is called. No Charge in Case of Breakdown—In case any automobile, autocar or other similar vehicle shall, while conveying for hire or reward any passenger or passengers, become disabled, or shall break down so as to be unable to convey such passenger or passengers to his or their destination, and such disablement or breaking down cannot be remedied so that such vehicle shall be enabled to proceed within fifteen minutes from the time such vehicle shall have become disabled or shall have stopped, no fare shall be charged or collected for any service rendered or distance traveled up to the time of such stoppage, disablement or breakdown. Provided, however,

that if any such passenger or passengers elect to remain in such vehicle and desire to be conveyed to their destination thereby, after such breakdown or disablement shall have been remedied, in such event full rates for the distance traveled shall be charged as if no breakdown or stoppage had occurred, or if such vehicle was employed by the hour the time of stoppage shall be deducted from the time charged for.

Bagkage—Every passenger upon any public automobile, taxicab, autocar or other similar vehicle shall be allowed to have conveyed with him upon such vehicle, without charge therefor, his ordinary light traveling baggage in an amount not o exceed in weight 100 pounds. A fee of 2 cents may be charged for conveying a trunk. Lost Baggage or goods of any kind shall be left in or upon any vehicle licensed under the provisions of this article, the operator of such vehicle shall, upon discovery of such parkage, baggage or goods, forthwith deliver the same to the board of inspectors of passenger vehicles.

#### THE CHICAGO STREET-RAILWAY FRANCHISE.

Ordinances passed by city council Feb. 4, 1907; vetoed by mayor and passed over veto Feb. 11. 1907; approved by people on referendum vote April 2, 1907.

2, 1907.
Systems to be reconstructed and rehabilitated within three years.

City to supervise rehabilitation through board of three engineers.

Life of grant not to extend in any event beyond Feb. 1, 1927. City to receive 55 per cent and companies 45 per cent of the net profits from the operation of the

roads. Twenty-one through routes specified and provision

made for others

Fares for adults to be 5 cents for continuous trips in one general direction within the present or future city limits.

Transfers to be given at all connecting points on and to all lines except in section on south side between 12th street and the river.

Motive power of cars to be electricity applied by the overhead or underground trolley systems. Cars to be of the latest and most approved pat-tern and to be kept clean and warm and well

tern and to be kept clean and warm and well lighted.
Cars to be operated singly after one year. Companies to pay \$5,000,000 toward the construction of subways in the downtown section at the city's option.
City given the right to purchase the property of both the present great systems at any time upon giving six months' notice.

giving six months' notice.

Agreed value of Union Traction company's property June 30, 1906, \$29,000,000, and of the ChicagoCity Railway Company's property at same date,
\$21,000,000. The purchase price for the kety is to
be the aggregate of these two, sums, with the
value of work done and property acquired between
the date named and the date of the passage of the
ordinance and the cost of rehabilitation and extensions added. sions added.

#### CHICAGO'S BRIDGE SYSTEM.

The first ferry across the river was established in 1829, where the Lake street bridge now is. In 1833 a floating bridge of logs was in operation just north of the present Randolph street bridge. A foot bridge over the north branch was built in 1832 at Kinzie street. The first drawbridge over the main branch of the river was placed at Dearborn street in 1834. In 1854 a pivot bridge was built at Clark street. These and other bridges of that time ware built by the presence most directly benefited were built by the persons most directly benefited by them. It was not until 1857 that a bridge was built entirely at the city's expense. This was the built entirely at the city's expense. This was the structure over the south branch at Madison street. It cost \$30.000. Until 1872 the swing bridges were turned by hand, but in the year named steam power

was installed on the Dearborn street structure and later on most of the other bridges in the downtown section were similarly equipped. In 1895 the Rush, Lake and Van Buren street bridges were operated by electric motors. The last named structure, which was opened for traffic in that year, was the first of the Scherzer rolling type. The Halsted street lift bridge, the first and only one of its kind, was opened in 1894 and was operated by steam. It cost the city \$224.880 the city \$242.880

There are at the present time in Chicago ninety-one bridges over the river, of which sixty-nine are maintained by the city and twenty-two by railroad companies. There are thirty-four viaducts of various kinds in the city.

## Why Do Men Fail?

¶THE SUPREME PROBLEM OF LIFE for you is, how to get money in sufficient quantity to make you independent before your hair turns gray and your eyes grow dim.

In the struggle for money is "the struggle for existence" and a man can scarcely hope to be victorious therein except in the days of his strength and prime.

We are all fighting for money (because money means nearly all that's worth

while) but few there be who attain it.

¶ Now, why should that be so? Why are there so many failures? The answer is simple: The majority are failures because they do not think right! They are in a state of discord rather than harmony with the natural Laws that govern moneymaking and the creation of wealth.

¶ Is that your case? Is your mind negative? If so you must seek immediate remedy. You must remove the blight of wrong thinking; and for that purpose

we strongly recommend to your attention a splendid little book, entitled

#### "THE LAW OF FINANCIAL SUCCESS"

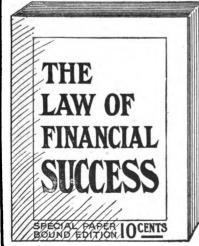

¶ It is as full of good things as an egg is full of nutriment. It is the essence of moneymaking boiled down for busy people.

¶ Send for it at once. It only costs ten cents and it will make a new man of you. It will teach you how to be a winner—how to escape the hell of poverty—the worst of all hells.

We honestly declare it is worth no end of money to any man who is desirous

of properly directing the forces within him for his own enrichment.

**q** If you have the strength and determination to be a winner, get this book. Get it at once. Follow our advice. Don't put off till to morrow what you should do to-day. Fill in the coupon and the book is yours by the next mail, and it may be the making of you. If you don't like it your money will be returned; you run no risk. Special Paper Bound Edition of 16 chapters, 104 pages, only 10 cents. Over 150,000 copies sold. **q** Don't miss the tide that leads to fortune.

#### OLD RESIDENTS OF CHICAGO.

Nov. 15, 1910.

In the following list of men and women who have lived in the city or its suburbs for lifty-nine years or more there are doubtless many omissions, though an effort has been made to make it as complete as possible. Additions to, changes of residence and other corrections of this list, which will be continued in future editions of this publication, will be glidly received. Names marked with an * are those of persons born in Chicago or Cook county. Ages when known are given in parentheses:

be continued in future editions of this publication, will be gladly received. Names marked with an are those of persons born in Chicago or Cook county. Ages when known are given in parentheses:

## "THE KOHLER SYSTEM"

PUSH BUTTON CONTROL FOR ELECTRICALLY OPERATED PRINTING PRESSES AND MACHINE TOOLS, AND FOR ALL OTHER MACHINES REQUIRING PRECISE, ACCURATE, INSTANT AND INFALLIBLE CONTROL.

By means of "The Kohler System" the operation of the largest press is controlled from any one of a number of push-button stations. Quick starting and stopping is accomplished without jerk or jar. Any speed desired obtained by merely pushing a button. Pressmen are protected by the "safe" button, preventing premature starting of the press. Booklet giving full particulars free on request.

Dodling, Anna (80), 3353 Calumet avenue; arrived 1840; died Aug. \$1.

INCE November 1, 1906, a large proportion of the garbage of Chicago has been treated in a reduction plant, built at a cost of over \$500,000, and operated by the Chicago Reduction Company.

The reduction plant is located at 39th and Iron streets, a distance of 4% miles to the southwest of the center of the city. It has a frontage of 380 feet on the Chicago River. A side track from the Chicago Junction Railway (Belt Line) enters its grounds. By laying a short distance of track it will become accessible also by the street car lines of the city. This furnishes transportation facilities by water, railway, street car or vehicle which are unsurpassed.

The grounds cover 3½ acres, the buildings occupying about two-thirds of this space. The plant comprises the following:

A dock 120 ft. long by 80 ft. wide, about 25 ft. above the river level. A receiving building, 70x80 ft., in plan two stories high.

3 drier buildings, 80x80 ft., two stories high.

A naphtha extraction building, 38x65 ft., four stories high. A naphtha storage building, 25x30 ft., a sub-basement.

A milling building, 20x40 ft., four stories high.

A boiler house, 40x46 ft., two stories high. Shops, 25x120 ft., one story high. An office, 20x20 ft., one story high, with a sub-basement.

The principal buildings are of modern and permanent construction, being built of brick and re-enforced concrete throughout, making them fireproof and sanitary. They are so designed as to furnish ample light by day, and are generously equipped with electric light for night labor. They form a complete series from start to finish of process, and are built with intermediate spaces so that each building may be duplicated and the capacity of the plant doubled, if required. The present capacity provides for 750 tons of garbage daily. The motive power is electricity, each apparatus being equipped with a separate electric motor.

Dunne, Edward J. (62), bishop of Dallas, Tex; in Green Bay, Wis., Aug. 5.

Bastman, Mrs. Mary Jane C. (90), Elgin; arrived in Chicago 1840; die* Jan. 5.

## THE CHICAGO CITY RAILWAY COMPANY

The Chicago City Railway Company is completing its fourth year of operation under the "traction-settlement" ordinance of February 11, 1907. During this period, the company not only has expended approximately \$20,000,000 for reconstruction and betterments, but has set the pace for all traction companies in the country which are endeavoring to modernize their equipment and to bring their service up to the highest notch of engineering and operating skill.

The notable successes achieved by the Chicago City Railway Company, as the foremost representative of the "new school" of street railway operation, are due primarily to its progressive policies and to the energy and fidelity with which they have been enforced. These policies may be briefly summarized as follows:

- 1—To perfect every part of its plant and system so as to maintain cars on the street at the maximum of practical efficiency.
- 2—To co-ordinate its lines and to systematize its service in such manner as to meet not only the immediate requirements of its own patrons but also to serve the entire City of Chicago.
- 3—To co-operate in a practical way with the public in solving the complex traffic problems of the city, and in developing its own

service with special reference to the safety, comfort and health of those who use its cars.

4—To develop along parallel lines the interests of patrons, public, municipality and holders of company securities. These interests become inimical only when they work at cross-purposes. None profits by poor, irregular or duplicated service, accidents, waste, bad management, wrangling or litigation. A steady, well-balanced service, arranged with reference to actual demands of the traffic and supported by all the parties in interest, means a satisfied patronage, increased revenues for city and company, and a street car system which will expand with the growth of the city.

5—To deal with its employes frankly, liberally and justly.

The Chicago City Railway Company operates, in addition to its own lines, the properties of the Calumet & South Chicago Railway Company and The Southern Street Railway Company, representing an aggregate mileage of about 400. City Railway lines cover mainly the South Division of the city of Chicago, while the Calumet system, which extends as far south and east as Hammond, Ind., serves important industrial centers, including South Chicago, Pullman, West Pullman, Whiting and South Deering. Upwards of \$9,000,000 is being expended on rehabilitation and extension of these tributary properties. The "immediate rehabilitation" work of the Chicago City Railway Company, as by ordinance provided, was completed on April 15, 1910.

Street cars operated by the Chicago City Railway Company serve the most important industrial centers in the city. They also run to Washington and Jackson Parks, the "Midway," and to nearly all the fresh air resorts in the South Division. Calumet cars, operated on 75th and 79th streets, carry passengers to the only free open beaches in this part of the city. The stockyards and drainage canal are also places of interest most accessible by City Railway lines.

Special attention is called to the modern funeral car service of the Calumet & South Chicago Railway Company, which was installed in 1910. Funeral coaches, such as illustrated in these pages, may be chartered for the transportation of funeral parties from any point on or adjacent to the Calumet & South Chicago Railway, the Chicago City Railway, or the Hammond, Whiting and East Chicago Railway to and from the following cemeteries: Oakwoods, Mount Greenwood, Mount Olivet and Mount Hope. For reservations or information concerning rates and service, apply to Calumet & South Chicago Railway Company, Transportation Department, 9314 Drexel avenue, telephone Burnside 22; or, First National Bank Building, telephone Randolph 581.

For the convenience of patrons and public, the Chicago City Railway Company presents herewith tables indicating routes and terminals of cars operated by it, including a condensed time-table showing "owl-car" or night service.

#### GUIDE TO ROUTES AND TERMINALS

#### Chicago City Railway Company

#### ASHLAND AVENUE LINE—DOWNTOWN DIVISION.

Leave State and Lake streets.

Route—South on State street to Archer avenue, southwest to Ashland avenue, south to 71st street.

#### ASHLAND AVENUE-THROUGH ROUTE NO. 9.

Leave 71st street and Ashland avenue.

Rou'e—North on Ashland avenue to 12th street, west to Paulina street, north to Lake street, east to Ashland avenue, north to Clybourn place west to Wood street.

#### ARCHER AVENUE AND 38TH STREET LINE.

Leave State and Lake streets.

Route—South on State street to Archer avenue, southwest to West 38th street, west to Central Park avenue.

#### ARCHER AVENUE LIMITS LINE.

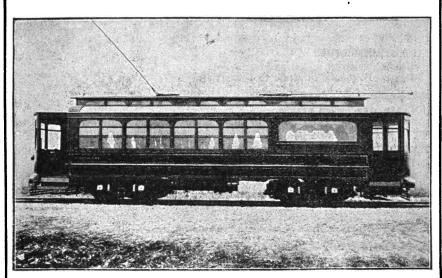

Leave State and Lake streets.

Route—South on State street to Archer avenue, southwest to 48th avenue (City Limits).

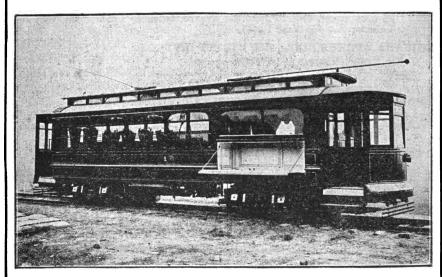

#### 47TH STREET LINE.

Leave Illinois Central R. R. and 47th street.

Route-West on 47th street to Kedzie avenue.

FUNERAL CAR OPERATED BY CHICAGO CITY RAILWAY CO. (Showing casket compartment closed)

FUNERAL CAR OPERATED BY CHICAGO CITY RAILWAY CO. (Showing casket compartment open)

#### 43D AND ROOT STREET LINE.

Leave Illinois Central R. R. and 43d street.

Route—West on 43d street to State street, north to Root street, west to Stockyards.

#### 51ST STREET LINE.

Leave 51st street and Grand boulevard.

Route-West on 51st street to Leavitt street.

#### 59TH AND 61ST STREET LINE.

Leave Washington avenue.

Route—West on 61st street to State street, north to 59th street, west to Leavitt street.

#### HALSTED STREET LINE—DOWNTOWN DIVISION.

Leave Washington and Clark streets.

Route—South on South Clark street to Archer avenue, west to Halsted street, south to 79th street.

#### HALSTED STREET LINE-O'NEIL STREET DIVISION.

Leave O'Neil and Halsted streets.

Route-South on Halsted street to 79th street.

#### HALSTED STREET-THROUGH ROUTE NO. 24.

Leave 69th and Halsted streets.

Route-North on Halsted street to Division street.

#### COTTAGE GROVE AVENUE LINE—HYDE PARK DIVISION.

Leave Randolph street and Wabash avenue.

Route—South on Wabash avenue to 18th street, east to Indiana avenue, south to 22d street and Cottage Grove avenue, south on Cottage Grove avenue to 55th street, east to Jefferson avenue, south to Cable court, east to Lake avenue (Jackson Park).

#### INDIANA AVENUE LINE-51ST STREET DIVISION.

Leave Randolph street and Wabash avenue.

Route—South on Wabash avenue to 22d street, east to Indiana avenue, south to 51st street, east to Grand boulevard (Washington Park).

#### INDIANA AVENUE LINE-47TH STREET DIVISION.

Leave Randolph street and Wabash avenue.

Route—South on Wabash avenue to 22d street, east to Indiana avenue, south to 47th street, east to I. C. R. R.

#### INDIANA AVENUE LINE-43D STREET DIVISION.

Leave Randolph street and Wabash avenue.

Route—South on Wabash avenue to 22d street, east to Indiana avenue, south to 43d street, east to I. C. R. R.

#### KEDZIE AVENUE LINE.

Leave 63d street and Kedzie avenue.

Route-North on Kedzie avenue to Drainage Canal Bridge (south end).

#### COTTAGE GROVE-AV. LINE—GRAND CROSSING & OAKWOODS DIVISION

Leave Randolph street and Wabash avenue.

Route—South on Wabash avenue to 18th street, east to Indiana avenue, south to 22d street and Cottage Grove avenue, south on Cottage Grove avenue to South Chicago avenue, southeast to 75th street (Grand Crossing).

#### 63D STREET LINE.

Leave 64th street and Stony Island avenue.

Route—North on Stony Island avenue to 63d street, west to Central Park avenue (Chicago Lawn).

#### 63D STREET LINE—CLEARING DIVISION.

Leave 63d street and Central Park avenue (Chicago Lawn). Route—West on 63d street to Central avenue (Clearing).

#### 63D STREET LINE—JOLIET DIVISION.

Leave 63d street and Central Park avenue (Chicago Lawn).

Route—West on 63d street to south 48th avenue, north to Archer avenue (Chicago & Joliet Electric Railway Station).

#### 67TH STREET AND 69TH STREET LINE.

Leave Stony Island avenue and 67th street.

Route—West on 67th street to Rhodes avenue, south to Keefe avenue, southwest to 69th street, west to Leavitt street.

#### STATE STREET LINE-73D STREET DIVISION.

Leave State and Lake streets.

Route—South on State street to Vincennes road, southwest to 73d street and Wentworth avenue.

#### STATE STREET LINE-61ST STREET DIVISION.

Leave State and Lake streets.

Route-South on State street to 61st street, west to Wentworth avenue.

#### 35TH STREET LINE.

Leave Cottage Grove avenue and 35th street.

Route-West on 35th street to California avenue.

#### 31ST STREET LINE.

Leave Lake Park avenue and 31st street.

Route-West on 31st street to Pitney court, north to Archer avenue.

#### 39TH STREET LINE.

Leave Cottage Grove avenue and 39th street.

Route-West on 39th street to Halsted street, south to Stockyards.

#### 26TH STREET LINE.

Leave Cottage Grove avenue and 26th street.

Route-West on 26th street to Halsted street.

#### WALLACE STREET AND CENTRE AVENUE LINE

Leave State and Lake streets.

Route—South on State street to Archer avenue, southwest to South Canal street, south to 29th street, west to Wallace street, south to Root street, west to Halsted street, south to 47th street, west to Centre avenue, south to 75th street.

#### WENTWORTH AVENUE AND AUBURN PARK LINE.

Leave Clark and Washington streets.

Route—South on Clark street to Archer avenue, southwest to Wentworth avenue, south to Vincennes road, southwest to 79th street, west to Halsted street.

#### WENTWORTH AVENUE AND CLARK STREET—THROUGH BOUTE NO. 22.

Leave 77th street and Vincennes road.

Route—Northeast on Vincennes road to Wentworth avenue, north to 22d street, east to Clark street, north to Devon avenue.

#### WENTWORTH-AV. AND CLYBOURN-AV. LINE-THROUGH ROUTE NO. 2

Leave 79th and Halsted streets.

Route—East on 79th street to Vincennes road, northeast to Wentworth avenue, north to 22d street, east to Clark street, north to Division street, west to Clybourn avenue, northwest to Belmont avenue.

#### WESTERN AVENUE LINE.

Leave Archer avenue.

Route-South on Western avenue to 71st street.

#### 22D STREET LINE.

Leave 22d street and Wabash avenue.

Route-West on 22d street to South 40th avenue.

#### 22D STREET AND LAWNDALE AVENUE LINE.

Leave Wabash avenue and 22d street.

Route—West on 22d street to Kedzie avenue, south to West 25th street, west to Lawndale avenue, south to 33d street.

#### THROOP AND MORGAN STREET LINE (STOCKYARDS).

Leave 21st and Throop streets.

Route—South on Throop and Morgan streets to 39th street to north gate of Stockyards.

#### KEDZIE AVENUE LINE.

Leave Drainage Canal bridge (north end) and Kedzie avenue.

Route-North on Kedzie avenue to 22d street.

#### Calumet & South Chicago Railway Company

Connect with Alley "L" at Stony Island avenue and 63d street, and South Park avenue and 63d street, also Cottage Grove avenue line at 71st street, 75th street and South Chicago avenue, with 63d street line at Stony Island avenue, and with Dauphin Park, Burnside, Fernwood, Washington Heights, West Pullman, Cheltenham Beach, Grand Crossing, Auburn Park, Roby, Stony Island, South Chicago, Roseland, Kensington, Pullman, Whiting, East Chicago and Hammond.

#### 75TH STREET LINE—AUBURN PARK AND MANHATTAN BEACH.

Leave 75th street and Eggleston avenue.

Route—East on 75th street to the Lake (Manhattan Beach).

#### 93D STREET AND PULLMAN LINE—Kensington to Illinois Steel Mills.

Leave 115th street and Cottage Grove avenue.

Route—East on 115th street to Watt avenue, north to 111th street, west to Cottage Grove avenue, north to 93d street, east to Nickel Plate shops, around south side thereof to 94th street, east to Stony Island avenue, north to 93d street, east to Exchange avenue, northeast to 92d street, east to Buffalo avenue, north to 89th street, east to Illinois Steel Mills.

#### HAMMOND LINE.

Leave 63d street and Madison avenue.

Route—East on 63d street to Stony Island avenue, south to South Chicago avenue, southeast to 91st street, east to Commercial avenue, south to 92d street, east to Ewing avenue, south to 106th street, east to State Line, thence to Hammond, Ind.

#### 115TH STREET LINE—KENSINGTON.

Leave South Park avenue and 115th street.

Route—West on 115th street to Halsted street.

#### 103D STREET LINE—WASHINGTON HEIGHTS.

Leave 103d street and Cottage Grove avenue.

Route—West on 103d street to Vincennes road (Washington Heights).

#### 106TH STREET LINE.

Leave 106th street and Ewing avenue. Route—West on 106th street to Torrence avenue.

#### STONY ISLAND LINE.

Leave 63d street and Stony Island avenue. Route—South on Stony Island avenue to 93d street.

#### SOUTH DEERING AND SOUTH CHICAGO LINE.

Leave 63d street and Stony Island avenue.

Route—South on Stony Island avenue to 75th street, east to Coles avenue, southeast to 79th street, east to Ontario avenue, south to 83d street, east to Superior avenue, south to 87th street, east to Buffalo avenue, south to 92d street, west to Commercial avenue, south to 104th street, west to Torrence avenue, south to 112th street.

#### 79TH STREET LINE.

Leave South Chicago avenue and Noble court.

Route—Southeast on South Chicago avenue to 79th street, east to Ontario avenue.

#### WEST PULLMAN LINE.

Leave 63d street and South Park avenue.

## Three Years' Record

OF THE

## Chicago Railways Company

Operating on the North, West and Northwest Sides.

\$30,000,000 expended for rehabilitation up to Nov. 1, 1910

CARS—One thousand new first-class Pay'as-You-Enter cars in operation. Three hundred and forty additional cars of this type under construction. Fifty all-steel cars in use on Van Buren street line.

TRACK—Two hundred and twenty-three miles of new track built, heavy modern grooved rails laid in concrete at a cost of \$50,000 a mile. Seventeen miles of extensions built in new territory. Sixteen miles of track built for the Consolidated Traction Company, now a part of the Chicago Railways system, in addition to the mileage stated.

BUILDINGS—Fifteen new buildings, some of them costing from \$200,000 to \$300,000. New car stations have been erected at the Limits, on North Clark street; at Twenty-fifth and Leavitt streets; at Kedzie avenue and Van Buren street; in Lawndale; at Lincoln and Sheffield avenues, and at West North and 48th avenues. New substations furnishing electrical power have been built at 25th and Leavitt streets; Lill and Sheffield avenues; Grand and 40th avenues; Milwaukee avenue and Cleaver street, and Illinois street and LaSalle avenue. Extensive shop buildings and additions and other important structures have been erected.

ELECTRICAL DEPARTMENT has laid 746 miles of conduit, installed 219 miles of trolley wire and set back of the curb 230 miles of poles, in addition to a large amount of other work.

TUNNELS—The Van Buren street tunnel was opened for operation in October, and the operation of cars through it has greatly relieved congestion in the loop district. Cars will be running the first of the year through the new Washington street tunnel. Work on the LaSalle street tunnel is well advanced.

COMPANY—On October 10, 1910, the Chicago Railways Company secured a franchise from the City of Chicago for 123 miles of Consolidated Traction Company's track within the city limits. This system will be rehabilitated with the same thoroughness as the lines of the Chicago Railways Company. The tracks will be rebuilt and new equipment provided. Work has started on the new track on Belmont and Milwaukee avenues and West Madison street. The rehabilitation will be continued vigorously this year.

#### CITIZENS OF CHICAGO:

We have expended \$30,000,000 during the last three years for new cars, new track, new buildings and general equipment. We have complied with the "immediate rehabilitation" requirements of our traction system. Does it meet with your approval?

#### CHICAGO RAILWAYS COMPANY

The Chicago Railways Company, operating 443 miles on the north, west and northwest sides, feels that it has established a world-beating record during the three-year rehabilitation period terminating in February, 1911. It is a record to inspire pride and elation and satisfaction over work well done.

The Company has more than carried out the spirit and letter of its franchise contract with the city. It has rebuilt its system, and the people—some millions of them—are getting the benefit every hour of the day in improved transportation service.

It has expended vast sums of money, engaged many thousands of workmen; its officers and employes have devoted their fullest energies during the transformation of a system somewhat run down, somewhat dilapidated, and somewhat obsolete into an up-to-date traction system.

## BIG VALUE FOR A NICKEL.

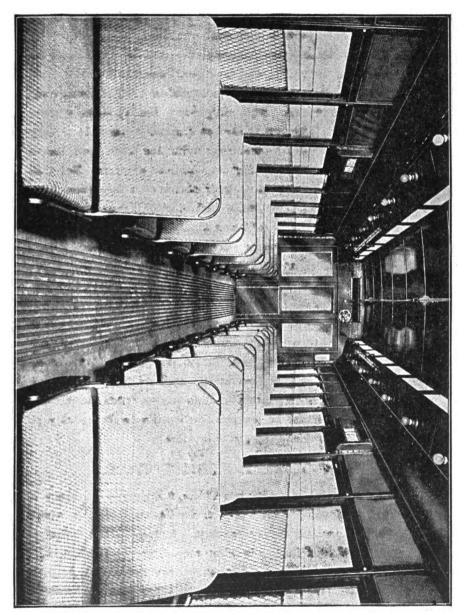

The resident of Chicago gets more value for a nickel in street-car transportation than in any other city in the land. He is getting through-route rides—twenty-miles long, if he desiresand universal-transfer privileges, with transportation in handsome, luxurious, roomy, well lighted, heated, ventilated street cars, costing six thousand dollars each, manned by the highest paid trainmen, running over the highest type of grooved rails, the track costing approximately \$50,000 a mile.

Mr. Citizen of Chicago is being transported from the heart of the city in street cars that are superior in comfort to privately owned automobiles, to the uttermost parts of Chicago; from the clamor and confusion and hurly-burly of the congested business district to the frontiers of the city, embracing 190 square miles of territory, to the region of fresh air, sunshine, roomy yards and cozy houses and cheap real estate. The rate of fare is infinitesimal. It is the cheapest thing in Chicago.

It must be apparent that all of these urban transportation facilities (and nowhere has the standard of living advanced more than in street car accommodations) cost money—considerable money—and as has been stated, the Chicago Railways Company, in order to give the people of this city a perfect traction system, had expended up to the first of November the comfortable sum of \$30,000,000

### CARRIES 1,500,000 PASSENGERS DAILY.

The passengers of the Chicago Railways Company, something like 1,500,000 every day in the year, have seen the evidences of the rehabilitated system, and can tell you where the money has gone. They ride in the new cars, over the new track, and they can observe the great buildings erected for housing the vehicles and supplying the electric current that makes the wheels go round. They cannot fail to be impressed with the provisions made for their comfort at the "Limits station," where a large waiting room is situated, with tiled floor, white and green enameled brick trimmings, public toilet rooms and station seats. A

covered arcade enables passengers to transfer from one car line to another without regard to inclement weather.

The Chicago Railways Company now has in operation over 1.000 first-class new Pay-as-You-Enter street cars, and will, within the next, three months, have a total of 1,340 of these comfortable modern vehicles, equipping every line upon its system. The cast of the Chicago Railways Company have been constructed by the Pullman company with the same care, as to details, that marks the sleeping cars of that concern. Not that passengers are supposed to do any sleeping in the street cars, even when straggling home in the early morning hours! But your native born and adopted residents of Chicago insist upon being comfortable and roar when they are not, and on this account the Chicago Railways Company's cars have been built with wide aisles and wide seats that will accommodate two corpulent persons sitting side by side, and with strong electric lights, so placed that passengers can read their newspapers without straining their eyes, and with wide windows so that the view is unobstructed; and with roomy front platforms for smokers; and with perfect motor equipment—four motors to the car—so there may be no annoying delays resulting from breakdowns—so that the journey in the street cars may be accomplished with as little delay as may be compatible with safety of operation.

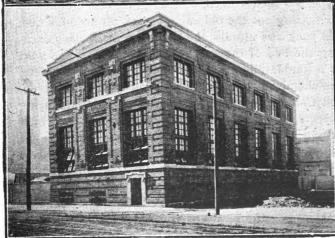

### VENTILATED STREET CARS.

The later street cars that the Chicago Railways Company is receiving are provided with a perfect ventilating system in which the stale air is pumped out by means of a fan operated by an electric motor, while a new supply of air enters through the car floor. In winter the air is warmed by passing over the electric heaters. So you see the new street cars are more scientifically ventilated than the average home. The new vehicles are all supplied with

Five Generators in the Van Buren Street Substation —Largest Substation in the World — Chicago Railways Company.

Digitized by Google

steel wheels which are practically noiseless in operation and do not become worn into that instrument of torture known as the flat wheel.

In addition to cars of the prepayment type, the company operates hundreds of other cars, so that during the rush hour the Chicago citizens come near realizing their ambition—to all get down to work in the morning and all go home in the evening at the same time. It is quite likely that in Continental Europe there are more seats available during the rush hours, but in Continental Europe one isn't in so much of a hurry. Furthermore, the people of Chicago wouldn't stand for European street cars on the back streets. They want 'em long and wide and imposing looking. Nothing else will do.

But something else besides street cars is needed in the operation of an up-to-date system. These new cars of the Chicago Railways Company weigh 53,000 pounds each—requiring some power to run them—and it was obvious that the old style of rail wouldn't sustain their weight very long, or successfully. Moreover, the traction ordinances required grooved rails of a specific type. So, all over the city, as soon as the traction ordinance had been accepted, the company began to tear up the old rails—in some places they were good enough to have survived for several years—and replace them with grooved rails of the girder type, 91/2 inches deep, and weighing 129 pounds to the vard. After tearing out the old cable tracks, an arduous task in itself, hard on back and morals, the trackmen made deep excavations. Rolling the bed of the excavation thoroughly, the next step was to lay a foundation of crushed stone and then concrete. surrounding the chemically treated ties. This type of construction, with which Chicago people have become so familiar during the last three years, costs approximately \$50,000 a mile, which includes the paving of the right of way. In many instances the track work cost even more when the company was obliged to pave the street for some distance outside the right of way, in order that the contour of the street might be preserved. hundreds of places on the lines of the Chicago Railways Company there are street intersections where the track and pavement

represent an outlay of \$25,000 or more for each layout of special work. These new rails are welded together by electricity, and the joints at intersections where special work has been installed are of solid nickel steel.

At the close of 1910 the company had built 223 miles of new track, including seventeen miles of extensions. In addition sixteen miles of new track had been constructed for the Consolidated Traction Company.

Rehabilitation also necessitated the installation of many miles of trolley wire, the setting back of trolley poles on 250 miles of street, the laying of over 700 miles of single duct cable conduit and the installation of cable therein for the transmission of electric current and a large amount of other work done that wouldn't be of much interest except to a street railroad man or an electrician.

Originally, when the electric street cars succeeded the cable rope, which in its turn had replaced the horse cars, the electrical power was supplied by power houses of the company. The modern idea appears to be to purchase this power in large quantities from a central electric plant and transmit it over the railways' system through substations. The Chicago Railways Company has a number of these substations situated at convenient places on its lines. The exterior of the buildings presents an ornamental type of architecture, being constructed of vitrified brick. The electric current is delivered at the substations at high voltage and reduced by means of rotary converters to the voltage required for the operation of electric cars.

The building rehabilitation of the Chicago Railways Company necessitated the construction of a number of new car stations, shops and other structures, some of them representing an outlay of more than \$300,000 each. All of the car stations are fireproof, built of vitrified brick and concrete, are an architectural credit to their respective neighborhoods, and are not only designed so that the street cars may be most conveniently handled, but the greatest pains have been taken for the comfort of the men.

During the last three years \$2,554,636.47 has been paid to the City by the Chicago Railways Company, being 55 per cent of its net receipts. Augustana Nurses' Home-346 Garfield avenue. ly scenes that will give as nearly a faithful representation as possible.

The decision of the Supreme Court affirming the right of the mayor to censor the films and pictures exhibited in the cheaper as well as the more pretentious theaters cannot fail to gratify those of us who believe that the five-cent moving picture shows are possibilities for a great deal of good in the community. Of rapid growth, these novel places of amusement have undoubtedly filled a popular need. Otherwise their ubiquity and marvelous increase in variety and number is inexplicable. That they are a paying venture merely confirms the fact that there is a demand for just the kind of entertainment they provide. Nor is it difficult to understand wherein the peculiar attraction of these cinematographic displays lies. They do more than

fill an idle hour. But did they even do only this they would have to be given credentials as purveyors of legitimate amusement. Hours unemployed are the devil's opportunity. A well-known proverb has taught us to know and to remember this.

They who have had dealings with the young need not to be reminded of the far-reaching applications of this observation. Delinquency among adolescents is in most cases directly traceable to idleness. Hours of relaxation are beset with perils. If not properly utilized they are apt to breed and to encourage vicious indulgence. Public playgrounds, furnishing facilities for athletic and other healthful and helpful games; social centers, providing meeting grounds for social intercourse on a high plane, and thus affording all the attractions of the dance halls without their deplorable and reprehensible accessories, are practical applications of the wisdom phased in the popular saw concerning Satan's delight in idle hands. The moving picture show with the immoral films eliminated is a valuable member of the company of modern devices to so direct the leisure hours of the young and old alike as to prevent their being wasted in frivolous and pernicious excitement of demoralizing entertain-

Even now the discovery has been made and amply verified that the five and ten cent theater with its einematographic plays is a most powerful rival of the saloon. The saloon has often been defended on the score that it is the poor man's club. There is a strong basis for the plea. But the experience of recent days in connection with the introduction of these picture

theaters indicates that the best method of counteracting the attraction of the saloon as a place of recreation for the clubless is to provide amusements for them at a price which is within the reach of the ordinary patrons of the drinking resort.

Saloonkeepers have reported that their transient trade has fallen off in districts well supplied with these shows. This proves that the new departure should be encouraged. It has come to stay. Its potentiality for good is not to be doubted. Efforts should be made to lift their exhibits to highest planes of instruction. They have a hold on the general public. They fill a need in the economy of the community. In measure as they will reach out for better effects than mere spectacular and sensational reproductions of casual occurrences they will develop into agencies of great value in the domain of education and culture.

The educational value of travel is recognized. As the German song has it, they to whom God desires to show favor are permitted to see his wide world. Contact with the

favor are permitted to see his wide world. Contact with the people and races of distant lands is the most efficient antidote to national pride and arrogance. It is the counterirritant to narrow prejudice. It cannot but open the eye to the truth that beauty and virtue are not the monopoly of one race or nation. Goodness and strength are at home in the habitations of our antipodes as they are in our cities and villages. What of difference in the habits and situation of other people a visit to their country brings into view can only lead to the better appreciation of the advantages offered by our own civilization, and thus be an incentive to patriotism, or it will arouse the desire to emulate the example of others when their mode of life and their methods of law are seen to be better than our own.

But travel is denied to most men. They are the minority who may roam through God's world. Modern inventiveness has therefore shown commendable activity in contriving devices for the purpose of enabling those deprived of the privilege of travel to drink in the beauties of far off zones and to become acquainted with their people. The travelogue is in very truth a personally conducted tour without the expense and the discomfort of the actual excursion. Yet even this substitute fails to reach the masses. The picture theater opens to them the opportunity which travel and the travelogue mean to offer the more favored. As such their advent is a glorious earnest for great achievements. If well selected their program cannot but wield a mighty influence making for wider information and deeper culture placed within the ready reach of all.

The value of the new theater as a supplement to the course in history and geography given in the public school cannot be overestimated. It has been the ambition of modern pedagogy to make instruction vital. Textbooks are poor apologies for vital and vitalizing knowledge. In all well appointed schools the screen and lantern have been welcomed as powerful helpers. Yet the school hours are few and the subjects many and varied. Even the lantern slide lacks the element of vitalized the school and screen and lantern of vitalized the school and screen and lantern of vitalized schools.

j'y which motion alone can supply.

For this reason the moving picture show promises to be a most valuable adjunct to the schools. Soon a new President will be inaugurated. Yesterday King George paid a visit to Emperor William. Soon our fleet will sail through the great Panama Canal on its voyage around the world. Sicily devastated by earthquake still calls for sympathy. These and many more happenings will fill the columns of the newspapers. Their descriptions convey information, but for all that they are deprived of the breath of life. The cinematograph has mastered the secret of power. It invites us to chear the pageant or to shudder at the catastrophe as though we had been standing in the very street over which the procession passed or which the disaster overturned. It supplements the account in the newspaper. It vivifies it. It brings home the essential unity of all dwellers on earth. It brings history and geography within the very door of the house in which we live.

Such propinquity to all that happens on our planet, such intimacy with the great actors on the stage of time, the leaders of the nations, such acquaintance with the inhabitants of our earth and in the habiliments of life cannot but make for broader culture and tenderer sympathy. The picture show is indeed of good augury for the quickening of popular intelligence and—popular conscience. Both negatively by counteracting the allurements of lower amusements and positively by spreading knowledge and insight it is to be welcomed and encouraged as an institution doing good in its generation. With these great and glorious objects in view, the upbuilding of manhood and womanhood as a reward for a life's energy, the great redoubtable Selig stands as a beacon from whom radiates, in fountains of knowledge, the greatest educational factor ever

given the world.

### TABLE OF CONTENTS

#### OF FIRST TWENTY-SIX VOLUMES (1895 TO 1910 INCLUSIVE) OF THE CHICAGO DAILY NEWS ALMANAC AND YEAR-BOOK.

Note—The figures following the year are the page numbers of that volume.

Complete sets of The Bally News Almanac and Ybar-Book from the year 1835 to 1911 inclusive can be supplied for \$13\$, transportation prepaid. The first five issues for the years, 1885, 1884, 1887, 1883 and 1889 are bound in one volume, half morocco, library style. This volume is sold only to purchasers of complete sets. A complete set embraces the library volume and a cloth-bound issue for each succeeding year.

Single cloth-bound copies can be bought only for the years 1890, 1893, 1894, 1895, 1898, 1899, 1990, 1993, 1997, 1999 and 1911. These are supplied at the rate of 50 cents each, transportation prepaid, except 1907, which are supplied at the rate of 55 cents each. Single, paper-covered copies can be supplied for each year from 1895 to 1903, except 1897 and 1899, for 25 cents each at the office of publication, or 35 cents by mail.

Orders should be addressed to THE DAILY NEWS office, 123 5th avenue, Chicago. Nors-The figures following the year are the page Abdul Hamid Deposed-1910, 212. ## The Problem Solved

How to Print 6, 8, 10, 12, 14 and 16 Page Newspapers From One Roll of Paper and a Single Set of Plates.

## THE "UNIOUE" Single-Plate, Single-Roll Press

The printing portion is exactly similar to that in our best newspaper presses and has only two pairs of cylinders and two sets of inking rollers, USING THE REGULAR SEMI-CIRCULAR STEREOTYPE PLATES.

6, 8, 10, 12, 14 and 16 Page Papers from One Roll of Paper and a Single Set of Plates at a Running Speed of 10,000 an Hour.

4, 6 and 8 Page Papers from One Roll of Paper and

a Double Set of Plates, at 24,000 an Hour.

Prints ) 12 and 16 Page Papers, Composed of Two 6-Page and Two 8-Page Sections, from One Roll of Paper and a Single Set of Plates, at 12,000 an Hour.

When made five pages wide will produce also 18-Page Papers from 18 Plates and 20-Page Papers from 20 Plates, at 10,000 Copies an Hour.

Write for full information and price to
